

Application No: A/50/22/PL

I agree with the conclusions of the Archaeological Desk-Based Assessment supplied with the application, i.e. that there is the potential for archaeological remains to be contained within the site that would be bound to be detrimentally affected by its development. It would therefore be appropriate for it to be evaluated by trial trenching ahead of development, the aim being to identify significant deposits that might be present and to implement appropriate measures for their preservation. This process would be best secured via a version of standard condition ARC1 as follows:

No development shall take place until the applicant has secured the implementation of a programme of archaeological work in accordance with a written scheme of investigation which has been submitted by the applicant and approved by the Planning Authority.
