

Waste & Recycling Statement

Aldi, Unit 8, Land at Salt Box West Of Shripney Road, Bognor Regis, PO22 9NW

Client: Aldi Stores Ltd - Sheppey

Date: 19.01.2021

Job no: 2448-SHP

1.00 INTRODUCTION

The management of waste products which can be recycled has always been important to Aldi Stores Ltd. Initially – historically, stores were provided with an external compactor but as product recycling advanced this altered to an internal bailer and internal collection process combined with national waste disposal / recycling companies.

The following categories are currently identified by Aldi Stores Ltd for either disposal or recycling:

- Paper
- Cardboard
- Plastic
- Batteries
- WEEE
- Waste Food
- General Waste

2.00 RECYCLING STORAGE AND COLLECTION

2.01 IN STORE STORAGE COLLECTION

Specific areas within the warehouse are marked for the collection of various types of items which can be recycled (see Appendix I).

2.02 PAPER AND CARDBOARD

Each Aldi Stores Ltd building is provided with a cardboard and paper bailer in the warehouse of the store – the bailer compacts and binds material for return to the depot for recycling.

Two spaces 800mm wide, 1200mm deep and 950mm high (including a euro pallet base) are provided for paper and cardboard.

In general 1m³ of paper is collected every other month.

In general 450g of cardboard is collected every day.

2.03 PLASTIC

One area 1000mm in diameter is provided for plastic collected in plastic bags.

In general 1m³ of plastic is collected every two days.

2.04 BATTERIES

One area 600mm in diameter to a height of 300mm is provided for batteries collected in a flower bucket.

In general 0.05m³ is collected every two weeks.

2.05 WEEE

One area 600mm wide, 800mm deep and 120mm high (one 'D pallet area) is provided for WEEE.

In general 1m³ is collected every year.

2.06 WASTE FOOD

One area 800mm wide and 1200mm deep is provided for food waste storage.

In general 2000 litres of waste food is collected once a week by a separate company where it is taken for anaerobic digestion.

3.00 GENERAL WASTE STORAGE

An existing secure metal enclosure is provided alongside the service ramp for location of a plastic lidded receptacle which is used for general waste and is disposed of by a national waste disposal company contracted by Aldi (see Appendix II).
