Subject: A/82/12 139 houses

I am so concerned about the housing plan that has been put forward. Our quality of life is to be eroded further with this plan. Coming out onto round stone Lane will be a complete nightmare and gridlock the village and affect the shops. We don't all want to shop in superstores and can't all drive to get there. Round stone Lane onto the A259 roundabout is already impossible to get out at peak times as is the bypass. Although money will be available towards the dualling of the A259 we all know there is not the full amount to make this happen. What about the overcrowded schools medical centers and hospital. You must realise they are unable to cope now. A small pot of money from the developer is not going to improve the situation. The added pollution is a serious health hazard and a destruction of a village. Flooding and drought alternately make this a non viable housing plan even though the developer has spent two years planning it applied for a site hut and started clearing the site. Is there no one to listen to the real concerns of the villagers. Please help us to preserve our quality of life. Maureen and Rodney Stansfield
