Subject: Objection: A/99/17/OUT Land South of Water Lane

Dear sirs

With respect I object to this planning application

Angmering is a beautiful village and should remain that way.

Developments should be sympathetic to the area and in line with the local plan. This is NOT.

I normally agree with development , but this is in the wrong place.

Infrastructure in the village, that means roads, traffic, amenities , doctors, school places etc is not at sufficient levels to support a growing population on this scale.

You have not promised to resolve these issues for the village yet more development occurs .

Please please please listen to the reasons. Please have a level head when deciding on this. Ask yourself “do you understand why we object”.

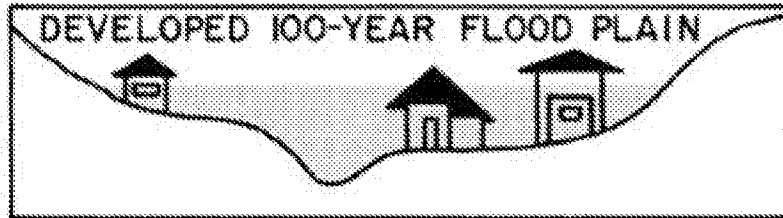

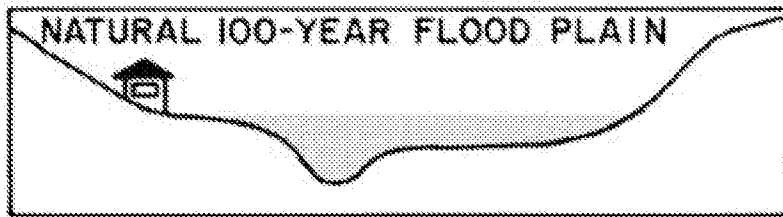

Don't make a decision because it is the easy thing to do. It moves the process along. It keeps the corporates happy. **Look what happened at Grenfell Tower. Failing your constituents, your people, will catch up with you one day.**

Be brave. Don't be a follower. Be a leader. For the people of Angmering.

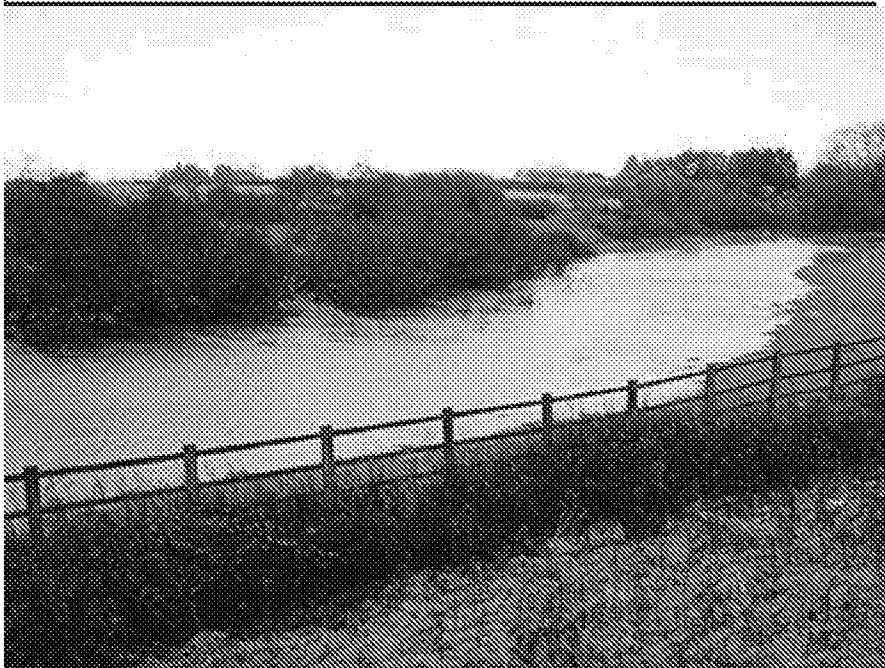

How on earth will you live with yourselves when the next flood comes and it destroys the homes of so many people who come to Angmering expecting homes on safe , flood risk free land.

Already I talk to those who have moved to the village to complain they can't get a doctor's appointment or because the school class is so big that pupils are suffering with teachers being spread too thin.

I urge the planning team to reject this application.

BUILDING ON FLOOD PLAINS INCREASES THE
RISK OF FLOOD HAZARDS
