Subject: BE/30/19/PL

Dear Mr Davis

I write in reference the above planning application that was submitted to you on 28th February 2019.

The application is for the retention of secure containers, welfare facilities & secure fencing together with associated landscaping works.

This is in direct response to the alleged breach of planning reference BE/79/17/PL from the same company.

Containers have remained on site since November 2018, although sometimes changed in size, and the fencing has been in place since early January 2019.

However the landscaping works that have not been given any permission to commence have already begun, and indeed commenced after this planning application was in place. No mention of a bund formed part of BE/79/17/PL.

It had been previously advised to the applicant that no further works should take place on site until the necessary permissions had been granted.

Yet a bund to the south eastern edge of immeasurable size has been created in just under two weeks. The spoil has been delivered onto site using the applicant's grab vehicles - making many trips each day.

In placing this bund the shrubbery and hedgerow from around edge of the site has been excavated to accommodate this bund.

As it is now the season for breeding birds their refuge is being extinguished by these works.

Temporary fencing around the edge of the site has also been erected.

There is a storage bin visible on site that is storing waste at this present time.

Yours sincerely
