APPENDICES

APPENDIX A – SITE LOCATION PLAN

APPENDIX B - LOCAL PUBLIC TRANSPORT SERVICES

APPENDIX C - PERSONAL INJURY ACCIDENT PLAN

APPENDIX D – COACH SHUTTLE VEHICLE TRACKING

APPENDIX E - SITE LAYOUT PLAN

1.0 INTRODUCTION AND BACKGROUND

- 1.1 Robert West has been commissioned by Cushman & Wakefield to produce a Transport Statement (TS) in support of a Section 73 application to vary Condition 3 of planning permission ref BE/49/17/PL. Condition 3 is as follows:

‘The modular building hereby permitted shall be removed, the land restored to its former condition (or to a condition to be agreed in writing by the Local Planning Authority) and the development disconnected from the existing storm drainage system, on or before the expiration of the period ending on 01 September 2018.’

- 1.2 This application seeks to allow for the primary school to operate from its existing temporary site for a period of one additional year (2018/2019 school year) and increase their pupil number by 30 (from 390 pupil places to 420 places).
- 1.3 The temporary school is located at the former Barton County Infant School, located on Romney Broadwalk, Bognor Regis PO22 9BD, as shown in Figure 1.1.

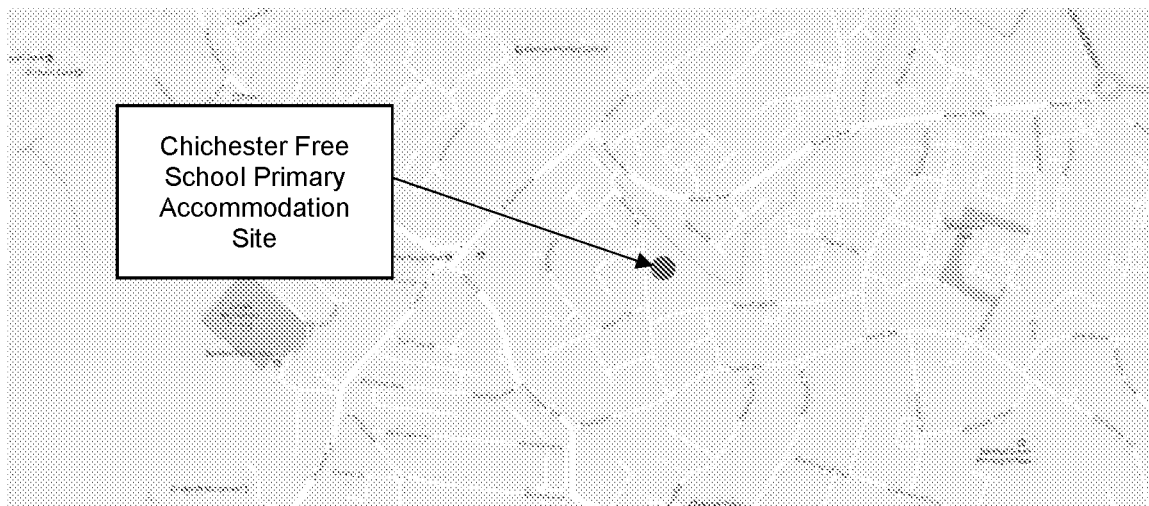

Figure 1.1: Site Location

- 1.4 The primary school was initially located at this temporary site due to constraints at their previous temporary site (Vinnetrov Business Park, where the secondary school is currently located).
- 1.5 Both the primary and the secondary schools are due to move to their permanent accommodation, at the Carmelite Convent Site, located in Hunston. A part of the planning consent, the permanent site has a pre-occupation requirement to complete various highways works, including access arrangements, a footway/cycleway connecting with Whyke Roundabout with the school site, bus stops in front of the site and a signalised pedestrian crossing.

