Dear Mr Eastham,

PLANNING APPLICATION FOR THE ERECTION OF 84 DWELLINGS, PUBLIC OPEN SPACE, PLAY AREAS, ASSOCIATED INFRASTRUCTURE AND LANDSCAPING ON THE LAND AT DAPPERS LANE, ANGMERING.

I write on behalf of the Office for the Police and Crime Commissioner (PCC) for Sussex concerning application A/76/20/PL seeking planning permission for 84 dwellings (and other infrastructure) on the land at Dappers Lane, Angmering.

Sussex & Surrey Police are an active member of the National Police Estates Group and now act as one on all infrastructure and town planning related matters across their combined geographical area. Our approach to Section 106 requests is in accordance with national best practice recommended by the National Police Chief's Council (NPCC). The approach now adopted has been tested at public inquiries nationally and found to be in accordance with the statutory CIL tests. The large numbers of housing being developed across Sussex and more specifically Arun will place a significant additional demand upon our police service. These impacts will be demonstrated in this submission and the necessity of investment in additional policing services is a key planning consideration in determination of this planning application.

This development will place permanent, on-going demands on Sussex Police which cannot be fully shouldered by direct taxation. Like many other public services, policing is not fully funded via public taxation. This request outlines a number of the capital costs that will be incurred by Sussex Police to enable safe policing of this development.

All of the infrastructure outlined in this funding request has been found compliant with regulation 122 of the Community Infrastructure Levy and are considered directly related to the development in scale and kind and necessary to make the development acceptable in planning terms.

The application site is currently a greenfield area of land that has a negligible impact on policing. Once developed this site will create an additional demand upon the police service that does not currently exist.

The police will need to recruit additional staff and officers and equip them. The development will also require the services of a police vehicle. Staff and officers will also need to be accommodated in a premises that will enable them to serve the development. This request is proportionate to the size of the development and is intended to pay for the initial, additional costs resulting directly from the development for those areas where the police do not have existing capacity. The request also explains how the police service is funded, outlines National Planning Policy support for policing contributions and references numerous appeal decisions where police requests for developer contributions have been upheld.

Police forces nationally, are not in a position to support major development of the scale now being proposed for many of the nation's town and cities without the support from the planning system. If we are obliged to do so using our own resources only, then it is reasonable to conclude that there will be a serious risk of service degradation as existing coverage is stretched to encompass the new development and associated population growth. This is already evident across Sussex due to the significant numbers of housing being developed and clearly shown by the increasing numbers of recorded crimes in Sussex over the last year. Our force must ensure that development growth is supported by the infrastructure necessary to guarantee the safety and security of the new communities.

It is the responsibility of the PCC to ensure our Chief Constable has sufficient financial support to deliver a high level of policing to the residents of Sussex. Our office continues to actively seek financial contributions via Section 106 agreements and Community Infrastructure Levy funds to support our capital program. This will enable Sussex Police to deliver the highest possible service to ensure the protection of the communities that we serve. In line with many other police forces Sussex & Surrey Police have updated our methodology for infrastructure requests to ensure our representations are transparent and provide an up to date, accurate reflection of our current capacity in the district.

Our new methodology has been developed through a joint partnership with Leicestershire, Thames Valley, West Mercia, Warwickshire and other active members of the National Police Estates Group. This methodology was considered Community Infrastructure Levy REG122 compliant by Mr Justice Green in the case of *Jelson v SoSCLG and Hinckley and Bosworth Council* [2016] CO/2673/2016 (**Appendix 1**). In addition, there are a significant number of recent appeal decisions and High Court judgments supporting both the principle of Police contributions and our methodology (see attached appendices). The principle of developer contributions towards Sussex Police has recently been upheld by the Secretary of State in the allowed appeal relating to new 400 homes on the land east of Fontwell Avenue, West Sussex (Appeal ref: APP/C3810/V/16/3143095 – **Appendix 2**).

I will go into further detail on the various items of infrastructure and provide evidence of their compliance with Regulation 122 tests.

1. Police Funding and Development Growth

A primary issue for Sussex Police is to ensure that new development, like that proposed by application A/76/20/PL, makes adequate provision for the future policing needs that it will generate. Like other public services, Sussex Police's primary funding is insufficient to be able to add capital infrastructures to support new development when and wherever this occurs. Furthermore there are no bespoke capital funding regimes e.g. the Health Lift to provide capital either. The police therefore fund capital infrastructure by borrowing. However in a service where most of the budget is staffing related, the Sussex Police capital programme can only be used to overcome pressing issues with existing facilities, or to re-provide essential facilities like vehicles once these can no longer be used.

Sussex Police endeavour to use our existing funds as far as they stretch to meet the demands of an expanding population and overwhelmingly for revenue purposes. However, it is the limit of these funds which necessitates the need to seek additional contributions via Section 106 requests and the Community Infrastructure Levy (CIL). This situation also prevails in other public services seeking contributions and there is nothing different here as far as policing is concerned. What is

different is that the police do not enjoy capital income from the usual taxation sources. This evidences that the police do not make requests where other funds are available to meet their needs.

The reality of this financial situation is a major factor in our Forces planning and alignment with plans for growth in that whilst Sussex Police can plan using their revenue resources to meet their on-going, and to a limited extent, additional revenue costs these do not stretch to fund necessary additional investment in their infrastructures.

Sussex Police will continue to engage with Local Planning Authorities to ensure crime prevention is referenced within new local plan documents and provide crime prevention design advice to minimise the opportunities for crime within new development. Ensuring new development takes full consideration of crime prevention and the provision of adequate infrastructure to support policing is clearly outlined within the NPPF and within Paragraph 156 of the NPPF which states "*Local planning authorities should set out the strategic priorities for the area in the Local Plan. This should include strategic policies to deliver... the provision of health, security, community and cultural infrastructure and other local facilities*".

In the support of this request the following information is provided by Miranda Kadwell, Corporate Finance Manager at Sussex Police and is a detailed commentary on Sussex Police's budget, which underpins the above statements:

National funding

Sussex Police receives 61% of its funding from central government and 39% from local taxation. Central government funding comprises of the Home Office Core Funding Settlement, the Department for Communities and Local Government (DCLG) Formula Funding, (together these are referred to as central government grant or CGG for the purposes of this submission) and legacy Council Tax Grants (LCTG). LCTG are fixed and some elements of this are time limited, therefore, LCTG are not affected by variations in the funding formula.

