Construction Notes:

1. Do not scale from this drawing.

2. All dimensions in metres.

3. All levels relate to ordnance datum.

4. This drawing is based on the latest Architectural planning layout and shall be read in conjunction with all other relevant longitudinal sections and construction drawings.

5. Any discrepancies with any of the drawings shall be reported to MJA Consulting Engineer.

6. The level and location of all existing services shall be verified on site by the Contractor before commencing any construction work.

7. Contractor must comply with all current legislation relating to CDM, Health and Safety and COSHH.

8. All material in excess of 20kg (i.e. kerbs, manhole units cover etc.) shall be mechanically lifted and laid where possible at all times.

9. Manholes, sewers, headwalls and other structures intended to convey surface water or sewerage are to be constructed in accordance with the Water Authorities Association specification "Sewers for Adoption" and to Southern Water specification and addendum.

10. Gullies, gully connections, drains, manholes, catchpits, soakaways, headwalls and other drainage structures intended to convey highway water are to be constructed in accordance with the specification issued by West Sussex County Council.

11. All foul and storm water drains which are not to be adopted as public sewers under a section 104 agreement shall be constructed using uPVC pipes or similar approved, bedded and backfilled in accordance with the manufacturers instructions and to the Building Regulations Part H, BS EN 752 & B.R.E. SD1.

12. All building drainage to be 100mm dia. laid at a minimum gradient of 1 in 40 where serving less than 1 WC, 1 in 80 otherwise (FW) and 1 in 80 (SW) unless otherwise shown.

13. Sewers and drains of different diameters should be laid soffit to soffit

14. Inspection chambers on private drains shall be non-access preformed polypropylene.

Depth to invert	Minimum size
< 0.6m	DN300
> 0.6m	DN475

In accordance with the Building Regulations Part H & BS EN 752.

15. Position of soil pipes, stubstacks, WC outlets rainwater downpipes etc positions shall be checked against architects house type drawings to ensure compatibility.

16. Where back inlet gullies are used they should be roddable.

17. All stub stacks to be fitted with air admittance valve where branch drain exceeds 12m except at head of run.

18. Rainwater downpipes to be connected directly to drains via removable adapter to permit access for rodding.

19. Positions of yard and house gullies are nominal and may be adjusted on site, aco drains to be installed at the end of all drives falling towards the public highway. All gully gratings in drives and parking areas should be of sufficient strength to withstand vehicular loading.

20. Lintels or sleeves are to be provided for drains passing through foundation brickwork.

21. All gully connections to be 150 dia. uPVC ultrarib or similar.

22. All gully connections other than at manholes to be "Y" junctions

23. All drain runs are to be flushed through and building materials removed where necessary at the time of final test by Building Inspector and prior to occupation.

24. All soakaways to be positioned a minimum of 5.0m from buildings (where utilised)

25. All finished floor levels are shown on the drawing for guidance only and may need to be adjusted on site. However there is to be no deviation without prior approval

26. All drives are to have a crossfall or gradient of 1:40 minimum. Maximum drive gradient on down slope to be 1 in 10 and 1 in 8 on up slopes.

27. The construction of all pond embankments including selection of fill material, placing, compaction and use of stabilization membranes is to be carried out in accordance with an engineering earthworks specification approved by a specialist Geotechnical Engineer and in accordance with BS EN 1997-1 and BRE 363 to ensure safe and stable slopes during all phases of construction and operation.

KEY:

Proposed Sewers:

Foul sewer

Storm sewer

Highway Gully

Proposed Private Drainage:

Foul drain

Storm drain

Rodding eye

Yard gully

Aco drain

All private inspection chambers shall be polypropylene non-access chambers in accordance with The Building Regulations, Part H.

Chamber sizes:
Depth to invert <1.2m DN450
Depth to invert >1.2m DN600

Invert levels shown thus: F10.00 S10.00

Primary mobility access

Stepped Cavity Tray SCT

External Brickwork EXT BWK

Tanking T T T

Slab on Edge SOE

Brickwork headwall to be in accordance with West Sussex County Council drawing no. S278/38/24 revision A: Construction detail shown on drawing LHS232-1012

Ditch to be cleaned out/desilted and regraded if required.

Trash screen located on existing Headwall to be replaced with a new cranked trash screen in accordance with Arun District Council Engineers requirements

CPM3 Control Chamber CL4.625/ IL2.625

Flow control to limit discharge to a maximum of 3 l/s for all storm events. Unit Reference: MD-SHE-0080-3000-1155-3000

SW30 CATCHPIT MH CL4.620 IL2.730(375)

Figures in vicinity of trees are based on information provided by others and should be confirmed on site prior to construction

Rivulin Aquacell Plus Modular units with inlet/outlet channel to run the whole length of the tank.

SW16 CATCHPIT MH CL4.600 IL2.820(375)

Figures in vicinity of trees are based on information provided by others and should be confirmed on site prior to construction

JKH Large General Purpose Headwall, refer to drawing LHS232-1024.

SW29 CATCHPIT MH CL3.300 IL2.725(300)