- 1.6 The move to the permanent site is due to occur in September 2018. However due to delays to the completion of the highways works, it has been determined that it may not be feasible for all pupils to move at that time. This will depend on travel planning work currently being completed between the school, Robert West, Chichester District Council and West Sussex County Council.
- 1.7 As such it is proposed that the primary school may need to continue to operate at its existing temporary site at the former Barton County Infant School, until the start of the following school year (September 2019). Although it may be possible to move the primary school to the permanent site earlier than this (for example during one of the school holidays throughout the year), this application seeks an extension for one year.
- 1.8 The arrangements for the secondary school are being dealt with separately and are not considered in this report.
- 1.9 As well as the continued operation of the Reception and Primary Classes in this location, it is proposed to expand the number of Primary school places from 390 to 420 (representing an increase of 30 pupil places for this age group over the existing situation).

Scope of Works

- 1.10 This TS considers the highway and transport matters associated with the proposed continued operation of the primary school in this location, with 30 additional pupils and 2 additional full time equivalent (FTE) staff. It has been produced with consideration for the national, regional and local policy.
- 1.11 This TS is submitted along with a Travel Plan which will account for the continued operation of the site for the following year.

Report Structure

- 1.12 The remainder of the report is divided into the following sections:
- i. Relevant transport planning policy from the national to local level is reviewed in Section 2.0.
 - ii. A review of the existing conditions of the site and wider area, including accessibility by non-car modes, description of the local highway network and an analysis of personal injury accident data is outlined in Section 3.0.
 - iii. An appraisal of the existing operation of the School is included in Section 4.0.
 - iv. Section 5.0 summarises the main characteristics of the proposed development in terms of student/staff numbers, access, parking and servicing arrangements.

- v. The predicted trip generation and the development impacts are included in Section 6.0.
- vi. A strategy to mitigate the impact of the proposed development is discussed in Section 7.0.
- vii. This report is concluded in Section 8.0.

2.0 POLICY CONTEXT

2.1 This section considers relevant transport and planning policy as follows:

- i. National Planning Policy Framework (NPPF) (2012).
- ii. West Sussex County Council Local Transport Plan 3 (2011).
- iii. Arun Local Plan (2003/2011).

NPPF (2012)

2.2 The NPPF was published by the Department for Communities and Local Government (DCLG) in March 2012. The NPPF replaces and consolidates a number of Planning Policy Guidance notes (PPGs), Planning Policy Statements (PPSs), Minerals Planning Guidance notes (MPGs), Circulars and Letters to Chief Planning Officers.

2.3 The aim of the NPPF is to make the planning system less complex and more accessible, to protect the environment and to promote sustainable growth. Paragraph 14 states:

“At the heart of the National Planning Policy Framework is a presumption in favour of sustainable development, which should be seen as a golden thread running through both plan-making and decision taking”.

2.4 The NPPF has a set of 12 core planning principles that underpin both plan-making and decision-taking. This includes a principle that states that planning should:

“actively manage the patterns of growth to make the fullest possible use of public transport, walking and cycling, and focus significant development in locations which are or can be made sustainable”

2.5 Section 4 of the NPPF, covering paragraphs 29 through 41, sets out the Government’s guidance on promoting sustainable transport, recognising that the smarter use of technologies can reduce the need to travel.

2.6 Paragraph 32 states that: “All developments that generate significant amounts of movements should be supported by a Transport Statement or Transport Assessment. Plans and decision should take account into whether:

- *the opportunities for sustainable transport modes have been taken up depending on the nature and location of the site, to reduce the need for major transport infrastructure;*
- *safe and suitable access to the site can be achieved for all people; and*

- *improvements can be undertaken within the transport network that cost effectively limit the significant impacts of the development. Development should only be prevented or refused on transport grounds where residual cumulative impacts of development are severe.”*

2.7 Paragraph 35 states that, where practical, developments should be located and designed to:

- *“accommodate the efficient delivery of goods and supplies;*
- *give priority to pedestrian and cycle movements, and have access to high quality public transport facilities;*
- *create safe and secure layouts which minimise conflicts between traffic and cyclists or pedestrians, avoiding street clutter and where appropriate establishing home zones;*
- *incorporate facilities for charging plug-in and other ultra-low emission vehicles; and*
- *consider the needs of people with disabilities by all modes of transport.”*

2.8 It is recognised that a key tool to delivering sustainable travel, and the principles set out in the NPPF, will be the implementation of Travel Plans. Paragraph 36 states:

“All developments which generate significant amounts of movements should be required to provide a Travel Plan.”

