Land West of New Barn Lane, North Bersted

Dear Ed,

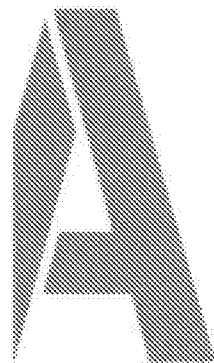

I am writing to confirm that the parameters approved under BE/142/15/OUT in respect of land use, building heights and green infrastructure remain unchanged by the Section 73 Application that is being made in respect of minor amendments to proposed access. Since the principles of land use, building heights and green infrastructure are unaltered by these amendments, we propose that the Design and Access statement does not require updating for the proposed Section 73 amendment that you are making.

Your sincerely

Graeme Phillips
