I want to make my feelings known regarding the proposed Development East of Roundstone Lane, Angmering for the following reasons.

- I. Critically the proposed development fails to comply the ADC endorsed plan.
2. Construction will be carried out on a greenfield site rather than a brownfield site and is against current policies. There is already more than enough housing to meet current and future needs. There may be negative effects on water flows, greater flooding is a possibility.
3. I am concerned about the lack of sufficient medical facilities locally; it takes over a week to see a doctor, unless it is an emergency.
4. New schools may be required to serve a growing population. Also the development may cause pressure on local jobs.
5. The development will destroy the current balance between built and un-built environment.

To conclude the whole plan is way above what is needed. I personally am quite happy to keep Angmering as it is.
