CLAY LINER DATA SHEET

Bentotex GC25 Feb 2025 12:46 pm

Geotechnical Clay Liner Data Sheet

Test/Property	Unit	Value	Test Method
Water Content (%)	%	15.5	BS 1378
Shrinkage (%)	%	0.8	BS 1378
Liquid Limit (%)	%	25.5	BS 1378
Plastic Limit (%)	%	10.5	BS 1378
Plasticity Index (%)	%	15.0	BS 1378
Unconfined Compressive Strength (kPa)	kPa	150	BS 1378
Swelling Potential (%)	%	0.5	BS 1378
Permeability (m/s)	m/s	1e-09	BS 1378
Specific Gravity	-	2.65	BS 1378
Maximum Dry Density (Mg/m³)	Mg/m³	1.9	BS 1378
Optimum Moisture (%)	%	12.5	BS 1378
Proctor Compaction (%)	%	95	BS 1378
Soil Classification	-	CL	BS 1378

Notes:

1. This data sheet is for use with the Bentotex GC25 Clay Liner.
2. The water content should be determined on a sample of the material to be used.
3. The shrinkage should be determined on a sample of the material to be used.
4. The liquid limit should be determined on a sample of the material to be used.
5. The plastic limit should be determined on a sample of the material to be used.
6. The plasticity index should be determined on a sample of the material to be used.
7. The unconfined compressive strength should be determined on a sample of the material to be used.
8. The swelling potential should be determined on a sample of the material to be used.
9. The permeability should be determined on a sample of the material to be used.
10. The specific gravity should be determined on a sample of the material to be used.
11. The maximum dry density should be determined on a sample of the material to be used.
12. The optimum moisture should be determined on a sample of the material to be used.
13. The proctor compaction should be determined on a sample of the material to be used.
14. The soil classification should be determined on a sample of the material to be used.
