REF: ENGINEER'S REPORT

We write, firstly, in reference to the report submitted by Laura Gibbons reference the watercourse and surface drainage.

We would like it to be known to all concerned that the bund in question began to be created in the week commencing 4th March 2019 although material had been previously brought onto site and stored within and still continues to date to be brought onto site.

REF: ECOLOGY REPORT

With reference to this report the tree in question has been subjected to the the creation of the bund around it thereby creating a disturbance to the bat roosting potential of this tree.

The works have commenced within the bird breeding season.

It is a great shame to note that a company with a green ethos of reduce/reuse/recycle as the for front of its company image to the public is, without a doubt, willing to abuse the environment in its path to develop the company further to aid its own greed and wealth.

Sincerely
Mr and Mrs J van Koolbergen
