Dear Mrs R Dunnatt

In respect of the above address in which is at the bottom of my garden I am making a complaint to the application made to the summer house and extension to the shed to it!

The land which houses birds of prey to the conservation area seems to be being destroyed trees being cut down boundary fences seemingly getting wider and taking more pond area which is conservation. Bonfires which smell of plastic cables being burnt in which my family are breathing in! Washing smelling terrible on our washing line! The window looks in on our property it should be frosted! The sheds are unsightly to look at from our property as well as noise also I am very concerned that next step will be to build on this again which will ruin the beautiful bird/natural pond conservation viewing has been here for years! Also there is an unsightly caravan permissibly parked there.

I really hope that my views are understood by yourself

Yours sincerely

Adrian Skeites
