Dear Mr Eastham,

RE: Land at Dappers Lane Angmering

Thank you for your correspondence of the 26th May 2020, advising me of a planning application for 84 No. dwellings, public open space, play areas, associated infrastructure & landscaping. This application affects a Right of Way for which you seek advice from a crime prevention viewpoint.

I have had the opportunity to examine the detail within the application and in an attempt to reduce the opportunity for crime and the fear of crime I offer the following comments from a Secured by Design (SBD) perspective. SBD is owned by the UK Police service and supported by the Home Office and Building Control Departments in England (Part Q Security – Dwellings), that recommends a minimum standard of security using proven, tested and accredited products. Further details can be found at www.securedbydesign.com

The National Planning Policy Framework demonstrates the government's aim to achieve healthy, inclusive and safe places which are safe and accessible, so that crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion. With the level of crime and anti-social behaviour in the Arun District being average when compared with the rest of Sussex, I have no major concerns with the proposals, however, additional measures to mitigate against any identified local crime trends and site specific requirements should be considered.

I direct the applicant or their agent to our website at www.securedbydesign.com where the SBD Homes 2019 Version 2 document can be found. The Secured by Design scheme is a Police initiative to guide and encourage those engaged within the specification, design and build of new homes, and those undertaking major or minor property refurbishment, to adopt crime prevention measures. The advice given in this guide has been proven to reduce the opportunity for crime and the fear of crime, creating safer, more secure and sustainable environments.

Mr Eastham
Planning Officer
Planning Control
Arun District Council

I am pleased to see that the development reflects the attributes of safe, sustainable places set out in Safer Places – The Planning System and Crime Prevention.

These are:

- Access and movement - places with well-defined routes, spaces and entrances that Provide for convenient movement without compromising security.
- Structure - places that are structured so that different uses do not cause conflict.
- Surveillance - places where all publicly accessible spaces are overlooked.
- Ownership - places that promote a sense of ownership, respect, territorial responsibility and community.
- Physical protection - places that include necessary, well designed security features.
- Activity - places where the level of human activity is appropriate to the location and creates a reduced risk of crime and a sense of safety at all times.
- Management and maintenance - places that are designed with management and maintenance in mind, to discourage crime in the present and the future.

The development in the main has outward facing dwellings with back to back gardens which has created good active frontage with the streets and the public areas being overlooked. Parking has been provided with in-curtilage, garage and a number of on street parking bays, this should leave the street layout free and unobstructed.

Where communal parking occurs it is important that they must be within view of an active room within the property. An active room is where there is direct and visual connection between the room and the street or the car parking area. Such visual connections can be expected from rooms such as kitchens and living rooms, but not from bedrooms and bathrooms. Gable ended windows can assist in providing observation over an otherwise unobserved area.

With regards to the two pedestrian links - public footpaths should not run to the rear of, and provide access to gardens, rear yards or dwellings as these have been proven to generate crime. Where a segregated footpath is unavoidable, for example a public right of way, an ancient field path or heritage route, designers should consider making the footpath a focus of the development and ensure that they are as straight as possible • wide • well lit (within BS 5489-1:2013) • devoid of potential hiding places • overlooked by surrounding buildings and activities • well maintained so as to enable natural surveillance along the path and its borders. For further information on footpath design see para 8.8 – 8.12 SBD Homes Version 2 2019.

With regards to the proposed LEAP - areas of play should be situated in an environment that is stimulating and safe for all children, be overlooked with good natural surveillance to ensure the safety of users and the protection of equipment, which can be vulnerable to misuse. They should be designed to allow natural surveillance from nearby dwellings with safe and accessible routes for users to come and go. Boundaries between public and private space should be clearly defined and open spaces must have features which prevent unauthorised vehicular access. I would ask that when consideration is given to the eventual location for the LEAP, that it is surrounded with railings with self-closing gates to provide a dog free environment rather than the proposed post and rail fencing with netting.

With regards to the proposed landscaping I recommend that ground planting should not be higher than 1 metre with tree canopies no lower than 2 metres. This arrangement provides a window of observation throughout the area.

Finally, lighting throughout the development will be an important consideration and where it is implemented it should conform to the recommendations within BS 5489-1:2013. SBD considers that bollard lighting is not appropriate as it does not project sufficient light at the right height making it difficult to recognise facial features and as a result causes an increase in the fear of crime.

I would also ask you to note that Sussex Police is now exploring the impact of growth on the provision of policing infrastructure over the coming years and further comment on this application may be made by our Joint Commercial Planning Manager.

Thank you for giving me the opportunity to comment.

The Crime & Disorder Act 1998 heightens the importance of taking crime prevention into account when planning decisions are made. Section 17 of the Act places a clear duty on both police and local authorities to exercise their various functions with due regard to the likely effect on the prevention of crime and disorder. You are asked to accord due weight to the advice offered in this letter which would demonstrate your authority's commitment to work in partnership and comply with the spirit of The Crime & Disorder Act.

Yours sincerely
