Dear Mr. McEwan,

Project: The Vinery, Poling.

Please accept this letter with respect to the amendments to the landscape scheme for the approved planning application at The Vinery, Poling.

The landscape scheme has been amended to incorporate the route of a HV cable cutting through the site. This has required minor amendments to the planting plans and their schedules.

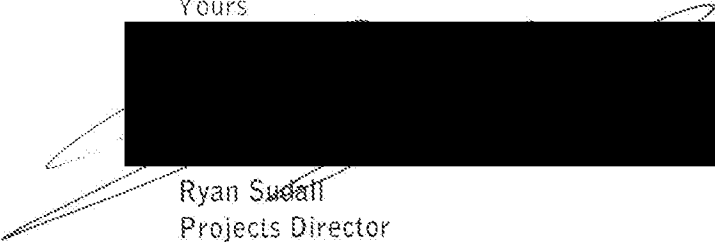

The amendments to the planting scheme are as follows:

1. Planting zones have been adjusted to suit the utilities corridor.
2. Larger tree species have been moved so as not to have conflict with the utilities corridor.
3. The location of the sub-station is now included on the planting plans.

The amendments have been carefully coordinated to ensure that there is no impact upon the elevations provided to support the original planning application.

Please do not hesitate to contact me should there be any queries arising from the proposed changes.

Yours

Ryan Sudall
