

**Planning/design statement for installation of 100 ground mounted solar panels at:
Shripney Manor, Shripney Road, Bersted**

Context

The proposal as stated above is for the installation of 100 solar panels on a plot of land to the west of Shripney Manor.

The installation will enable the dwelling to be self sufficient to electricity and also to supply excess to thew national grid, therefore in some way meeting the Government's objection of going zero carbon.

Amount

The proposal will be for 100 solar panel, each one being 1762x1134mm.

Layout

The layout of the solar panels will be as shown on the block plan.

Appearance

The appearance of the solar panels will be as the detail to be submitted with the planning application.

Access

The access to the site will be as for the existing access to the field.

Scale

It is considered that the installation of the panels will be out of scale with the surrounding area.

Landscaping

As shown on the BNG it will only be necessary to install 3No. small native trees.
