Blackthorn Based 60/90cm Bare Roots Discounted Pack of 250 (Pre-order No 2018)

Price: £239.99 (including VAT at 20%)

Our Blackthorn Based Mixed Native Hedging Packs are predominantly Blackthorn ideal for heavy soils or coastal/exposed conditions. This mixed native pack is animal grazing areas as it does not contain any plants that are poisonous to livestock.

- 50% Blackthorn (*Prunus spinosa*)
- 10% Wild Cherry (*Prunus avium*)
- 10% Field Maple (*Acer campestre*)
- 10% Dog Rose (*Rosa canina*)
- 10% Hazel (*Corylus avellana*)
- 10% Hawthorn (*Crataegus monogyna*)

The hedging species that make up these mixed native hedging packs are ideal for paddocks, fields and gardens, with no plants that are poisonous to livestock and a range of species that provide year round interest and a diverse habitat for wildlife.

Bare root packs are available from November to mid/late May, using cold stored plants towards the very end of the season.

Our recommended mix for bare root native hedging is 50% Blackthorn for sandy soils or non-coastal/sheltered positions with 10% each of Wild Cherry, Field Maple, Dog Rose, Hazel and 10% Hawthorn. These species have been selected to provide a long period of interest for humans (in flower, berries, leaf colour, leaf shape) as well as varying wildlife foods and shelter.
