Subject: Objection to planning application A/82/12

I wish to register my objection to Barratt's revised planning application A/82/12 for 139 houses, for the following reasons:

The proposed development is contrary to the ADC-endorsed masterplan

It is contrary to Arun's policies to build on brownfield sites.

It would result in further significant traffic problems in what is an already congested area – in particular traffic on the A259 and traffic passing through Angmering village on a road which has dangerous and accident-prone pinch-points.

There is no proposed link road between Roundstone and the A280.

It would be perverse for Arun to decide on this application while their own plan and the Angmering draft neighbourhood plan are not finalised.

Further and unsustainable pressure on currently inadequate infrastructure and services – eg schools, transport services, medical services, drainage and water supply....
