Environmental Health Advise,

I have had the below lengthy correspondence with Cala Homes and therefore cannot discharge the condition at this time;

Thanks

Matthew Kennett

Cc: David Innes; Lucy Harding
Subject: RE: 27621 R06 - Post remediation validation report - Phase 1A - Condition 8

Hi James,

My understanding is the condition had been varied to from *no commencement* to *prior to occupation*. I noticed that the change of condition application [A/219/16/PL](#) is still undecided. Lucy Harding in the planning department is aware and will get this changed.

From a planning perspective I don't think a partial approval can exist because the condition is not split into parts (I have the original pasted the condition below for clarity). From an Environmental Health perspective, we have no issue with the development commencing as we understand that validation of voids and finished gardens requires the development to be near completion. The planned validation works in the above mentioned report are also acceptable.

Prior to commencement of development, a verification report demonstrating completion of the works set out in the approved remediation strategy and the effectiveness of the remediation shall be submitted to and approved, in writing, by the local planning authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met. It shall also include any plan (a "long-term monitoring and

maintenance plan") for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action, as identified in the verification plan, and for the reporting of this to the local planning authority.

Reason: To protect the environment and prevent harm to human health by ensuring that the remediated site has been reclaimed in an appropriate standard in accordance with Arun District Local Plan policy GEN7.

Thanks

Matthew Kennett

Subject: FW: 27621 R06 - Post remediation validation report - Phase 1A - Condition 8

Hi Matthew

Just looking at your response to RSK below regarding post remediation validation report. Given the fact that this is a no commencement condition, would you kindly consider a partial/conditional discharge for everything else except the ground gas condition. Validation testing can only take place when soft landscaping is completed on site and this will mean waiting until the final plot in phase 1a is completed. This might mean waiting another two to three months before this condition can be discharged

I hope my request makes sense and you may be able to reconsider your position on this particular condition

Kind Regards

Subject: RE: 27621 R06 - Post remediation validation report - Phase 1A

Hi David,

Once you have the final results please can you submit these as part of the discharge of conditions application. Section 4.2 of the report also mentions validation that the capping layers in the garden and soft landscaping is still ongoing within Phase 1A. Therefore I will stop looking at the document until the validations works have been done. I have spoken with David Inns who is also happy to wait.

Thanks

It has now come in as a discharge of condition application A/94/17/DOC and the formal consultation would have been sent to EHO yesterday. If you can review and let me know if it meets the requirements of condition 8. There may be additional information on the portal that accompanied the DOC.

Thanks

David

Subject: RE: 27621 R06 - Post remediation validation report - Phase 1A

Hi James,

The post remediation validation report for Phase 1A is complete and available to download from the following link, which shall be active for 6 days.

If you have any problems downloading the report for the attached link please let us know and we shall try sending via a different method.

Now that we have received formal instruction for the void monitoring we have made contact with the Local Authority. I left a message for him in between training today and Dave has subsequently spoken to him and sent the attached email. We are now waiting on confirmation that Matthew he is happy with the approach

once he has had a chance to look through the relevant guidance on this method as he has not come across it before. We shall keep you updated.

I have arranged for Craig to re-attend site on Monday to validate any/as many outstanding available garden plots as possible in one day and we shall be attending site on Wednesday also to check/remove the gas meter from plot 28 and complete any further gardens if available.

Unfortunately my colleague who was going to update the made ground drawing for Phase 1B following the additional of Phase 3 into this area was off ill today. Craig is going to arrange the updates to the drawing and issue to you tomorrow, apologies for the delay.

Kind regards,

Cathy
