Fargo planning application Ref A/74/13

Dear Sir

I would like to object to the above planning application.
My reasons for objecting are:

The existing site of the Vineries is large enough to accommodate any new development without having to destroy anymore countryside. At present it is not fully developed and hardly over used.

The busy A27 which now resembles a car park in the summer months will only be made worse with a lot more traffic using the Vineries site which will also hinder access to Poling Village.

There will be a loss of countryside views for a large percentage of Poling residents who's homes will have the proposed development in their views. Light and noise pollution will increase to unacceptable levels, the adverse affect this will have on our local environment must not be underestimated.

Yours sincerely
Michael Carlin
