Hi Ian,

In response to the EHO's comments:

- The original SI was done in 2015, but the GEA report is dated 2018. This is because originally, the land to the north and south of Water Lane was investigated as a single package. Later on, the developer decided to split the development into two separate planning applications and asked us to split out the reports for each parcel accordingly.
- A letter report detailing the winter water level monitoring is attached. This was carried out chiefly to support the surface water drainage strategy for the site.
- The EHO's note does not make any reference to the *Remedial Method Statement* report that has been prepared by us on behalf of Cala Homes for the site (ref: RMS-22115-21-341Rev A dated 14 April 2022). This document should answer the remaining queries.

Best regards,
Lisa

Hi Lisa

Please see attached objection from the EHO. Would you mind having a review and letting me know next steps pls?

Best regards

Ian

Hi Ian,
Here's the letter report you were after.
Best regards,
Lisa
