Phase I Environmental Assessment – Summary

Site Sensitivity

Geology and Hydrogeology	River Terrace Deposits		Secondary Aquifer (Class A)
	White Chalk Subgroup		Principal Aquifer
Source Protection Zone	No	Nearest Surface Water	Tributary of the Aldingbourne Rife ~200m north-west
Surrounding Land Use	Commercial properties are present to the north, east and west. A holiday park with static caravans is located to the south		
Environmental Sensitivity	Medium to high risk, primarily based on the Principal Aquifer present at shallow depths.		

Conclusions

The results of our assessment indicate the following:

- The site is located in an area of relatively high environmental sensitivity, primarily relating to the Principal chalk aquifer underlying the site at shallow depths. Surface water features are present within 200m of the site.
- Historically the site has been operated as a retail filling station. We understand that concrete filled fuel tanks are likely to be present under the site and, although decommissioned, the infrastructure and surrounding soils have the potential to act as an ongoing source of hydrocarbons. The workshop area currently on site may present an ongoing source through the storage of small quantities of chemicals or waste oil.
- Based on the information reviewed as part of our preliminary risk assessment we consider the site poses a moderate to high environmental risk.

Recommendations

We recommend that we undertake a Phase II intrusive environmental investigation at the site to determine whether significant impact of the underlying soils and groundwater at site has occurred.

1 Introduction

1.1 The Purpose of This Assessment

The site is located on Shripney Road in Bognor Regis and comprises a car sales and service centre. We understand that A&D Autos (Bognor) Ltd (A&D Autos) proposes to redevelop the site as a car repair workshop and MOT garage.

We have been commissioned by A&D Autos to carry out a Phase One Environmental Assessment (also known as a Preliminary Risk Assessment) of the site in support of a future planning application for the redevelopment.

The purpose of this assessment was to develop an initial conceptual site model of the site and establish whether or not there are potentially unacceptable risks to sensitive receptors from potential contaminants that may be present in the soil and/or groundwater under the site. We have not carried out any intrusive investigation of the site and have made no measurements of actual contamination levels that may be present.

Our environmental assessment was undertaken in accordance with the guidelines presented in the Environment Agency (2020) 'Land contamination risk management (LCRM)' documents and Environment Agency (2010) Guiding principles for land contamination (GPLC).

All the activities comprising this assessment were carried out in accordance with the procedures set out in our Quality Manual. Your attention is drawn to the Notice to Interested Parties included as Attachment One.

1.2 The Scope of This Assessment

Our assessment included:

- A review of geological, hydrogeological and hydrological information to establish environmental sensitivities at the site and in its vicinity;
- A review of environmental data from previous environmental works, if available;
- A review of available historical information to determine the historical use of the site and its immediate surroundings;
- Preparation of a report, outlining findings and recommendations, including requirements for any further work.

The findings and opinions in this review are based upon information obtained from the sources outlined above. Information obtained from third parties has been accepted at face value; we believe this information to be reliable but do not guarantee its authenticity. Where practicable the information provided was confirmed from a secondary source such as the review of available municipal records.

As the site is operated as a car repair workshop, we have not completed a site walkover inspection as part of this initial assessment, as we do not consider this would add to our conceptual understanding of the site at this time.

1.3 Previous Reports Relating to the Site

We do not hold, and have not been provided with any, previous reports relating to the site.

1.4 Proposed Development Plans

Proposed Developments	We understand that the site is to be redeveloped for use as car repair and MOT garage. A site plan showing the initial proposed site layout is provided below.
Active Planning Applications	At the time of writing this report, a planning application for the site's redevelopment had not been submitted.
Notes	We understand that this report is to be submitted in support of a future planning application for the site's redevelopment. Whilst our assessment has not been compiled to directly satisfy any specific planning conditions the information contained in this report may assist in satisfying any such requirements. We note however that further works may be required.

