Dear Mr Easton

I am writing to ask you to reject the application (A/256/21/RES) which requests that the proposed access to Dappers Lane from the proposed new development on the Oval Race Circuit (A/248/21/PL) be changed from a mechanised barrier to an ANPR.

There is currently such a camera at the top of Dappers Lane which is meant to restrict traffic from entering Dappers Lane from Angmering Park Estate but it doesn't. Dappers Lane is regularly used by cars ,vans etc making the road very dangerous for other users. Dappers Lane is a narrow country lane (with tight bends) with few adhoc pavements much used by walkers, horse riders and cyclists on their way to Angmering Park. It is the only safe access to Angmering Park from Angmering that does not involve crossing the A27 a notorious dangerous road to cross which has had a number of fatalities. If this access to Dappers Lane is changed from a mechanised barrier to an ANPR, Dappers Lane will continue to be used not only by all current traffic but also traffic from the proposed new estate making it even more dangerous for NMU's . I am aware of a number of people in the village who already drive to Angmering park along Dappers Lane as it is becoming already too dangerous to walk along. The proposed new development has access to Water Lane so does not need this proposed access to Dappers Lane.

Kind regards

Clare Weston
