Roof	
Description of existing materials and finishes (optional):	N/A
Description of proposed materials and finishes:	Outstanding insulation is provided by the construction of the roof. The roof deck is of one-piece construction and is impact resistant. It is covered with solar-reflective, profiled plastisol-coated galvanised steel to reduce heat gain. Internally, the polyester-coated galvanised steel ceiling is designed to prevent condensation problems and has a low-maintenance finish.
Windows	
Description of existing materials and finishes (optional):	N/A
Description of proposed materials and finishes:	The windows have PVC-U frames and are double glazed with low energy glass for optimum thermal performance. Draught and condensation problems are minimised by effective weather seals and the low thermal conductivity of the window frame and glazing materials. Windows in critical locations are glazed with toughened safety glass as standard with a variety of other glazing available as an option.* Titan buildings offer protection against theft and vandalism, with a wide range of security options.
Doors	
Description of existing materials and finishes (optional):	N/A