2.9 The NPPF does not provide guidance on vehicle or cycle parking; however, it does provide guidance on what local authorities should take into account when setting their local parking standards. This includes:

- *“the accessibility of the development;*
- *the type, mix and use of development;*
- *the availability of and opportunities for public transport;*
- *local car ownership levels; and*
- *an overall need to reduce the use of high-emission vehicles.”*

West Sussex County Council Local Transport Plan 3 (2011-2026)

2.10 WSCC’s Third Local Transport Plan was adopted in February 2011 and provide strategic direction for transport within West Sussex.

2.11 The Long Term Strategy for the Plan is to reduce unnecessary trips by motorised vehicles and encourage use of more sustainable modes of transport. One of the ways WSCC plan to achieve this is through building on their current work with school communities to further develop travel plans and continue the trend away from car use for the journey to and from school.

- 2.12 The plan also contains a commitment to providing transport from/to school in line with their Home to School Transport Policy and Sustainable School Travel Strategy. They will also encourage healthy travel behaviour through school travel, healthy schools and other behaviour change initiatives such as School Travel Planning and Travelwise.
- 2.13 The Council will also be promoting walking and cycling through school and workplace travel plans and through promotion of national events such as walk to school events, walking buses, bike week and Travelwise week. To ensure the safety of children travelling to school, WSCC will be investing in a programme of safer routes to school and school safety zone to introduce advisory 20mph speed limits near schools at pick-up/drop-off times.

Arun Local Plan

- 2.14 The current Arun Local Plan was adopted in 2003 and covered the period up to 2011. A new Local Plan (2011-2031) is identified as emerging and has been considered at Examination in Public, although it is not yet adopted. The 'emerging' Local Plan sets out the vision for the future of Arun and guides development to achieve that vision.
- 2.15 Policy T SP1 (Transport and Development) from Chapter 15 – Transport of the document indicates that the Council will support development which:
- i. *"Is designed to reduce the need to travel by car by identifying opportunities to improve access to public transport services and passenger transport services whilst making provision for safe access to the highway network through improvements to the existing road network and the promotion of vehicles which use low-carbon energy;*
 - ii. *Is incorporated into the District's green infrastructure network and gives priority to pedestrian and cycle movements;*
 - iii. *Incorporates appropriate levels of parking in line with West Sussex County Council guidance on parking provision and the forthcoming Arun Design Guide taking into consideration the impact of development upon on-street parking;*
 - iv. *Is supported by an effective and deliverable Transport Assessment which demonstrates that the transport effects of development on the local and strategic road network can be satisfactorily mitigated and a Travel Plan, which is effective and deliverable".*

Parking Standards

- 2.16 The latest Arun Local Plan also does not provide relevant parking standards in relation to educational facilities and advises that the level of car parking provision should be in accordance with WSCC guidance, which is titled 'Revised County Parking Standards and Transport Contributions Methodology, 2003'. The document was revised in September 2010 by new County Council Guidance on car parking in residential developments. The associated parking standards for schools (including standards for cycle parking) are summarised in Table 2.1. It should be noted that these are maximum parking standards.

Parking	Standard
Car	1 Space Per 2 Daytime Teaching Staff (parking levels to be established within a Travel Plan)
Disabled	1 parking space for people with disabilities per 20 parking spaces or part thereof
Cycle	1 cycle space per 8 car parking spaces provided. Subject to a minimum of 2 cycle spaces, apart from at large out of town retail outlets where the standard is 1 cycle space per 16 car parking spaces

Table 2.1: West Sussex County Council Parking Standards

Summary

- 2.17 In respect of proposed development, the key conclusions from these policy documents from the perspective of transport are noted as:
- The need to ensure that schools are well placed, integrated, prominent and accessible to local communities.
 - Ensuring that the development is accessible to the public transport network.
 - Sustainable transport choices are provided where possible.
 - Development seeks to reduce the dependence on the private car.
 - Provision is made for pedestrian and cycle access.
- 2.18 The evidence set out in this TS demonstrates that the School will meet this policy criteria for the temporary period of occupation in north Bersted.

