Comment from Greenspace

The landscape information contained within landscape proposals LIN22251 11D Sheets 1-6 is detailed and provided in sufficient detail re species choice, quantities, planting densities and size at time of planting. I am pleased to see that detail has been proposed for the tree pit formation with the incorporation of tree support components such as those supplied by GreenBlue Urban or similar. With the employment of such systems and adequate aftercare support the trees should be given a good chance to establish and flourish. It is encouraging to see the specification of root barriers where there are trees in conjunction with SuDS features, these are to be encouraged and should be beneficial in the long term establishment reducing root inclusion conflict.

The play area details contained in Dwg PLAY AREA PROPOSAL LIN 22251 20 SHEET 1 and 2 have outlined the play offer to be incorporated within this development with LEAP and LAP facilities, these would appear adequate in provision with note that ROSPA or similar body should be consulted re their positioning in proximity to the SuDS feature.
