SPECIFICATION
Forestry Commission Practice note 8.
All native species should be of local stock. Native trees and shrubs certified as British Native plant stock.
All planting stock should comply with the Horticultural Trade Association National Plant specification.
All planting preparation, handling, planting & maintenance should be in accordance with CPSE Code for Handling and Establishing plants.
All trees and shrubs to comply with BS 3936 Part 1 1992, planted to BS 4043:1989 and BS 4428:1989.
All works generally, to comply with the written Soft Landscape Specification.
Topsoil incorporated into planting beds to be gently mounded towards the centre of each bed to allow for settlement.
On completion of planting the whole area of the shrub bed shall be mulched with 75mm consolidated thickness of medium textured decorative grade natural pine bark having first been prepared in accordance with the specification.
Free standing hedges shall have a 3 strand galvanised wire and tanalised softwood timber post fence, to BS 1722-2:2000, erected along a line between the two rows of hedge plantls.
All existing trees and hedges to be protected in accordance with BS5837:2012 for the duration of the construction period.

Existing vegetation to be retained

Existing hedgerow to be trimmed back to 4m width and maintained as a native hedgerow

Proposed tree planting within soft landscape. See detail on dwg

Proposed tree planting within hard landscape. See detail on dwg 21-22

Proposed specimen shrub planting

Proposed climbing plants to be trained up adjacent wall/ fence/per gola with galvanised wires and hook set 250mm apart with support canes removed prior to planting

Proposed hedge planting to be planted in a double staggered row 1500mm apart and at 500mm centres in each row and maintained at 1m theight

Proposed shrub planting

Proposed shrub planting to be maintained as a clipped rectangular form at 50cm height

Proposed bulb planting

Proposed grass areas to receive good quality amenity grass turves laid in line with good horticultural practices

Proposed wildflower grassland to be seeded with a combination of WFG18 Butterfly and Honey Bee and WFG7 Free Draining Soils wildflower seed mix as supplied by BSH. Shaded areas to be seeded with WFG8 wildflower seed mix by BSH or similar and approved.

Tree Planting Pit Detail within Soft Landscape

Root Rain Metro tree pit irrigation system as supplied by Green-Tech Industries or similar and approved

Pressure impregnated softwood stakes driven into ground with a minimum of 400mm below ground

The tree should be positioned in the hole so that the top of the rootball is level with the surrounding ground level

Backfilled material to be either originally excavated soil or imported soil to BS3882:2007. If judged to be of poor quality then suitable well rotted organic matter must be added. To be backfilled in layers of 300mm, each layer to be lightly firmed in with heel, to exclude large voids

Wire cage to be left on, and folded back/cut away around stem, if rootballed.

Rubber belting and spacer block attached with galvanised nails as supplied from Green-Tech Industries or similar and approved with tie height 1/3 stem height

Good quality, well rotted mulch to be applied to a minimum of 75mm depth, and no more than 150mm, leaving the stem base clear and mulch free

Tree pit to be no deeper than rootball, 600mm larger than rootball on all sides, and should be square with sides and base of pit to be forked over

All components as sup-plied from Green Leaf or s imilar and approved