The distribution of central government grant is calculated by the Police Relative Needs Formula. This Police Funding Formula divides up how much money each police force receives from the overall central government funds. It takes into account a number of factors to assess demand in each area.

The first stage of the formula is to divide funds between the different activities that the police undertake. These activities, or workloads, can be broken down into five key areas (Crime, Incidents, Traffic, Fear of Crime, and Special Events).

A portion of total funding is also distributed according to population sparsity, to address the specific pressure created by the need to police rural areas.

The second stage is to divide funding for each of these workloads between the 43 local policing bodies of England and Wales. In order to do this, "workload indicators" are calculated to estimate how much work each police force is expected to have in each of the key area compared to other forces. These estimates are calculated by socio-economic and demographic indicators that are correlated with each workload. Indicators of workload are used rather than data recorded crime levels to account for known variations in recording practices, and the funding model has been designed to avoid creating any incentives for forces to manipulate figures.

The formula consists of a basic amount per resident and a basic amount for special events, and top ups for the five key areas, sparsity and area costs (which takes account for regional differences in costs).

The top-ups etc. are weighted and use specific categories of population, rather than a straight forward population figure, to determine grant allocations, for examples specific categories includes the population of various benefits, long-term unemployed, over crowded households, hard pressed households, residents in terraced accommodation etc.

Whilst the funding formula is influenced through allocation of a basic amount per resident, this does not necessarily lead to an increase in Central Government Grant to Sussex Police. Putting

aside the time delays between recognising population growth and this being fed in to the funding formula, the overall pot available to all forces the CGG is limited and in fact has declined over the last few years as part of the Government's fiscal policy. Therefore, changes in general population or the specific population do not increase the overall funding made available through CGG, rather they would affect the relative distribution of grant between forces.

For the 2018/19 year there was no change to the CGG despite the occurrence of development growth in the county area compared to previous years. However it can be stated with certainty that even if there was an increase in central funding as a result of development growth, this funding would be fully utilised in contributing to additional salary, revenue and maintenance costs (i.e. not capital items and not what is claimed here). This funding, therefore, would not be available to fund the infrastructure costs that are essential to support the proposed development growth.

During the last year, the Home Office and police partners engaged on potential changes to the police funding formula. However, in the context of changing demand, the Minister for Policing and the Fire Service Nick Hurd has said that providing funding certainty over the next two years to enable the police to plan in an efficient way is his priority. Therefore, proposed changes to the funding formula will be revisited at the next Spending Review. Due to the uncertainty and range of possible outcomes, we have made no assumptions regarding a change to the funding formula in our current financial forecasts. This adds to the level of uncertainty over future government funding.

Local funding

Sussex Police (precepting body) places a demand or precept on the district and borough councils in its area (billing authorities) for a sum of money to be raised through the council tax. The amount to be raised is divided by the Council Tax Base (CTB) or number of households to arrive at an average Band D council tax, from which all other bands of council tax are determined. The growth in the council tax or the amount each household pays is decided by the Police and Crime Commissioner (PCC), having regard to the DCLG rules concerning the need to hold a local referendum where the proposed spending increase in the precept is above a prescribed threshold, currently £12 per Band D property to maintain real terms funding. The cap on precept uplift was raised to £12 for all forces for the 2018/19 year. Following public consultation the Police and Crime Commissioner proposed an increase in the 2018/19 precept of £12. This has now been raised to £24 per year from the start of the 2019/20 financial year.

During 2018/19 Sussex Police received the 5th lowest precept of any PCC in England and Wales. Sussex Police also had the 5th lowest precept of any PCC in England and Wales at £165.91 per Band D equivalent household. Sussex also have the 5th lowest funding per head of population at £155.84 which equates to a £19.01m difference to the average in England and Wales.

There remains potential for the council tax yield to increase simply through a growth in the CTB. However, it should be noted that the CTB is reduced for discounts and exemptions provided under the Local Council Tax Benefit Scheme (LCTBS) and may also be affected by collection rates. Therefore, a growth in households might not lead to a growth in council tax yield where those households benefit under the LCTBS.

The additional funding generated by council tax in 2018/2019 will reduce the severity of the Forces previous savings target. The savings target represents a funding gap between our existing budget requirements and current funding sources. However the latest Medium Term Financial Strategy indicates the PCC will still require a further £17m to be drawn from our reserves to support revenue costs associated with our Local Policing Program over the period to April 2020.

Most importantly, the higher council tax precept will allow our PCC to retain and invest in our workforce and continue supporting our Local Policing Program (LPP). Key considerations driving the precept increase decision included:

- Public demand on police services is increasing exponentially;
- Criminal investigations are becoming increasingly complicated, with huge amounts of digital material to identify, secure and analyse, against an exacting threshold for prosecution;

- The public want to see investment in more visible, local policing, focusing on crimes like burglary and anti-social behaviour and they rightly want to feel safe on the roads, in public spaces and at night-time;
- The public also want to see improvements in the force's approach to public contact and more support to the 101 service;
- HMICFRS (Her Majesty's Inspectorate of Constabulary, Fire and Rescue Services) has recently acknowledged the public's concerns about changes to neighbourhood policing, and stressed the importance of community intelligence;
- And, the PCC's consultations and correspondence with the public show that a majority of Sussex residents are prepared to support their police service through increased precept contributions.

Savings

Since 2010/11 we have seen reductions to the grant funding provided by the Government to Policing Bodies in England and Wales. Over the last eight years Sussex Police have worked hard to deliver savings and have made £88m of reductions and efficiencies to head towards balancing its books (source: Her Majesty's Inspectorate of Constabulary's (HMIC) Police Effectiveness, Efficiency and Legitimacy (PEEL) assessment and 2017/18 revenue budget).

Despite increases in the Council tax yield the 'Sussex Police Medium Term Financial Strategy' (MTFS) identifies a net savings requirement in the region of £3m over the next four years. This is the "budget gap" i.e. the difference between funding and the cost of policing which will need to be met by savings. Savings of £3m in addition to using £17m of reserves will be required to meet the total in-year gaps over the life of the MTFS and it is anticipated the budget will be balanced at the end of the 2021/22 year.

