Subject: RE: Pre Commencement Condition Letter

Dear Andrew

These pre commencement conditions are agreed although please could you review to ensure that there is no repetition of conditions in the final decision notice -- the two separate letters sent this morning both have 2 identical conditions relating to a *surface water drainage scheme and agreement of discharge flows*.

Date: 9th September 2019

Dear Mr James,

Town and Country Planning (Pre-commencement Conditions) 2018
Notice of intention to impose pre-commencement conditions

Erection Of 2 No. Semi-Detached Dwellings With Associated Access, Car Parking & Landscaping. This Application May Affect The Setting Of A Listed Building.

Old Blacksmith'S Yard Water Lane Angmering BN16 4EP

From 1 October 2018 section 100ZA(5) of the Planning Act 1990 provides that planning permission for the development of land may not be granted subject to a pre-commencement condition without the written agreement of the applicant to the terms of the condition (except in the circumstances set out in the Town and Country Planning (Pre-commencement Conditions) Regulations 2018).

The following Pre Commencement Condition/s are Proposed:

- 8 Before the site is occupied or any machinery is introduced to the site or demolition work or construction work or alterations to existing ground levels takes place a PRE-COMMENCEMENT Site Meeting is to take place between the Planning Authority's Tree Officer and the Arboricultural Expert representing the site owner(s) - at this meeting all protective fencing and ground protection measures will be inspected to verify they are 'Fit for Purpose' as required under British Standard 5837:2012 and have been erected and positioned exactly as shown on the Tree Retention Protection Plan, dwg.LLD1688-ARB-DWG-002-TRPP.

Reasons: To comply with BS5837 and to ensure that retained trees are afforded due respect and appropriate levels of protection such that their ongoing health and vitality is not compromised, and they can continue to enhance the landscape and amenity of the area. This pre-commencement condition is considered necessary in order to protect trees neighbouring the site during the construction process.

- 9 Development shall not commence, other than works of site survey and investigation,

until full details of the proposed surface water drainage scheme have been submitted to and approved in writing by the Local Planning Authority. The design should follow the hierarchy of preference for different types of surface water drainage disposal systems as set out in Approved Document H of the Building Regulations, and the recommendations of the SuDS Manual produced by CIRIA. Winter groundwater monitoring to establish highest annual ground water levels and winter Percolation testing to BRE 365, or similar approved, will be required to support the design of any Infiltration drainage. No building / No part of the extended building shall be occupied until the complete surface water drainage system serving the property has been implemented in accordance with the agreed details and the details so agreed shall be maintained in good working order in perpetuity.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies W SP1, W DM1, W DM2 and W DM3 of the Arun Local Plan. This is required to be a pre-commencement condition because it is necessary to implement the surface water drainage system prior to commencing any building works.

- 10 The development shall not proceed until details have been submitted to and approved in writing by the Local Planning Authority for any proposals: to discharge flows to watercourses; or for the culverting, diversion, infilling or obstruction of any watercourse on or adjacent to the site. Any discharge to a watercourse must be at a rate no greater than the pre development run-off values. No construction is permitted, which will restrict current and future land owners from undertaking their riparian maintenance responsibilities in respect to any watercourse or culvert on or adjacent to the site.

Reason: To ensure that the proposed development is satisfactorily drained in accordance with policies W DM1, W DM2 and W DM3 of the Arun Local Plan. And to ensure that the duties and responsibilities, as required under the Land Drainage Act 1991, and amended by the Flood and Water Management Act 2010, can be fulfilled without additional impediment following the development completion. It is considered necessary for this to be a precommencement condition to protect existing watercourses prior to the construction commencing.

OPTIONS:

1. Confirm your acceptance in writing by the **23rd September 2019**.
2. Choose not respond (i.e. remain silent). If there is no response by the **23rd September 2019** the Local Planning Authority may grant planning permission subject to the terms of the pre-commencement condition specified in the notice.
3. Provide comments before the **23rd September 2019** on the proposed pre-commencement condition, in which case that condition cannot be imposed.
4. Indicate before the **23rd September 2019** that you do not agree to the terms of the proposed pre-commencement condition, in which case the Local Planning Authority may then either:
 - a. grant planning permission without the pre-commencement condition,
 - b. seek written agreement to an alternative pre-commencement condition, or
 - c. refuse to grant permission (if it considers that the disputed pre-commencement condition is necessary to make the development acceptable in planning terms).

If you wish to discuss the contents of this letter, or if there is anything you do not understand, please contact the case officer on the above extension.

Yours sincerely

Neil Crowther
Group Head of Planning
