Dear David

I write to object to the plans submitted for traffic access to onto Dappers Lane to now be controlled by a prosed ANPR camera system rather thsn a physical barrier as per the original planning consent.

There are already issues with increased traffic on Dappers Lane following all the development but at least the upper section of the lane would still hopefully be quieter and safer for pedestrians, cyclists and horses.

However, i am concerned this new proposed road connection onto Dappers Lane will increase traffic too much if not any physical controls such as a gate as ANPR cameras are not always immediately obvious, have to be actually turned on, be enforced by others and are more easy to vandalise.

Please can you help insist the developers stick to the original consent and install gates rather than a cheaper camera system that i fear will leave our local lane open to further unplanned traffic.

Best regards

Neil Walby
