

SPECIFICATION NOTES - REFER ALSO TO THE TENDER DOCUMENT.

1.0 Setting out

1.1 Planting shall be set out exactly as shown on the drawing, and measured from existing fixed points. Curved beds shall be set out using steel rollers on the ground using two pointed stakes and a taut batten, or with the chain/puller. The junction between concrete and concrete shall be cut to form a smooth and even finish. Check that all planting is set out to the plan before calibration and planting works are carried out. Failure to do so may result in rejection of the work by the landscape architect and any expense incurred at the contractor's expense.

1.2 All planting shall be a minimum of 1 metre wide, except where there is insufficient space, due to the constraints of walls and path edges and their foundations. With narrow beds between walls, fences and path edges, ensure that the bed has space from concrete before planting. If the bed is wider than concrete, then the landscape contractor shall control the soil, mulch or landscape architect to determine how the bed is to be planted. The width of all beds will be checked by the landscape architect and where the width is not as shown, the contractor shall re-locate them to the specified width at its own expense.