3.0 SITE CONDITIONS & ACCESSIBILITY

- 3.1 This section describes the existing conditions of the local area and the accessibility to the site by non-car modes, including walking, cycling and public transport.

Site Location

- 3.2 The site is located on the northern end of Romney Broadwalk, Bognor Regis PO22 9BD. A site location plan is included at Appendix A. The site is located in a predominantly residential area towards the northern end of Bognor Regis and is bound by residential units to the north, east and south and by Romney Broadwalk to the west.

Wider Area

- 3.3 A number of Schools are located in the vicinity of the site. Bartons Primary School is located 470m north-west to the site and Bersted Green Primary School is located 675m south-east.
- 3.4 Other local facilities include Holy Cross North Bersted (located approximately 320m west to the site), Bersted Green Surgery (500m south-east), Southway Primary School and Arena Sports Centre (850m south-west) and Regis School (900m south-west). A large commercial area is located 1.2km east to the site and includes West Sussex County Council and a Tesco Superstore.

Local Highway Network

- 3.5 Observations with respect to the quality and capacity of the local highway network in proximity to the School were undertaken during a site visit in February 2017 (prior to the opening of the temporary school).

Romney Broadwalk

- 3.6 Romney Broadwalk is a single carriageway residential road which extends 220m north from its junction with Fairways. The road is approximately 7m wide. The northern end of the road ends in the form of a cul-de-sac which provides access to the vacant Barton County Infant site, as shown in Figures 3.1 and 3.2.

Figure 3.1: Romney Broadwalk (Facing North)

Figure 3.2: Romney Broadwalk (Facing South)

- 3.7 No parking was observed to take place along the majority of the Romney Broadwalk by 10:00 and all parking seen in Figure 3.1 was the result of a meeting with various parties at the School. Otherwise the access to the School was found to be clear of vehicles. School Keep Clear markings are provided at the School entrance which will restrict all parking at the entrance.
- 3.8 Both sides of the road have consistent dropped kerbs which provide access to private driveways. A 'School warning sign' with warning lights is located on the western footway of the road, north of the junction with Van Dyck Place. The sign indicates that the maximum speed limit should be 20mph when the lights show.

Van Gogh Place and Renoir Court

- 3.9 Van Gogh Place forms a priority junction with Romney Broadwalk and extends by 350m west until it forms another priority junction with Woodlands Road. The road is approximately 6m wide. Renoir Court forms a priority junction with Romney Broadwalk 30m north of the junction with Van Gogh Place and extends westbound by 110m. Figures 3.3 and Figure 3.4 shows Van Gogh Place and Renoir Court respectively.

Figure 3.3: Van Gogh Place

Figure 3.4: Renoir Court

- 3.10 All residential properties are provided with off-street parking on both roads. The roads do not have parking restrictions; however, the width of the road could allow for vehicles to be parked on at least one side of the road.

- 3.11 'School warning signs' with warning lights are located on both roads. The signs indicate that the maximum speed limit should be 20mph when the lights show. On Van Gogh Road, it is located on the southern footway of the road, west of the junction with Manet Square. On Renoir Court, it is located on the northern footway, near the junction with Whiteways. During the site visit, both roads were observed to have few cars parked, with approximately 95% residual capacity available.

Van Dyke Place

- 3.12 Van Dyke Place forms a priority junction with Romney Broadwalk and extends by 160m until it forms another priority junction with Renoir Mews. The road is approximately 6m wide. Figure 3.5 shows Van Dyke Place facing north.

Figure 3.5: Van Dyke Place

- 3.13 The roads do not have parking restrictions; however, the width of the road could allow for vehicles to be parked on at least one side of the road. During the site visit, this road was observed to have few cars parked, with over 95% residual capacity available.

