Please upload the ADC Arboricultural Officer's consultation response onto Ocella for A/81/18/RES.

Thanks,

Michael

Michael

I have considered the latest Proposed Site Layout, dwg no: Ang101 Rev O - the only substantive submission with potential to affect the ongoing health and vitality of retained trees, since I last commented (see previous report, August 9th).

While thankfully the new layout does not attempt to impact further on the retained tree population; it does not allow for the retention of a greater number of trees and therefore I am unable to provide further comments of substance or remove my Objection in principle.

Regards,

Mark