2 Desk Study Information

2.1 Site Description, Location and Setting

Site Description	The site is currently in use as a car sales and service centre. It comprising a sales office with integral workshop or car-wash area on the southern site boundary. A smaller building, possibly a storeroom is located on the northern site boundary. The remainder of the site is covered in hard standing and used for car parking/display. We understand that the site has been used as a retail filling station in the past.		
Grid Reference	494030 101181	Location	A 29 Shripney Road, ~1.5km north-north-east of Bognor Regis town centre
Elevation	~3m AOD		
Size (approx)	0.15 ha

2.2 Geology, Hydrogeology and Hydrology

	Geological Unit	Description	Estimated Thickness	Data Source
Drift Geology	River Terrace Deposits	Sand, silt and clay	<3m	British Geological Survey (BGS)
Solid Geology	White Chalk Subgroup	Chalk with flints	~470m	
Existing Investigation Data	The BGS hold records for the following boreholes: BGS ref. SU90SW21, constructed ~140m to the south-east of the site. This records underlying geology to comprise made ground and Brickearth to 1.2m, over chalk with flints to the base of the borehole at 240m below ground level (bgl). BGS ref SU90SW54, constructed ~320m north-east of the site. This records clay, classified as Brickearth, to 1.5m, over very clayey pebbly sand, classified as Raised Beach Deposits, to 2.8m, over chalk (rubbly, silty near top) to the base of the boreholes at 4.0m.			BGS

Table Four: Regional Geology

	Geological Unit	Aquifer Classification	Groundwater Vulnerability	Data Source
Drift Geology	River Terrace Deposits	Secondary Aquifer (Class A)	Medium - High	DEFRA
Solid Geology	White Chalk Subgroup	Principal Aquifer	-	
Existing Investigation Data	The BGS borehole SU90SW21, referenced above, recorded groundwater strike at 2.37m with rest level at 2.51m below ground level. The BGS boreholes SU90SW54, referenced above, recorded no groundwater strike			BGS

Table Five: Regional Hydrogeology

	Description	Distance	Direction	Data Source
Surface Water Features	Unnamed stream/drain flowing west into Aldingbourne Rife	~200m	North-west	Ordnance Survey
	Aldingbourne Rife, flowing south-east	~350m	West	
	Unnamed stream/ditch flowing north-east into Lindsey Rife	380m	South-east	
	Lindsey Rife, flowing south	~620m	South east

Abstraction	Surface Water			Groundwater
	Distance	Direction	Purpose	
Nearest	~400m	W	Spray irrigation (from Aldingbourne Rife)	None recorded within 1km
Nearest Public Water Supply	None recorded within 1km			
Source Protection Zone	The site does not lie within a designated Source Protection Zone			
Site located in an Environment Agency defined 'Drinking Water Safeguard Zone'			Surface Water	No
			Groundwater	No
Data sourced from Environment Agency				
Table Seven: Nearest Surface and Groundwater Abstractions				
2.3 <u>Site History</u>				
2.3.1 <u>Review of Historical Ordnance Survey Maps</u>				
Date	Review of Map – Description of Land Use at Site and in the Immediate Surrounding Area		Potentially Contaminative Land-use	
			On-site	Off-site
1877, 1879, 1898, 1912, 1941	The site is located on undeveloped agricultural land. Shripney Road runs north/south close to the eastern boundary of the site. Aldingbourne Rife flows north to south ~250m west. A railway runs north-east to south-west ~400m to the east. Farm buildings are shown ~100m north, ~300m north-east and ~300m south-east.		None identified	None identified
1932	Site remains undeveloped. A row of detached houses with gardens have been developed ~100m south along Shripney Road.			
1940	Shripney Road has been widened to form the A29 dual carriageway			
1950	The site has been developed with 2 buildings, one on the southern site boundary and a small building on the northern site boundary. A nursery is marked west of the residential properties to the south		Possibly garage / filling station	Factory
1961	An additional structure, possibly a canopy is shown on the eastern site boundary. A factory is shown ~300m south east. Additional detached houses shown to the south-west. With a caravan site to their west.

Date	Review of Map – Description of Land Use at Site and in the Immediate Surrounding Area	Potentially Contaminative Land-use	
		On-site	Off-site
1975 / 1976	The site is labelled as a garage with a large building on the southern boundary, with a structure possibly a canopy to the east, and smaller building to the north, labelled Silver Birches. A 'works' building has been constructed to the immediate west of the garage building. A caravan park is present to the north, east and south of the site. The land to the immediate east of Shripney Road has been developed with large buildings likely to be commercial. An additional factory is present ~200m south-east.	Garage and/or filling station	Works and factories
1980/1989	No changes to the site. The buildings to the east of Shripney Road are labelled as a warehouse and a number of 'works'.		
1991	An electricity substation is shown on the northern site boundary. Further commercial development has occurred to the east of Shripney Road		Electricity substation, works and factories
1993 / 1994, 1996 / 2020 / 2022	The Silver Birches building on site is no longer present. The garage remains. A large building, likely to be commercial is shown to the north east of the site.		

