Dear Michael,

There are a couple of things with this application. The ecological report states that they are no longer able to install an attenuation basin and proposed a number of swales instead – does this constitute a material change? And has this change been sent to drainage engineers for comment? It looks as though the reason for this is improper site management.

Secondly the management plan and ecological enhancement measures (figure 1) is illegible. Is there anyway of obtaining a clearer copy of the report? Without this, and provided the information I sufficient, I will not be able to recommend that the condition be discharged.

Kind Regards,

Jen

Jennifer Pollitt
