	Quote Number: 504
	Surveyors: Dr Gavin Walker

Work Schedule -- Side Garden:

T1. BRADFORD PEAR TREE (*Pyrus calleryana*): This mature specimen (c.8m high) is located in close proximity to the boundary. The tree is a hazard to the clients' dogs that are used to breed puppies for Canine Partners. The berries/fruit are poisonous to the puppies/dogs as contain Cyanide. The tree is to be removed to ground level. *Pyrus calleryana* seeds are considered mildly poisonous to humans and animals. When ground between the teeth and ingested in large quantities, glycosides in the seeds mix with stomach acid to form cyanide.

Remove all waste from the site and dispose of sustainably at Woodhorn Group green waste site at Oving. Leave the site clean of all debris.

Additional Notes:

- All work is undertaken by fully trained NPTC professionals. Public Liability insurance is provided up to £5 million.
- Our experienced and fully trained arborists work to high arboricultural standards and will ensure that all work will comply with BS3998:2010.