Capital Funding

Central Government funding for investment in capital infrastructure takes the form of a Home Office Grant. This grant makes up a small part of the overall funding for the Capital Programme and was reduced from £1.766m to 0.906m for the 2017/18 financial year. This was increased slightly to £0.925m in 2019/20. Our capital and investment program is funded firstly by our capital grant and capital receipts (building sales) and is then supported by reserves or revenue contributions. The latest MTFS capital and investment programme funding sources are shown on the table below (MTFS – 15.3 – Capital financing):

2018/19 Revised £m	Funding	2019/20 £m	2020/21 £m	2021/22 £m	2022/23 £m	Total £m
0.906	Home Office Capital Grant	0.925	0.925	0.925	0.925	3.700
3.053	Revenue Contribution	3.230	3.700	3.000	3.700	13.620
5.883	Capital Receipts	4.825	2.300	4.000	0	11.125
10.136	External Funding	-	-	-	-	-
14.047	Reserves	10.365	2.445	0.074	2.020	14.904
34.035	Total Capital and Investment Programme	19.335	9.370	7.999	6.645	43.349

Home office capital grant is cash limited and has been reduced in recent years due to austerity measures and the requirement to fund national projects such as the new National Police Air Support (NPAS) service and Police Live Services for digital data and technology capabilities. The grant is not affected by movement in the local population of CTB, therefore, any local capital investment creates an additional financial burden on Sussex Police which will be funded through reserves or borrowing. With diminishing reserves and the implications of borrowing both situations both alternative funding mechanisms are inadvisable.

Conclusions on funding

Like many other public sector organisations, Sussex Police have seen a real terms reduction in grant funding in recent years, which has necessitated changes to the policing model. At the same time the demands placed on the police service increase, whilst the service has to deal with the

changing nature of crime at both the national and local level, for example, cybercrime, child sexual exploitation and terrorism are areas of particular concern. Additional funding granted towards policing will support and sustain local policing services to Sussex residents.

In conclusion it remains necessary to secure Section 106 contributions or direct CIL funding for policing infrastructure, due to the direct link between the demand for policing services and the changes in the operational environment beyond Sussex Polices control i.e. housing growth and the subsequent and permanent impact it has upon policing.

Securing modest contributions means that the same level of service can be provided to residents of new development as it is to existing residents and without compromising frontline services. The consequence of no funding is that existing infrastructure will eventually become stretch to breaking point, and none of the communities we serve will receive adequate policing.

Whilst national and local funding must continue to cover salary and maintenance costs, there would be insufficient funding to provide the infrastructure required for officers to carry out their jobs effectively, Sussex Police consider that these infrastructure costs arising directly as a result of the development proposed and that funding for the police under S106 or CIL is both necessary and justified.

2. Assessment and Request

Our office have undertaken an assessment of the implications of growth and the delivery of housing upon the policing of Arun and in particular the areas of this district where new development is being directed towards. We have established that in order to maintain the current level of policing, developer contributions towards the provision of capital infrastructure will be required. This information is disclosed to secure essential developer contributions and is a fundamental requirement to the sound planning of the district. In the absence of developer contributions towards the provision of essential policing infrastructure the additional strain placed on our resources would have a negative impact on policing of both the development and force-wide policing implications within the district.

This submission will provide the most recent annual statistics for crime/incidents in Arun which will be compared to the number of existing households. This provides an incident per existing household (or person) within Arun which can then be used as the background to the various items of infrastructure outlined in this funding request.

Nationally, the Police Force ensure that we take regular legal advice and guidance from industry professionals on the applicability of NPPF tests relating to the application of Regulation 122 on our funding requests for S106 agreements and Infrastructure Development Plans. This included advice as to what is infrastructure which can be summarised as follows:

- The first point to note is that “*infrastructure*” is not a narrowly defined term. Section 216 of the Planning Act 2008 provides a list of “*infrastructure*” but is clear that that list is non-exhaustive. That fact is demonstrated by the use of the word “*includes*” prior to the list being set out.
- There is no difficulty in the proposition that contributions towards Police infrastructure can be within the definition of infrastructure for the purposes of the 2008 Act. In policy terms this is reinforced by the reference to security infrastructure in paragraph 156 of the National Planning Policy Framework.
- Infrastructure is not limited to buildings and could include equipment such as vehicles, communications technology, and surveillance infrastructure such as CCTV.

The submission set out below is based on the same methodology previously found sound by Planning Inspectors, the Secretary of State and the High Court and has been found sound. The costs included in this submission are sites specific costs which are envisaged to be secured via a Section 106 agreement. The significant costs relating to revenue will be met by local and national taxation.

3. Current Policing requirements in the district of Arun

Sussex Police's existing estate

At present, Neighbourhood policing in Angmering is delivered from the Littlehampton or Bognor Regis Police station. Littlehampton police station is located in the County building on East Street, Littlehampton. Littlehampton police station currently supports a number of Forcewide and divisional support staff and officers who are required to deliver policing to the site and surrounding area of Angmering.

As outlined in the Police Crime Commissioners Estate Strategy 2018-2022 Littlehampton Police Station is planned to be re-provided / re-located. This has been carried forward into the refreshed estates strategy and is a key site for Sussex Police. Potential sites and collaboration opportunities are currently being investigated with other blue light partners with a view to this project being completed in the next 3-5 years.

Sussex Police's current policing requirements and projections

For the 2019/20 year Sussex Police recorded 38,629 incidents which is a rise of 37,040 recorded in the previous year. This accounted for 8.3% of the total number of incidents in the County (2019/20 incident records). There has also been an increase in recorded crimes from 10,772 (2018/19) to 11,337 crimes.

To determine the current policing requirements per household or individual person an approximate estimation of the number of households and population in the district is required. The 2011 census listed 66,700 households in the District of Arun and taking into account net completions since this has increased by 4,976 homes to the end of the 2018/19 financial year (Arun AMR 2018/19).

The 2011 census listed 66,700 households and 149,518 persons in the Arun District and taking into account net completions since this has increased by approximately 4,976 (AMR 2018/19). This brings the total number of existing homes in the District to approximately 71,676, with an average household consisting of 2.24 persons (149,518/66,700).

At present 71,676 households / 174,889 person ($71,676 \times 2.44$) persons generates an annual total of 38,629 incidents that require a Police response. These are not necessarily all "crimes" but are calls to our contact centre which in turn all require a Police response/action, thereby placing a demand on our resources. It should be noted that the total number of crimes recorded in this period was 11,337 which is only 29% of all the recorded incidents.