Manet Square

- 3.14 Manet Square forms a priority junction with Van Gogh Place and extends by 110m south until it forms another priority junction with Fairlands. The road is approximately 6m wide and is identified in Figure 3.6.

Figure 3.6. Manet Square

- 3.15 All residential properties are provided with off-street parking. The roads do not have parking restrictions; however, the width of the road will could allow for vehicles to be parked on at least one side of the road.
- 3.16 To the north of the proposed site is Meadow Way, Whiteways and Barton Road which are all accessed via Roman Way. These roads all have unrestricted parking and while vehicular access cannot be achieved to the proposed site from these roads, they may experience some activity associated with pupil drop-off and pick-up.
- 3.17 Overall the roads identified above, which would likely be used for a small level of long-stay parking as well as short stay parking for pick-up and drop-off in proximity to the School are in good condition and have significant available on-street residual parking capacity.

Site Accessibility

Walking and Cycling

- 3.18 Local footway provision in proximity to the site is good with dropped kerbs and tactile paving allowing pedestrians good access to the proposed site on foot. The footways on either side of Romney Broadwalk have an average width of 2m. The footways are well lit, with street lighting provided at regular intervals. It is noted that the northern end of Romney Broadwalk and the southern end of Barton Road are cul-de-sacs, the two of which are connected by a pedestrian footways and offer good pedestrian access to site.
- 3.19 There are no formal crossing points located in the vicinity of the site. A crossing point with tactile paving is present on Romney Broadwalk, at the junction with Fairlands. There are a number of recommended cycle routes in the immediate area of the site in accordance with the WSCC interactive cycle map as presented in Figure 3.7.

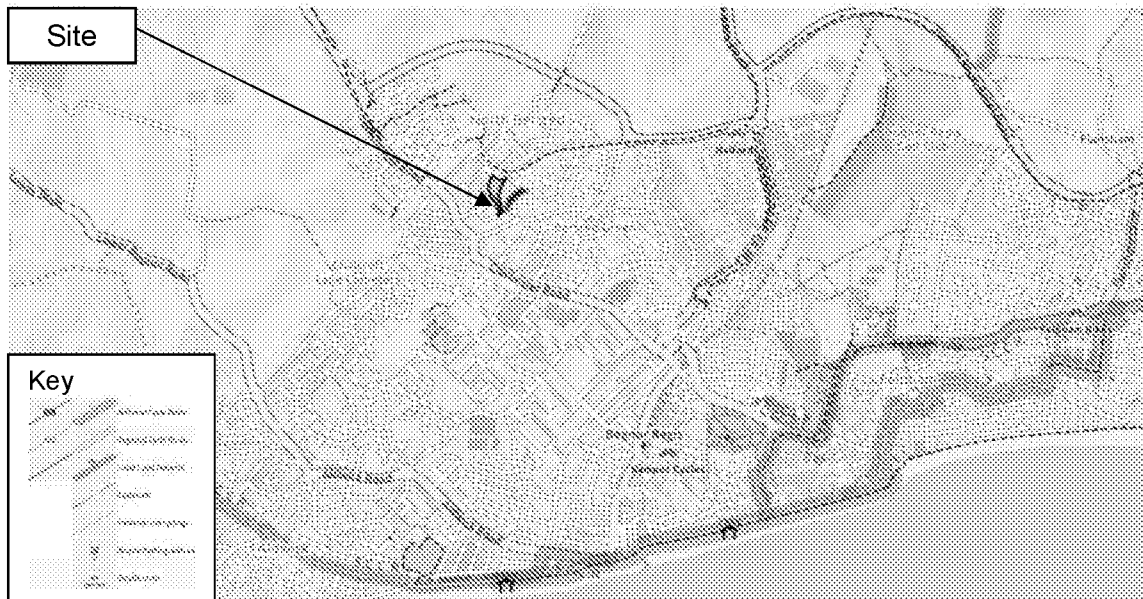

Figure 3.7: West Sussex County Council Cycle Map

- 3.20 There are no cycle lanes located within the immediate vicinity of the site, although Rowan Way and Shipney Road, located north and west to the site respectively, are marked as cycle paths.
- 3.21 A local cycle network can be found south of the site, running from Fish Lane through Bognor Regis Promenade to Felpham Way. A National Cycle Route can then be found south of the site, running past the Bognor Regis Promenade.
- 3.22 The School has a dedicated pedestrian entrance (as shown in Figure 3.8) which is positioned south of the vehicular entrance along Romney Broadwalk. Pedestrian gaur railing is also provided in front of the entrance to help protect exiting non-motorised road users from vehicular traffic on Romney Broadwalk.

