Anita

Agreed although I think this seems a bit crazy that we are being pushed for renewables and then have to prove it is satisfactory from an acoustic point of view.

We use them everywhere with no issue so a bit confused but can accommodate in report if we have to.

Thanks

Kind Regards

Dear Paul,

The environmental health officer has made the following comment:

I note the proposal for a system of Daiken Air Source Heat Pumps which will be provided at each unit of accommodation. I understand that this form of renewable energy supply, which can include external fans and pumps, has been associated with adverse noise to the detriment of, for example, neighbouring residential units. I would therefore strongly recommend that the Acoustic Report required under Condition 19 of the original Application A/46/19/PL includes investigation of this equipment to assess its likely effect on the acoustic environment and whether this is suitable in this case.

Given these concerns and since details are yet to be submitted for condition 19, it is my intention to progress condition 11 by partially discharging it at this stage. Please can you let me know by the end of Wednesday 29th if you don't agree

Regards

Anita Gardner
