Subject: A/82/12 139 house

Once again our patience is being put to the test regarding theses houses.

My first argument is why, these houses are spoiling our beautiful village, the increase in traffic on the roads which have not been built for. All the areas have a problem with flooding and I would have thought with weather we have had this year would have told you this is not the area to be built on. Who are the houses for, certainly not the youngsters here in Sussex as there is no real careers for them to allow to pay the mortgages, we know why, to house persons from abroad who gave given nothing to this country but we seem to bow down to them rather than our own.

There is no schooling, hospitals and GPs to cater for the amount of people who supposing will come to live. Surely you must realise this a small country and we are being flooded by housing, we soon will have no countryside/coast to enjoy. There will be so much destruction to the countryside which we should be allowed to enjoy.

I/we wish you would seriously reconsider your application.

Regards

Janet Johnson