Figure 3.8: School Pedestrian Access

Public Transport - Bus Routes

- 3.23 The only public bus service currently serving the immediate area is the 'Star' route, provided by Stagecoach and provides a service to Bognor Regis, North and South Bersted. The route commences and ends at Bognor Regis High Street. The nearest bus stops to the site are located on Renoir Court. Both eastbound and westbound bus stops are located opposite the pedestrian site access and therefore can be accessed from the site in less than a minute. These bus stops are served only by the 'Star' route.
- 3.24 Additional bus routes are available on Chichester Road, approximately 550m (a seven-minute walk) to the east of the site, and on Roman Way, approximately 800m (a 10-minute walk) north-east of the site. The bus stops on Chichester Road are served by bus routes 141, U7, 700 and 905. The bus stops on Roman Way are served by bus routes 69 and the Star.
- 3.25 Table 3.1 on the following page identifies the frequency and destinations of these bus routes and the full bus timetables for these routes are included at Appendix B. It is noted that routes 69 and 905 do not operate during the school peak periods and have not been considered further.

Bus Route	Destinations	Peak Period Frequency (Vph)	
		AM Peak (8am-9am)	PM Peak (3pm-4pm)
Star	Bognor Regis – South and North Bersted – Bognor Regis	2	2
	Bognor Regis – North and South Bersted – Bognor Regis	2	2
U7 (University Days Only)	Chichester – Bognor Regis Hotham Park	1	1
	Bognor Regis Hotham Park – Chichester	1	1
700	Littlehampton – Bognor Regis – Chichester	2	3
	Chichester– Bognor Regis – Littlehampton	2	3
700	Flansham Park – Bognor Regis - Chichester – Havant - Portsmouth	3	3
	Portsmouth – Havant – Chichester – Bognor Regis – Flansham Park	2	3
141	Yapton – Felpham – Bognor Regis – Bishop Luffa School	-	-
	Bishop Luffa School – Bognor Regis – Felpham – Yapton	-	1

Table 3.1: Local Bus Services

- 3.26 **Table 3.1** shows that between 15 and 19 buses are available within a 10-minutes walk of the proposed site in the morning and afternoon peak periods. It is anticipated that public bus services will be accessible for staff.

National Rail

- 3.27 The nearest rail station is Bognor Regis, which is 1.7km south-east of the site (approximately a 27-minute walk). The station offers services to key destinations such as London Victoria (via Gatwick Airport), Littlehampton, Barnham and Southampton Central. Each route is serviced by approximately 2-3 trains per hour. It is considered that few trips are likely to be made by those traveling to/from the proposed site, with those that are likely to be staff rather than pupils.

Personal Injury Accident Data

- 3.28 Personal Injury Accident (PIA) data was obtained from Sussex Police for the most recent five-year period ending 31st December 2016 within a 400m radius from the proposed site. As advised by the Sussex Safer Roads Partnership, the information included in the PIA report is provided for analysis purposes and is based on the data provided by Sussex Police. Some of the data included in their report is said to be subjective and as such they advise it is not considered suitable for general release.
- 3.29 Crashmap has been used to check whether any further accidents occurred in 2017, since the initial set of accident data was requested. The data extracted for this year is discussed at the end of this section.
- 3.30 In view of this full details of each PIA have not been supplied within this report, however, the below provides a summary of the accident statistics, and Appendix C of this report includes a summary map of the accidents by severity.
- 3.31 A total of 17 accidents occurred within the identified study area over the five year period. A summary of the total number of accidents by severity is outlined in Table 3.2.