Copies of each historical map are included as Attachment Two

Date	Application Number	Local Planning Authority – Planning Records (from local planning authority website)	Evidence of Development
Records for applications made prior to 2005 contain only basic information, including date and title. No plans or details are available. 33 additional applications are recorded as 'permitted' or 'approved', dating from 1950 to 1990, including the following:			
20/7/1990	BE/102/90	Installation of new petrol tanks and associated pipe work to replace obsolete equipment and alteration to existing canopy	No detailed information available for proposed development.
6/04/1988	BE/24/88	New double garage with access pit for car valeting	
24/06/1985	BE/46/85	Extensional wall opening new diesel pump island raise existing forecourt	
17/06/1959	BE/3/59	2 underground petrol storage tanks	

Table Nine: Summary of Online Planning Records

2.3.3 Information Provided by the Petroleum Officer

Petroleum Officer Data Search	We have contacted the Petroleum Officer to request details relating to the former petroleum installation at the site. Based on their records they provided the following information about historical petroleum infrastructure at the site (also in attachment Three): Records show there where nine ~90,900L Tanks at the site, all of which were installed prior to 1950. The nine tanks were decommissioned by concrete slurry fill in July 1997. There are no records on file of the tanks being made safe or removed subsequently.
-------------------------------	---

Table Ten: Information Provided by Petroleum Officer

2.3.4 Review of Permits and Regulatory Actions

Date	Licence Number	Details	Issuing Authority
16/12/1991	1877	Local Authority Air Pollution Control permit for PG1/Waste oil burners. Revoked.	Arun District Council

Table Eleven: Current or Past Permits or Licences

Date	Details	Data Source
N/A	We have not identified any pollution incidents to controlled waters associated with the site or the immediate surrounding area (<300m).	Environment Agency

Table Twelve: Pollution Incidents and Regulatory Actions

Client: A&D Autos (Bognor) Ltd	Phase I Environmental Assessment Report	Report	IN22719 CL 001
		Date	March 2022
		Page	11

2.3.5 Anecdotal Information / Other Historical Information

We understand that the site was formerly used as a retail filling station and that concrete-filled fuel storage tanks remain present under the site.

2.4 Additional Information

Flood Risk Zone	Flood Risk	Data Source
Zone 1	The site lies within Flood Zone 1. Land and property within a Flood Zone 1 are defined as having a low probability of flooding. On this basis, and as the site is smaller than 1 hectare, a flood risk assessment is not likely to be required as part of future planning applications.	Environment Agency

Table Thirteen: Preliminary Flood Risk Assessment

Risk	Description	Data Source
Radon Risk	The site is located in an area where the National Radiological Protection Board have determined that <1% houses exceed the recommended Action Level for radon for existing homes in the UK of 200Bqm ⁻³ (averaged over a year). No radon protective measures are necessary in the construction of new dwellings or extensions.	Public Health England
Nearest Landfill	The Environment Agency records show that there are no current or past landfill sites within 250m of the site.	Environment Agency
Degradation of spilled or leaked petroleum hydrocarbons	The site has previous been operated as a retail filling station giving rise to the potential for hydrocarbon impact of shallow soils and / or groundwater	Planning records
Natural Geology	Near surface geology comprises a thin layer of River Terrace Deposits. These are underlain at shallow depths by chalk which will have a high carbonate content and is therefore considered a potential source of carbon dioxide. However, concentrations generated by chalk alone are not likely to pose a significant risk to site users.	BGS
Conclusions	We have identified potential sources of hazardous ground gases associated with the site, primarily associated with the sites use as a retail filling station and workshop. The site therefore may be to be at-risk of impact from concentrations of hazardous ground gases. Assessment of ground gasses should be consider as part of any further investigation at the site.

3 Outline Conceptual Site Model and Preliminary Risk Assessment

We have used the information presented in the previous sections of this report to create an outline Conceptual Site Model for the site. We have reviewed potential contaminants and their receptors together with any possible pathways that may link them. The resulting potential contaminant linkages are summarised on the following page.

