Dear Emma

I refer to your email of earlier today and please find below a photo showing the location of the loop for the speed survey undertaken on Shripney Road.

One loop was only installed north of the proposed access given the visibility to the south complies with DMRB requirements for a 40 miles per hour road.

The location was also agreed between our survey company and WSCC highways and is in the best location given the entrances to the Robin Hood public house to obtain northbound approach speeds.

If you need anything else, please do let me know

Chris Saunders | Associate