Taking into account the number of recorded incidents and the recorded number of existing households this results in 0.539 incidents per household or 0.220 incidents per person that require a police response in Arun each year.

Sussex Police have a duty to respond to all incidents and many of these incidents are not recorded as crimes. We deliver crime prevention and presence, attendance and service lead at emergencies eg RTA's or flooding, counter terrorism and community reassurance. We must also attend all incidents involving deaths, attend crowd and events policing, attend and input to community safety and crime partnerships, and provide referral responses when there are expressed concerns about the safety of children, the elderly and those with special needs.

4. Breakdown of predicted incidents as a result of population increase in Arun

The proposed development of 84 homes would have a population of 185.6 persons (see breakdown). Applying the current ratio of "incidents" to population then the development would generate an additional 40.83 incidents per year for Sussex Police to attend (0.220×185.6).

Private market units- 59 units (70%)

Housing Type	1 bed	2 bed	3 bed	4 bed	Total
Proposed percentage	0%	35%	30%	35%	

No. of units	0	32	16	11	59
Expected occupancy	1.3	1.9	2.5	2.9	
Total	0	60.8	40	31.9	132.7

Affordable units- 25 units (30%)

Housing Type	1 bed	2 bed	3 bed	4 bed	Total
Proposed percentage	0%	35%	30%	35%	
No. of units	0	16	9	0	25
Expected occupancy	1.3	1.9	2.5	2.9	
Total	0	30.4	22.5	0	52.9

These incidents are likely to result in 11.8 additional recorded crimes per year attributed to this neighbourhood.

5. Current breakdown of policing delivered in Arun

Current statistics show that Sussex Police employ 2622 officers in active duty delivering policing to the residents of Sussex. These roles can be categorized into dedicated policing teams delivering neighbourhood policing; divisional policing delivering specialist services such as response roles and investigations; and Forcewide policing teams delivering specialist policing services across the county such as Firearms, Major crime and counter terrorism. All of these functions are essential to the success of Sussex Police and will all be utilised in some capacity to deliver policing to this new neighbourhood in Angerming. Sussex Police also employ 2237 support staff in either dedicated, divisional or Forcewide roles.

In total the Local Authority of Arun is served by; (all figures = FTE)

Police officers

- 129 dedicated uniformed Officers
Neighbourhood Policing Team officers (NPT), Local Support Team, Response Policing Teams, Police Community Support Officers.
- 53 divisional officers

The West Sussex division has 295 officers not including the dedicated officers listed as dedicated uniformed officers. These roles include Investigation teams, Special Investigations Unit (SUI), CIT (Crisis Intervention Team, Operational support teams. Recorded incidents in Arun account for 18% of the recorded incidents in West Sussex over the last year therefore it is reasonable to allocate 53 divisional officers to the Arun District.

- 39 Forcewide officers

A large number of our officers deliver force wide policing in a variety of roles including Operations, Firearms, Major crime, Public protection, Specialist crime, Custody, Communications, Professional standards and Training roles. There are 473 officers Forcewide officers which deliver policing to the whole of Sussex and are vital to the operation of all types of policing including the functioning of

neighbourhood policing. Taking into account into account that 8.3% of all incidents managed by Sussex Police occur in Arun 39 officers are required for the policing of this District.

Police staff

Sussex Police currently employs 2237 support staff delivering policing to the residents of Sussex. These roles can be categorized into dedicated support staff such as police enquiry officers and facilities assistants; Divisional staff teams (ie: East Sussex, West Sussex, and Brighton & Hove) delivering services such as crime prevention, operations, investigations, strategic support, corners office and other essential roles. Forcewide support staff roles such as public protection, joint transport services, crime justice & custody, communications departments and specialist crime command. Some specialist department roles have not been included, however all the above force-wide departments consist of 10 employees or larger. This precludes specialist support staff roles such as the office of the Police and Crime Commissioner which are not directly linked to population growth.

- 15 dedicated support staff

Police Enquiry officers, Facilities officers, Facilities Assistants

- 21 divisional support Staff

As with police officers roles divisional support staff is essential to support front line policing and drawn upon when required. Divisional support staff roles include Investigations teams, Crime Prevention, Licensing, Prosecution case workers, Coroners Office and other essential roles. There are 116 divisional support staff within these departments. Again utilising the ratio of incidents in West Sussex (18%), 21 support staff are required to support the existing population of Arun.

- 96 forcewide support staff

The majority of our support staff functions are delivered in a force-wide capacity. Only departments with over 10 or more support staff members have been included within this field which removes specialist roles within Sussex Police which capacity is not directly related to population increase. There are 1202 support staff within these various major support staff departments including Specialist crime command, Public protection, Operations, Human Resources, Communications departments and Joint Transport Service. Taking into account into account that 8.0% of all incidents managed by Sussex Police occur in Arun, 96 support staff are currently required to support policing in Arun.

Dedicated officers	129
Divisional officers	53
Forcewide officers	39
Total number of officers	221
Dedicated support Staff	15
Divisional support staff	21

Forcewide support Staff	96
Total number of staff	132

Currently 38,629 incidents are attended by 221 officers per year in Arun which is a ratio of 179.79 incidents per officer, per year. To retain this current ratio of 179.79 incidents per officer per year, an additional 40.83 incidents per year would require 0.227 additional officers (23% of an officers workload).

In addition to the significant impacts this development would place on our policing teams this development would also require significant investment in our support staff capacity. As we have shown, approximately 132 police staff are required to support policing to the 71,676 households in Arun. This is a ratio of 543 households per staff member. Therefore an additional 84 households would require 0.155 additional support staff to retain this existing ratio.

Additional officers/staff required as a result of 84 additional houses

Total Additional Officers Required	0.227	40.83 (expected No. incidents arising from development) / 179.79 (No. incidents attended per year by an officer)
Total Additional Support Staff (Local/Central)	0.155	(84 / 543) (no. of new households / Existing no of support staff per household)

6. COSTS

In order to mitigate against the impact of growth our office have calculated that the capital "cost" of policing new growth as a result of this major planning application equates to **£14,548.98**. These funds would be used for the future purchase of infrastructure to serve the proposed development. This cost will now be broken down clearly to show the capital infrastructure required to support these new officers.