Severity	Year						%
	2012	2013	2014	2015	2016	Total	
Fatal	0	0	0	0	0	0	0%
Serious	0	0	0	1	2	3	14%
Slight	6	3	4	4	2	19	86%
Total	6	3	4	5	4	22	100%

Table 3.2: Accident Data Summary (by Severity)

- 3.32 Table 3.2 indicates that the 17 accidents that occurred in this area caused three serious casualties (14% of the total) and 19 slight casualties (86% of the total).
- 3.33 Of these accidents, four occurred during a weekday morning period (07:00-10:00) and two occurred during a weekday evening peak period (16:00-19:00). Furthermore, 15 accidents occurred in dry conditions and two in wet conditions. Fundamentally, no accidents took place within 300m of the site for which the majority of pupil drop-off and pick-up will take place.

- 3.34 The closest accident which took place was a serious accident which occurred on 3rd March 2015 at 02:27 at the North Bersted Street roundabout with Rowan Way. The accident resulted in a driver losing control, exited the road on the nearside and hitting a brick built garden wall of a private dwelling. The accident resulted in two car passengers suffering serious injuries and one car passenger and the car driver suffering slight injuries. The accident was attributed to the car driver being intoxicated/impaired by alcohol at the time of the collision.
- 3.35 Two further serious injuries occurred on 2nd February 2016 at the Chichester Road junction with Central Avenue, and on 21st September 2016 at the Chichester Road junction with New Town Avenue. The first resulted in loss of control with the driver suffering slight injuries and a passenger suffering serious injuries. The accident can be attributed to the swerving movement of the car. The second accident involved a car and a bicycle with the cyclist suffering serious injuries. The accident can be attributed to the car driver's failure to judge the cyclist's path/speed, his poor manoeuvre and failure to look properly.
- 3.36 Of the remaining accidents, all were slight in severity, occurred between the Chichester Road junctions with Fairlands and North Bersted Street and appeared to be the result of human error.
- 3.37 Overall, none of the accidents recorded within the study area involved people aged 4 - 11. It can be concluded that the primary cause of accidents occurring in this area was the result of human error, rather any inherent road pavement highway conditions or features the local highway network.

2017 Crashmap data

- 3.38 Crashmap was queried to understand whether any additional accidents had occurred since the initial accident data request. The same area was considered within Crashmap and it was discovered that one additional accident occurred in 2017.
- 3.39 This accident occurred on Friday 19 May 2017 at the junction of Chichester Road, N Bersted Road and Chalcraft Lane and resulted in 'slight' injuries to one casualty. Two vehicles were involved in the accident and it is noted that no children, cyclists, pedestrians or motorcyclists were injured as a result of this accident. It cannot be determined from the available information whether this accident was related to the operation of a school. As only one accident occurred in the study area in 2017 it suggests that the area surrounding the site is safe and there is a low risk of an accident occurring involving a school child.
- 3.40 There are also no existing reported PIAs which would indicate an existing road safety issue in proximity to the School as per the current situation. It is acknowledged that the school is proposed to expand by 30 pupils, however it is anticipated that this would result in a very low increase in the potential for a road accident to occur. Nevertheless, road safety mitigation measures will be proposed through the School Travel Plan.

4.0 EXISTING SITE OPERATIONS

- 4.1 This section sets out the existing operation of Chichester Free School as it currently operates at the temporary site at the former Barton County Infant School.

Pupil and staff numbers

- 4.2 The school currently has 390 primary pupils on roll in years Reception to Year 6. The primary school has 46 staff members, which is anticipated to result in 34 FTE staff numbers based on the staffing ratio across the whole school.

School operational hours

- 4.3 The existing timetable of the School is presented in Table 4.1 below.

