This application has been dealt with in accordance with the Development Control Scheme protocol in respect of proposals for the development of single residential units or extensions to single units accessed from roads that do not form part of the Strategic Road Network (SRN). As such the comments provided by the Highway Authority should be considered to be advice only, with respect to this planning application.

This proposal has been considered by means of a desktop study, using the information and plans submitted with this application, in conjunction with other available map information.

Upon inspection of the plans, it does not appear that this illuminated fascia sign is in a location where it could obstruct the highway. Developments of this kind are unlikely to cause a large increase in pedestrian traffic in the area.

Provisionally, there would be no highway objection to this sign, subject to the Local Planning Authority attaching an appropriate informative to ensure the applicant obtains the proper licences and liability insurance (for a sign overhanging the public highway) from the Highway Authority following grant of any planning permission.

A TAD contribution would not be required for this application.