The contribution requested will fund, in part, the following items of essential infrastructure and is broken down as follows;

OFFICER SET UP

The basic set up costs of equipping staff are listed below. Following the start of the 2018/19 tax year we have reviewed and updated the start-up costs per officer which are now as follows:

OFFICER			
Start-up equipment (radio, workstation, body worn camera, IT equipment)	£4,307.33	0.227	£977.76
Start-up recruitment and training cost	£5,460	0.227	£1,239.42

TOTAL COST	£9767.33	0.227	£2,217.18
-------------------	-----------------	--------------	------------------

SUPPORT STAFF			
Start-up equipment (workstation, IT equipment)	£2,086	0.155	£323.33
Start-up recruitment cost	£1,060	0.155	£164
TOTAL COST	£3,146	0.155	£487.63

Sussex Police would utilise the contribution in the following manner;

- **£2,217.18** as a pooled payments towards the cost of 1 additional dedicated officer in the Angmering NPT to deliver policing to the site and surrounding area to be based at Littlehampton Police Station.
- **£487.63** as a pooled payment towards the cost of training and equipping 1 additional support staff member to deliver policing to the site and surrounding area to be based at Littlehampton Police Station.

We could not have officers attending this development with less than adequate equipment with unnecessary risk to themselves and occupiers served.

PREMISES

At present, Neighbourhood policing in Angmering is delivered principally from Littlehampton Police Station. Officers also use Bognor Regis Police station which is the primary policing base in the District.

The Sussex Police Estates department have undertaken a full capacity analysis of our sites across Sussex and identified police stations where we have issues with existing capacity and would therefore be unable to support additional officers and staff required due to population growth. This study shows that Bognor Regis Police Station and Littlehampton Police Station have very limited capacity and could not support additional staff or NPT/NRT officers to mitigate against this development.

The additional officers/staff required to police this development would be based at the new Littlehampton Police Station and therefore a financial contribution equivalent to the scale of the development is therefore sought from this development. There will be an increased number of officers/staff that need to be based on this new site as a result of policing needs arising from this development.

Sussex Police are required to maintain a high capacity of accommodation for staff and officers, with any additional capacity delivered via new works to provide floor space. Taking an average of the floor space provision over our sites in Sussex which deliver neighbourhood policing we have determined that each new officer/member of staff should be allocated approximately 7.93sqm of office floor space. We are also required to provide a minimum of 1sqm for officers/staff for storage (locker room etc). This bring the total space requirement to 8.93sqm.

Sussex Police have previously used Saxon House in Newhaven as an example to estimate costings for a new build or extension/adaption of existing building. This facility is a new facility shared with East Sussex Fire and Rescue and Lewes District Council which replaced the old police station. For new buildings such as Saxon House [the cost was estimated to be between £2500-3000/sqm].

Following the start of the 2018/19 tax year, Sussex Police will use the up to date BCIS costings index for all future S106 requests. The 17/03/18 issue of the RICS BICS costs (**Appendix 5**) which lists the median cost for new police stations at £2,631 (Median) which would be considered the minimum cost appropriate to support the additional officers/staff and the new Littlehampton police station.

Sussex Police would seek the following premises costs associated with increased officers/staff numbers generated by this development:

- 0.227 NPT/NRT officers to be based at Littlehampton Police Station – $0.227 \times £2,631 \times 8.93 = \textbf{£5,333.33}$
- 0.155 additional divisional/force-wide support staff member to be based at Littlehampton Police Station – $0.155 \times £2,631 \times 8.93 = \textbf{£3,641.70}$

Total premises contribution sought: **£8,975.03**

VEHICLES

A vital part of providing effective policing to the residents of Arun is maintaining the large fleet of vehicles. These vehicles range from General Response Vehicle (GRVs or patrol cars), unmarked general support vehicles, Public Service Unit vans and minibuses, scientific (e.g Scene of Crime Officers) vehicles, pursuit vehicles – 4 x 4 and high speed, motorcycles. Current fleet deployment in Arun administrative area (serving 71,676 households) currently consists of 29 active divisional vehicles and 43 force-wide vehicles. Maintaining our force-wide fleet is essential to the success of Sussex Police and important to enable the force to efficiently combat cross border crime. There is currently no capacity to meet the additional policing needs this development will present, therefore investment towards increasing fleet capacity is sought from this development.

In total there are 28 divisional vehicles and 43 force-wide vehicles delivering policing to the District of Arun.

	Department	Number of vehicles
Divisional	Crime management, Local command, Local investigations, Neighbourhood Policing Teams, Neighbourhood Response Teams, Response investigations	29
Forcewide	Crime support command, Dogs section, Firearms, Intel, Licensing, Major investigations, Public protection, Traffic, Training.	43

The average capital cost of a new vehicle is £17,000 (not including fuel and maintenance). Our guideline for the majority of marked vehicles is to replace every four years or 125,000 miles. The condition of vehicles at the end of their police life varies however Sussex Police forecast that they will redeem, on average 5% of a vehicles value on disposal.

The development will require fleet investment far exceeding 4 years therefore Sussex Police would require at least an 8 year life of provision. This contribution is justified because there is insufficient funding within the police's revenue income to take on the capital cost after just four years, without diverting money from elsewhere. Sussex Police estimate that the 4 year lifetime cost per vehicle is approximately £42,240 including running costs and capital charges.

72 vehicles at net value of £1,224,000

Existing number of households in Arun (71,676) = £17.08 per Household (1,224,000 / 71,676) x 84 Households x 2 = **£2,869.44** to give 8-year life of provision.

The same methodology has been used to calculate our fleet requirement as the Warwickshire police representation which has been supported in the most recent appeal decision concerned contributions towards policing (**Appendix 6** - APP/R1845/W/17/3173741) issued on the 18th March 2018. Sussex Police consider this would be the most appropriate methodology to use in this and all future section 106 requests.

It is vital to ensure fleet deployment is maintained in line with the existing population of Arun and therefore a financial contribution towards fleet capacity is essential to make this development acceptable in planning terms.

Vehicles are fundamental capital policing infrastructure to deliver community safety and address crime especially at neighbourhood level. Fleet deployment is related to the known policing demands of comparable developments in the locality.

The direct demand from the new development can be accurately forecast and delivering policing direct to this development will not be possible without additional vehicles to do so. Levels of demand and mitigations have been determined by the scale of the development and demonstrate only a proportion of a vehicle's time will be spent policing this development.

