Landscape Strategy

Parking areas will be surfaced in Keyblock concrete block paving and pedestrian areas in small elemental concrete paving units. (Tegula)

Kerbs will be Conservation kerbs in a contrasting colour to the paving. Rear garden boundaries will be defined in 1.8m high close boarded fencing, with front gardens contained by hedge planting to the back of footpath.

Rear gardens will be turfed, and front gardens planted with trees, hedges, shrubs and ground covers, and grass where shown. The planting will contribute to the residential character of the street scene, and has been designed to promote a low maintenance regime that requires minimal attendance and watering once established. Tree planting is limited, but will be of sufficient clear stem height to ensure that the canopy is above eye level, and the species has been selected to be of a suitable scale for its location.