Client: A&D Autos (Bognor) Ltd	Phase I Environmental Assessment Report	Report	IN22719 CL 001
		Date	March 2022
		Page	13

**Bognor Garage and Car Sales,
Shripney Road, Bognor Regis,
PO22 9NJ**

SUBADRA

Environmental - Geotechnical - Laboratory - Foundation

Contaminant	Pathway	Receptor	Viable Potential Contaminant Linkage
Site has historically been used as a filling station and garage. Potential sources include the former underground fuel infrastructure, such as tanks and lines, and historical surface spills. Made Ground is likely to be present at the site and may also constitute a potential source of contamination	Ingestion and dermal contact	Site workers	No - site covered with hard standing; this will act as a barrier and mitigate risk of impact
	Permeation of contaminants into drinking water supply service pipes		Possible - subject to the concentrations of hydrocarbon compounds present in shallow soil and/or groundwater
	Volatilisation of contaminants to indoor/outdoor air (either direct from soils or dissolved in groundwater)		Possible - subject to concentrations of any volatile contaminants in shallow soil and/or groundwater
	Off-site migration of contaminant: volatilisation to indoor/outdoor air (vapours from on-site soils or via lateral migration of dissolved compounds)	Commercial properties to the immediate west	
	Downward migration of contaminants to groundwater	River Terrace Deposits - Secondary (A) Aquifer	
		White Chalk Subgroup - Principal Aquifer	Possible - saturated chalk likely to be present at shallow depths below the site
	Off-site migration of contaminants dissolved in groundwater leading to direct impact of environmental receptors	Unnamed stream ~200m and Aldingbourne Rife	Possible - subject to concentrations of any volatile contaminants in shallow soil and/or groundwater
		Surface water abstraction ~400m west	Possible - although risk is mitigated by the distance between the site and the abstraction
		The Brooks, Local Nature Reserve	Unlikely - the nature reserve is associated with Aldingbourne Rife, upstream of the site
Hazardous Ground Gases - potential sources identified	Migration and accumulation of hazardous ground gases in shallow soils beneath the site	Site workers	Possible risk identified - primarily subject to concentrations of any contaminants in shallow soil and/or groundwater
Table Seventeen: Preliminary Conceptual Site Model			

Client: A&D Autos (Bognor) Ltd	Phase I Environmental Assessment Report	Report	IN22719 CL 001
		Date	March 2022
		Page	14

4 Conclusions and Recommendations

The results of our assessment indicate the following:

- The site is located in an area of relatively high environmental sensitivity, primarily relating to the Principal chalk aquifer underlying the site at shallow depths. Surface water features are present within 200m of the site.
- Historically the site operated as a retail filling station and more recently as a car sales and repair workshop. Planning records and historical maps suggest the site was initially developed as a filling station circa 1950. We understand from the petroleum officer, that nine tanks were previously recorded as being installed at the site (prior to 1950), they were concrete filled in 1997, likely when the site stopped trading as a filling station.
- We are not aware of any environmental site investigation works that have been completed at the site and we have not received any information relating to the condition of underlying soils and/or groundwater under the site.
- We consider the previous petroleum installation and workshops to represent a potential source of contamination at the site. The fuel tanks are considered likely to be present under the site and, although decommissioned, the infrastructure and surrounding soils have the potential to act as an ongoing source of hydrocarbons.
- The workshop area currently on site may present an ongoing source through the storage of small quantities of chemicals or waste oil.
- Based on the information reviewed as part of our preliminary risk assessment we consider the site poses a moderate to high environmental risk.

Table Eighteen: Conclusions

We recommend the following:

- We undertake a Phase II intrusive environmental investigation at the site to determine whether significant impact of the underlying soils and groundwater at site has occurred.

Your attention is drawn to the Notice to Interested Parties included as Attachment One.

LIMITED

Report	IN22719 CL 001
Date	March 2022
Page	Attachment One - 1

NOTICE TO INTERESTED PARTIES

The purpose of our work is to provide general information on the environmental and/or geotechnical conditions existing at the site and related to soil and/or groundwater. The Client or others specified the scope of the investigation and the validity of our conclusions is limited by the scope of work specified. We are not responsible for any such limitations or omissions.

Where stated in this report, we have used information supplied by third parties. While we have evaluated as far as possible the validity of this information, we cannot guarantee its accuracy in any way whatsoever.

No investigation technique is capable of completely identifying all of the contaminants that might be present in the soil or groundwater under a site. Where specified in our report, we have examined the ground by constructing a number of boreholes and/or trial pits. We recovered samples of soil and/or groundwater from available exposures.