Sussex Police would utilise the contribution in the following manner;

- **£2,869.44** to be pooled towards the cost of one additional vehicle in the Angmering NPT/NRT.

7. Compliance with National Policy and CIL Regulations

Following the abolition of CIL regulation 123, the funding of infrastructure is no longer restricted to 5 separate developer contributions. Within Arun the majority of policing is carried out by the NRT/NPT teams, therefore our office would recommend funds received from Section 106 agreements should be spent directly on supporting these teams. Therefore, when contributions from new housing development are pooled it is sensible to do this based on NRT areas which in the case of this development is the Angmering NRT/NPT.

The assessment for these infrastructure contributions is outlined in CIL Regulation 122, which requires each item to meet the following three tests. From the numerous appeal / Secretary of State decisions and High Court judgements there is significant evidence that all the items listed in this request comply with CIL Regulation 122.

The costs of training officers have been included in this request and have been found sound (and compliant with Regulation 122) in numerous appeal decisions included as **Appendix 2**. In the respect of training in particular, the Sketcheley house decision (page 19 of Appendix 2) makes specific reference to "protective clothing, uniforms and bespoke training" and were endorsed by the Inspector in his report at paragraph 11.57 and by the Secretary of State at paragraph DL22.

It is therefore plain that the Secretary of State and numerous Planning Inspectors consider that National Planning Policy and legislation is capable of encompassing these types of infrastructures.

1. Necessary to make the proposed development acceptable in planning terms

The creation of safe and accessible environments where crime and disorder, and the fear of crime do not undermine the quality of life or community cohesion is fundamental to planning for sustainable development as confirmed in the National Planning Policy Framework.

Arun District Councils adopted Local Plan (2011-31) states that "In general, Arun is a relatively safe place with low incidence of crime, although fear of crime remains a significant issue which is highlighted in the Sustainable Community Strategy. Crime rates are relatively high in parts of Bognor Regis and Littlehampton, with part of River Ward, Littlehampton ranked within the worst 10% areas in England, and a number of other areas within Littlehampton and Bognor Regis falling within the worst 20%".

Policy DM1 (Aspects of form and design quality) lists 'Crime prevention' as the 6th consideration for new development proposals. When considering any application for development the Council will have regard to the following aspects:

6. Crime prevention

Provide security measures that make places feel safer. This shall be achieved through natural surveillance and human presence by locating building and play areas along public routes and spaces, and making a clear division between private and public land to foster a mutual protection for the territorial belonging. With respect to crime prevention, regard shall be had in particular to the document 'New Homes 2010 – Secured by Design' and the 'Safer Places – The Planning System and Crime Prevention'.

The importance of policing contributions are recognised in recent court judgements and are an essential core principle of the NPPF.

The Secretary of State has recognised that it is not a rigid requirement to have express reference to policing within local planning policy because the overarching principle of ensuring safe communities is recognised in the NPPF. The Planning Inspector in the case of North-west Leicester District Council vs Money Hill Consortium (**Appendix 4**) stated:

62. The obligations of the Undertaking, other than that to support Police operations, are all related to requirement of development plan policies and are all necessary to make the development acceptable in planning terms. They are all furthermore, directly related to the development, are fairly and reasonably related in scale and kind to the development, and are in place to mitigate the effects of the development. The Legal Agreement, setting aside the Police contributions, therefore complies with Regulation 122 of the CIL Regulations 2010. Furthermore, taking into account the submissions of NWLDP, LCC and LP, the Agreement complies with Regulation 123 of the CIL Regulations 2010.

63. The contributions of £219,029 towards Police infrastructure is not related to requirement of development plan policies. The figure has been arrived at following a close and careful analysis of the current levels of policing demand and deployment in Ashby. The proposed development, in terms of population increase, would have a quantifiable and demonstrable effect on the ability of the Police to carry out their statutory duties in the town. LP has not sought any contribution to some aspects of policing, such as firearms and forensics, but only for those where there is no additional capacity. The contribution is necessary because the new housing that would be created would place a demonstrable additional demand on Police resources in Ashby. The financial contributions to Police operations thus satisfies Regulation 122 of the Community Infrastructure Levy Regulations 2010 and a provision of the Undertaking would ensure that the contribution also satisfies Regulation 123 of the Community Infrastructure Levy Regulations 2010.

The importance of policing contributions is importantly recognised in recent court judgments and considered an essential core principle of the NPPF. The judgment of Mr Justice Green 01/11/2016 (**Appendix 1**) with regard to the High Court challenge of Jelson Limited vs Secretary of State for Community and Local Government (1) Hinkley and Bosworth District Council stated:

"The gist of the Inspectors reasons are adequately set out in paragraphs [44]-[47] (see above). She records that LP has adequately demonstrated that the sums would be spent on equipment and services which arose "... Directly from the new households occupying the proposed development". Accordingly she concluded, in terms of causality, that there was a proper nexus between the expenditure and the new development. She also records that the proposed spending was properly attributed between individual projects and procurement such as property adaption and contributions towards a vehicle in order to prevent a need for pooling contributions".

"Mr Lambert cited empirical data based upon existing crime patterns and policing demand and deployment from nearby residential areas which established the direct and additional impacts of the development upon local policing. That data established that there would be an incremental demand in relation to such matters as calls and responses per year via the police control centre; an increase in annual emergency events within the proposed development; additional local non-emergency events which trigger follow-up with the public; additional recorded crimes in the locality based upon beat crime and household data and a proportionate increase in anti-social behaviour

incidents an increase in demand of patrol cover; and, an increase in the use of vehicles equating to 12% of an additional vehicle over a six year period."

Moreover, the wider principles of sustainable development within the NPPF also require consideration of all necessary infrastructure requirements, as observed by Foskett J in R. (Police and Crime Commissioner for Leicestershire) v Blaby DC and others. This judgment stated:

11. It is obvious that a development of the nature described would place additional burdens on local health, education and other services including the police force. The focus in this case is upon the effect upon the local police force. If it sought to shoulder those additional and increased burdens without necessary equipment (including vehicles and radio transmitters/receivers for emergency communications) and premises, it would plainly not be in the public interest and would not be consistent with a policy that encourages "sustainable development": see for example, paragraphs 17 of 79 of the National Planning Policy Framework (NPPF). It is that that leads to the Claimants interest in the matters".

