Subject: Objection: A/99/17/OUT - Land south of Water Lane

Dear Sirs - I am writing to express my OBJECTION to the planned development.

The land is totally unsuitable for development particularly in relation to the springs and historical flooding. Householders have been subjected to flooding over the years and further development will only exacerbate the situation. Angmering is a beautiful village which is slowly being squeezed from all sides.

I live in Cumberland Close and feel that further development will cause major problems not only increasing the traffic down Water Lane and through the village but also the volume and flow of water following any development. The road is called Water Lane for a very good reason and I like others would not wish to experience further flooding.

I realise that developers do not concern themselves with any future flooding emanating from the houses they build and profit is uppermost on their agenda but I do expect the Council to act in a responsible way and decline any plans put forward by developers which might cause undue harm and damage to properties. After all council officers, like MPs in national governments, are elected by the public to safeguard the interest of local people and not large housing companies.

I reiterate that I STRONGLY OBJECT to any development that is being planned.

Yours faithfully
Frances Adcock
