OWPC83893

I have lived on the development for over 2 years, and during this time I can confirm I have never noted an issue with surface water levels on the development or in our private garden. I understand the winter monitoring has also proven to be successful.

It is worth noting when we first lived moved in we had trees at the rear of the property to which we back onto industrial units. These have since been removed by we believe the industrial units. Prior to these being removed we did have bats in the garden. So it is worth noting this impact is not due to sigma but in fact the industrial unit removing trees to the boundary having a negative impact on the bats in the area.

Your views as made above will be considered before the application is determined.
