One day we'll all have solar...

Maybe you've considered solar power for your home, but worried about the look, the cost or the hassle?

If so, your worries are over. Sunstation is a breakthrough system that blends in beautifully, is highly affordable and involves no roof-cutting whatsoever.

It's installed by our trusted installers and usually takes just a single day for you to be up and running. From then on, it just sits there quietly saving and making you money.

So now is the time to go solar. Gain control of your electricity bills, and invest in the energy future.

...Why not today?

solarcentury

Introducing...

SunStation
from solarcentury

Sunstation is the solar you've been waiting for – great-looking, affordable and utterly reliable.

Forget about ungainly solar panels. Sunstation is a great-looking system that blends in beautifully, so that you're proud to have it on your home.

In fact, if you're looking to upgrade your house, this is one of the quickest and most painless ways.

- ✓ It sits flush with your roof tiles, not on them – so it's a seamless part of the roof itself.
- ✓ The framework is hidden, integrated into your roof.
- ✓ It's black and sleek – so it blends in and your house looks as good as ever.

Quick and easy installation

Good news – installing Sunstation can usually be done in a single day. That's because there's no major surgery involved.

There's no cutting into the roof; we simply remove the very top cover and replace with Sunstation.

First, your installer will remove the tiles or slates just in the area where the solar is going to be positioned.

The solar panels are fixed directly to your roof battens, replacing the tiles or slates, acting as the waterproof barrier. No other part of the roof is removed or cut into.

A perimeter surrounds the whole solar installation to ensure it's safely embedded. No drama and no disruption – just a quick, painless process.

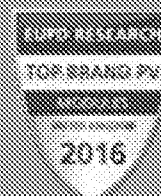

And it's self-cleaning, so no extra maintenance required.

Guaranteed to last

Your Sunstation comes with a 10-year product warranty and a 25-year power warranty. That's how confident we are of its quality.

- ✓ It's designed by one of Europe's top solar innovation teams, for a company that's won multiple awards.
- ✓ It's been designed with expert input from structural engineers, to installers and architects.
- ✓ Our engineers have worked tirelessly to make every component to the highest standard.
- ✓ Prototype after prototype has been tested against extreme weathers. So you can relax in the knowledge that you have a solid and robust system.
- ✓ Sunstation is manufactured by JA Solar who is among the top recommended brands in Europe and recently received the "Top Brand PV" seal of approval.

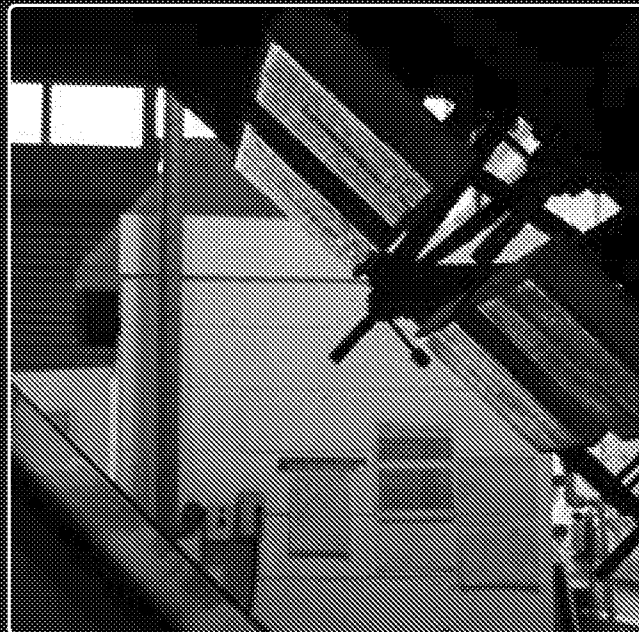

Tried and tested

Sunstation is tested and certified to the same industry standards as the roofing it will replace, and has been designed to perform as well as conventional tiles and slates.

Of course, it's also tested against demanding international standards set for any solar product.

Wind tested

Fire tested

"Great-looking solar is now available for people who want to generate their own electricity and reduce their energy bills, whilst maintaining the character of the home.

"If you've been put off by traditional solar panels before, your worries are alleviated. We are fussy about the detail of our home that my wife designed but Sunstation does not compromise the clean lines. Installing Sunstation also allows us to do our bit for the environment, and be thrifty."

About Solarcentury

As one of the world's largest and longest established solar companies, Solarcentury has already helped over 25,000 homeowners to reap the rewards of solar.

Founded in 1998, we've been around since the early days of the industry and have played a major part in making solar PV the attractive investment it is today. As a result, we're not only one of the longest-standing companies – we're also one of the most trusted and respected.

Our experience is unmatched: we've put solar on more types of roofs than any other company out there, and have won multiple awards for our attractive and inventive solar products.

And this isn't just our business, it's our mission. Our commitment to making solar accessible is deep-rooted and long-term, and our solidly-established company is growing steadily worldwide.

We're proud to introduce Sunstation to you.