As shown in section 1, there is no dedicated Government funding to comprehensively cover the capital costs associated with policing new housing development. Unless contributions from new developments are secured then Sussex Police would be unable to maintain the current levels of policing with resources diverted and stretched, inevitably leading to increased incidents of crime and disorder within the local area. Sussex Police strive to reduce the level of crime in the County however due to the significant numbers of new housing being brought forward the need for more front line staff and associated infrastructure has never been more relevant as a fundamental planning policy consideration.

Appeal decision APP/C3240/W/16/314445 (**Appendix 2**) issued on the 21st March 2017 provides further support for developer contributions towards the capital costs of additional policing infrastructure arising from new development. The Planning Inspector stated:

165: There is no doubt that the proposed development would generate a need for policing and that need would require additional resources which have been calculated on a pro-rata dwelling basis. The Framework identifies a need for safe and accessible environments where crime and disorder, and the fear of crime, do not undermine quality of life or community cohesion. In addition, an extensive array of appeal decision supports the principle of police contributions. Overall, the balance of the evidence before me points to the obligation (based on the underlying pro-rata calculation) being necessary and proportionate mitigation for the development.

We would also bring to attention dicta from the High Court judgment by Mr Justice Foskett in Police and Crime Commissioner for Leicestershire vs Blaby Council. Paragraph 61 and 62 of the judgment state:

61. I do not, with respect, agree that the challenge mounted by the Claimant in this case can be characterised as a quibble of a minor factor. Those who, in due course, purchase properties on this development, who bring up children there and who wish to go about their daily life in a safe environment, will want to know that the police service can operate efficiently and effectively in the area. That would want to know that the police service can operate efficiently and effectively in the area. That would plainly be "consumer view" of the issue. The providers of the service (namely, the Claimant) have statutory responsibilities to carry out and, as the witness statement of the Chief Constable makes clear, that itself can be a difficult objective to achieve in these financially difficult times. Although the sums at stake for the police contributions will be small in comparison to the huge sums that will be required to complete the development, the sums are large from the point of view of the police.

62. I am inclined to the view that if a survey of local opinion was taken, concerns would be expressed if it were thought that the developers were not going to provide police with sufficient contribution to its funding requirements to meet the demands of policing the new area: lawlessness in one area can have effects in another nearby area. Miss Wigley, in my judgment, makes some entirely fair points about the actual terms of the section 106 Agreement so far as they affect the Claimant.

Appeal decision APP/K2420/W/15/3004910 provides further evidence for developer contributions towards necessary policing infrastructure required to enable effective policing of new housing

development. The Planning Inspector supported the methodology used for this calculation and compliance with the specific capital infrastructure items detailed in our request.

44. Leicestershire Police (LP) have demonstrated adequately that the sums request would be spent on a variety of essential equipment and services, the need for which would arise directly from the new households occupying the proposed development. It would be necessary, there, in order to provide on-site and off-site infrastructure and facilities to serve the development commensurate with its scale and nature consistent with LP Policy IMP1. The planning contribution would also enable the proposed development to comply with the Framework's core planning principle of supporting local strategies to improve health, social and cultural wellbeing and delivering sufficient community facilities to meet local needs".

In respect of the methodology used for this request the same Planning Inspector stated "47 – I consider this to be a no less realistic and robust method of demonstrating the criminal incidents likely to arise in a specific area than the analysis of population data which is normally used to calculate the future demand for school places. The evidence gives credence to the additional calls and demands on the police service predicted by LP".

A financial contribution towards essential policing infrastructure is clearly essential to make new housing development acceptable in planning terms. The policing infrastructure items outlined in this request are essential to help support new officers required due to population growth and most importantly keep existing and future residents of Arun safe.

2. Directly related to the proposed development

There is a functional link between new development and the contributions requested. Put simply without new development taking place and the subsequent population growth there would be no requirement for the additional infrastructure. The additional population growth will lead to an increase in incidents, which will require a Police response. The infrastructure outlined in this request has been specifically identified by the NPT/NRT teams policing the areas of Arun as necessary to deal with the likely form, scale and intensity of incidents this new housing development will generate.

3. Fairly and reasonably related in scale and kind to the proposed development.

Securing proportionate developer contributions towards necessary capital expenditure is essential to help meet a proportionate increase in police infrastructure costs and to enable Sussex Police to maintain its current level of service in the District's. This infrastructure has been identified by Sussex Police as necessary to provide an appropriate level of policing to serve the proposed development and maintain the existing high level of community safety.

A clear numerical, evidence based approach has been demonstrated which is supported by case law and recent appeal decisions by the Planning Inspectorate. The various items of capital expenditure and infrastructure requested are considered CIL compliant and are necessary to enable new officers to undertake their role to meet the policing needs of the development and mitigate impacts to existing resources. A reasonable and proportionate approach has been adopted.

We would also highlight two recent appeal decisions in Leicestershire (APP/F2415/A/12/2179844 & APP/X2410/A12/2173673, **Appendix 2**). In assessing the request from Leicestershire police for developer contributions towards infrastructure the Inspector commented at **para 29** of decision 2179844;

The written evidence submitted by Leicestershire Police detailed the impact the proposed development would have on policing, forecasting the number of potential incidents and the anticipated effect this would have on staffing, accommodation, vehicles and equipment. In view of the requirement of national planning policy to create safe and accessible environments where crime and disorder, and the fear of crime, do not undermine quality of life, it is considered that, on the evidence before me, a contribution towards policing is necessary to make the development acceptable in planning terms.

Furthermore with regard to appeal decision 2173673, the Inspector is unequivocal in highlighting the acceptability of police contributions being recipients of developer's contributions;

Adequate policing is so fundamental to the concept of sustainable communities that I can see no reason, in principle, why it should be excluded from the purview of S106 financial contributions, subject to the relevant tests applicable to other public services. There is no reason, it seems to me why police equipment and other items of capital expenditure necessitated by additional development should not be so funded, alongside, for example, additional classrooms and stock and equipment for libraries. Para 292

These appeal decisions confirm that the approach of Sussex Police in assessing the impact of development, having regard to an assessment of the potential number of incidents generated by growth is appropriate, and fundamentally it confirms that police infrastructure should be subject to developer contributions as the provision of adequate policing is fundamental to the provision of sustainable development.

