Please ask for:

Technical Support Unit on extn. 37711

21st March 2019

Dear Andrew Gale

Development:

T1 Walnut in front garden:

West stem section

- o Reduce apical and lateral spread

- . Current branch length 5.0m
- . Finished branch length 3.0m

- . Current height 8.5m
- . Finished height 7.5m

East Stem section

- o Reduce apical and lateral spread

- o Current branch length 5.0m
- o Finished branch length 3.0m

- o Current height 8.5m
- o Finished height 7.5m

The tree recently suffered a failure of the central stem leader due to decay, this has resulted in a loss of the crown dampening effect and the isolation of the two remaining stem sections.

The specification is intended to reduce the end weight of the two remaining stem sections and in doing so lessen the loading on their attachment points, whilst retaining the overall crown form and amenity value

Location:

21A Lansdowne Road Angmering

Thank you for your application submitted via the internet on 20th March 2019. It is being dealt with by the Technical Support Unit and has been allocated the reference number

A/37/19/T.

We will contact you shortly with further details.

PMAC71p