The depth and spacing of our Sampling locations were selected to ensure with a reasonable probability that they would be representative of the actual conditions across the whole site. However, safety considerations relating to existing site infrastructure may have restricted our ability to investigate all potential contaminant sources. Specifically, we were unable to investigate the soil and groundwater condition immediately adjacent to the underground structures and/or buried services. These limitations must be borne in mind when considering the conclusions reached in this report.

Soil is intrinsically variable and the spread of contaminants within the soil is therefore subject to a degree of non-uniformity. For these reasons no sampling technique can completely eliminate the possibility of obtaining samples that are not representative of the actual conditions. Our sampling techniques are intended to reduce the possibility to an acceptable level, within the limits imposed by the scope of the investigation.

Groundwater levels and soil vapour levels that we report were accurate at the time of the investigation. Groundwater and soil vapour levels are variable. Long term monitoring may be required to ensure that the levels recorded during our investigation are representative of long term and possible 'worst case' conditions. In accepting our recommendations and/or conclusions the Client acknowledges that further, more detailed investigation would allow a more accurate assessment of site conditions to be made and that this would reduce any consequential risk to the Client.

Our investigation was carried out to assess the significance of contamination resulting from use of the site as identified in this report. Unless we have indicated otherwise, no assessment of the potential impact of any other previous uses has been made. No investigation was carried out to determine whether or not any deleterious or hazardous materials (such as asbestos) have been used in the construction of the buildings present on the site. Unless otherwise stated no investigation or assessment has been made of the presence or otherwise of invasive plant species including but not limited to Japanese Knotweed.

Unless specifically stated otherwise, we have not assessed the effect of any proposed future construction activities on existing structures on or near to the site. Nor, unless stated otherwise, have we assessed the likely effect of trees on existing or proposed structures on or near the site.

We do not accept any responsibility for the cost of remedial works or other costs incurred in whatever way whatsoever as a result of any omissions, errors or other shortcomings in this report unless we have been given reasonable opportunity to verify ourselves that such faults exist and we have been given a reasonable opportunity to carry out works to remedy such faults ourselves using the most practicable means available to us. We do not accept liability for any consequential losses incurred by you while either we or others carry out any remedial works we deem necessary.

This report has been prepared for the Client, as specified on the cover page of this report. In accepting our recommendations and/or conclusions the Client accepts that the terms of our appointment were as detailed in the Proposal, or Proposals, that we provided to the Client before being appointed and that these terms supersede any other terms and/or conditions set out in any contracts agreed between ourselves and the Client, regardless of when such terms and/or conditions were agreed to by us and/or signed by us.

Use of, and reliance on, this report by other third parties will be at such third parties own risk, and we do not accept any liability or responsibility to them.

Neither the whole nor any part of this report, or any reference to it, may be included in any published document circular or statement or published in any way without our prior written approval.

This report and its contents, together with any supporting correspondence or other documentation, remain the property of Subadra Consulting Limited until paid for in full. The copyright to this report remains vested in Subadra Consulting Ltd at all times.

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client. In this datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Hello Gill,

Please see information below

SR No. 383925

Licence number 452002

Health and Safety at Work etc Act 1974

The Petroleum (Consolidation) Regulations 2014

Dangerous Substances and Explosive Atmospheres Regulations 2002

Public Health Act 1961

History Enquiry at J A Challis, 'Bognor Garage, Shripney Road, PO22 9NJ

Further to your recent enquiry relating to the history of the above site

Details of the tanks:

Licence number 452002

The tanks were installed pre 1950, there were 9 tanks (90900 L).

They were concrete slurry filled in 07/1997

We have no information that they have been removed or made safe.

Please note that although West Sussex County Council makes every effort to ensure that the information provided is accurate,

we cannot be held responsible for any error or omission in the data provided.

If I can be of any further assistance please do not hesitate to contact me.

Yours faithfully

Jackie Richmond

Subject: PO Search - A & D Autos, Bognor Regis

Good Morning

We have been asked to carry out an Environmental Investigation at the following site and wondered whether this came under your area:-

A & D Autos
Steyping Way
Southern Cross Industrial Estate
Unit 3 Oldlands Way
Bognor Regis
PO22 9SE

If this does it would be appreciated if you could confirm what action we need to take to have the attached form completed. For your reference I have also attached a site plan but should you require anything else please do not hesitate to contact me.

Kind Regards

Gillian Cameron