Furthermore the requirement to ensure that crime and the fear of crime is addressed through the planning process runs through the revised NPPF (2018);

Paragraph 20 (b) retains reference to 'security infrastructure' and advises that strategic policies should set out an overall strategy for the pattern, scale and quality of development, and make sufficient provision for:

b) Infrastructure for transport, telecommunications, security, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat).

Paragraph 91 advises that planning policies should aim to achieve healthy, inclusive and safe places which:

"are safe and accessible, so that crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion – for example through the use of clear and legible pedestrian routes, and high quality public space, which encourage the active and continual use of public areas.

Paragraph 95 outlines the importance of engaging with the security services to inform planning policy decision and promote public safety and defence requirements. This will be achieved by:

- a) Anticipating and addressing possible malicious threats and natural hazards, especially in locations where large numbers of people are expected to congregate. Policies for relevant area (such as town centre and regeneration frameworks), and the layout and design of developments, should be informed by the most up-to-date information available from the police and other agencies about the nature of potential threats and their implications. This includes appropriate and proportionate steps that can be taken to reduce vulnerability, increase resilience and ensure public safety and security; and*
- b) Recognising and supporting development required for operational defence and security purposes, and ensuring that operational sites are not affected adversely by the impact of other development proposed in the area.*

The Glossary to the new NPPF includes an entry entitled 'Essential Local Worker'. It states '*these are public sector employees who provide frontline services in areas including health, education and community safety – such as NHS Staff, teachers, police, firefighters and military personnel, social care and childcare workers*'. This recognises the emergency services as essential for the public, alongside education and health.

I trust this sets out sufficiently our office's request for infrastructure contributions relating to this development on the land at Dappers Lane, Angmering.

I am more than happy to discuss the content of this submission with yourselves and support with any further evidence if considered necessary.

Yours sincerely

Andrew Taylor
BA (Hons), MSc, MRTPI
Joint Commercial Planning Manager
Sussex and Surrey Police

Part A

'What', 'where' and 'when' of infrastructure requirements relevant to application reference to A/76/20/PL

TOPIC	INFRASTRUCTURE REQUIREMENT	AREA	COST PER ITEM	QTY	TOTAL COST		TIMING OF DELIVERY (Occupations)
Policing	Officer start-up equipment cost	Angmering NPT	£4,307.33	0.227	£977.76		TBC
Policing	Officer start-up recruitment and training	Angmering NPT	£5,460	0.227	£1,239.42		TBC
Policing	Staff start-up equipment cost	Littlehampton	£2,086	0.155	£323.33		TBC
Policing	Staff start-up recruitment and training	Littlehampton	£1,060	0.155	£164		TBC
Policing	Premises	Littlehampton			£8,975.03		TBC
Policing	Fleet	Angmering NPT			£2,869.44		TBC
Total					£14,548.98

Appendix 1 – Jelison Ltd vs Secretary of State and Local Government (1) Hinkley and Bowsorth District Council (2) – 22/11/2016 (paragraphs 71-81)

Appendix 2 – Examples of appeal decisions supporting police contributions

- APP/R3705/W/18/3196890 – Land to the south of Tamworth Road and to the west of the M42, Tamworth, B78 1HU
- APP/C3810/W/17/3187601 – Land west of Church Lane and south of Horsemere Green Lane, Climping, West Sussex, BN17 5RY
- APP/R3650/V/17/3171287 – Dunsfold Park, Stovolds Hill, Cranleigh, Surrey, GU6 8TB
- APP/R1845/W/17/3173741 – Land off The Lakes Road, Bewley, Worcestershire, DY12 2BP
- APP/C3105/W/17/3172731 – White Post Road, Banbury.
- APP/C3105/W/16/3163551 – Land off Howes Lane and Mid dleton Stoney Road, Bicester, Oxfordshire
- APP/C3810/V/16/3143095 – Land east of Fontwell Avenue, Fontwell, West Sussex, BN18 0SB
- APP/E3715/W/16/3147448 – Land at Ashlawn Road West, Rugby, Warwickshire
- APP/C3240/W/16/314445 – Land east of Kestrel Close / Beechfields Way, Newport, Shropshire
- APP/K2420/W/15/30004910 – Land off Sherbourne Road, Burbage, Leicestershire
- APP/G2435/A/14/2228806 – Money Hill, Land North of Wood Street, Ashby-de-la-Zouch, Leicestershire
- APP/X241-/W/15/3007980 – Land rear of 62 Iveshead Road, Shepshed, LE12 9ER
- APP/T3725/A/14/2221613 – Land at the Asps, bound by Europa Way (A452) to the east and Banbury Road (A425) to the west
- APP/T3725/A/14/2229398 – Land South of Gallows Hill / West of Europa Way, Heathcote, Warwick
- APP/G2435/W/15/3005052 – Land South of Greenhill Road, Coalville, Leicestershire
- APP/Q3115/A/14/2222595 – Land north of Littleworth Road, Benson
- APP/A2470/A/14/2222210 – Greetham Garden Centre, Oakham Road, Greetham, Oakham
- APP/A2470/A/14/2227672 – Land to the rear of North Brrok Close, Greetham, Rutland
- APP/L2440/A/14/2216085 – Land at Cootage Farm, Glen Road, Oadby, Leicestershire
- APP/Y2430/A/14/2224790 - Land to the east of Nottingham Road, Melton Mowbray, Leicestershire
- APP/2460/A/14/2213689 – Land rear of 44-78 Ashby Road, Hinkley, Leicestershire
- APP/K2420/A/13/2208318 – Land surrounding Sketchley House, Watling Street, Burbage, Leicestershire
- APP/F2415/A/14/2217536 – Land off Fairway Meadows, Ullesthorpe, Leicestershire
- APP/K2420/A/13/2202658 & APP/A/13/2210904 – Land off (to the south of Spinney Drive and land off (to the east of) Brookside, Barlestone, Leicestershire
- APP/H1840/A/13/2199085 & APP/H1840/A/13/2199426 – Land off Pulley Lane, Newland Road and Primsland Way, Droitwich Spa

Appendix 3 – The Queen (on the application of The Police and Crime Commissioner for Leicestershire) vs Blaby Council and Hallam Land (and other developers).

Appendix 4 - North-west Leicester District Council vs Money Hill Consortium – Money Hill, Land North of Wood Street, Ashby-De-La-Zouch (paragraphs 61-63)