School	Session/Group	Open/Start	Close/Finish	Attendance
-	Site Opening	07:00	19:00	-
Reception	School Day	09:00	15:20	100%
Primary	Pre-School/Breakfast Club	07:30	08:20	10.6%
	School Day	08:30	15:30	100%
	After School Activities (Mon-Thurs only)	15:30	16:30	41%
	After School Club (Mon-Thurs only)	15:30	18:00	3.9%

Table 4.1: School Operating Times

School Shuttle Bus

- 4.4 Four coaches are currently used to transport pupils to/from the site; the coach access strategy is summarised as follows:
- The first coach accesses the site from the main entrance, turns around on-site (using the playground) and stacks on Romney Broadwalk (facing south) - see drawing SK001.
 - The second coach turns around on-site (in the playground) and stacks on Romney Broadwalk (behind the first coach) – see drawing SK002.
 - The last two coaches park on-site within the playground. For School drop-off in the morning, coaches three and four stack on Romney Broadwalk when the first two coaches have departed - see drawings SK003 and SK004.
 - For school departures in the afternoon, it is likely that all four coaches arrive and set down at the same time for a short period before the end of the School day, meaning two coaches stack on Romney Broadwalk as shown in the drawings at Appendix D.

- 4.5 Pupils alighting buses are taken straight to class. A safe clearance zone has been identified as per the plans at Appendix D to minimise any conflict between the coach turning area and pedestrian footway within the site and such that pedestrians can enter the building/s safely.

Access and Parking

- 4.6 The site is currently occupied by the primary school on a temporary basis and has a main building located at the centre of the site. The existing site layout plan is included at Appendix E (i.e. including the temporary modular units).
- 4.7 On-site parking provision is limited and is located west of the main building (and east of the existing access). The car park originally provided up to eight standard parking spaces and one disabled parking bay. However, to accommodate coach movements to/from the site, four existing parking bays to the right of the existing access were removed such that coach vehicles could turn around within the site. This resulted in five car parking bays (including one disabled bay) being retained for use by staff and visitors.
- 4.8 The playground continues to be available for use during the day, this area is simply restricted during morning arrivals and afternoon departures.
- 4.9 No cycle parking is currently provided at the site.
- 4.10 For those pupils arriving by coach, the School indicated a preference for coaches to undertake drop-off and pick-up as close to the site as possible due to help ensure a speedy transfer of pupils to site, to help secure the safety of pupils during drop-off and pick-up and to minimise staff resources required to transport children between coach and School building.
- 4.11 A playground is located at the south-western end of the site. Green fields are located at the eastern and south-eastern ends of the site. The site does not currently accommodate for cycle parking.
- 4.12 Vehicular access onto the site is via a gated entrance located on the eastern side of Romney Broadwalk. This entrance provides access to the main parking area within the site. A segregated pedestrian gate is also provided adjacent to the vehicular access gate. The vehicle access to the site is shown in Figure 4.1.

Figure 4.1: Vehicular Access to site

- 4.13 A separate gated pedestrian access point is also available on Romney Broadwalk, approximately 40m south of the vehicular access. This access leads onto an on-site pedestrian footpath that connects to the site's main building. As set out in Section 3.0, guard railing is also provided alongside the kerb to prevent pedestrian overspill onto the carriageway (see Figure 3.8).

Existing Trip Generation and Parking

- 4.14 A 'hands up' survey was undertaken among pupils and staff in May 2018 to understand the current trip generation at the site.

Pupil mode share

- 4.15 The pupil hands up survey received response rates of 89.5% and 89.7% to how pupils travel to and from the site respectively. The results of the survey are provided in Table 4.2.

Mode	How travel to the site		How travel from the site		Average	Existing pupils (390)
	Number	%	Number	%	%	Number
Shuttle bus	124	35.5%	127	36.3%	35.9%	140
Car	132	37.8%	132	37.7%	37.8%	147
Car share	71	20.3%	70	20.0%	20.2%	79
Park and stride	2	0.6%	2	0.6%	0.6%	2
Public bus	0	0.0%	0	0.0%	0.0%	0
Rail	0	0.0%	0	0.0%	0.0%	0
Walk	16	4.6%	15	4.3%	4.4%	17
Cycle	4	1.1%	4	1.1%	1.1%	4
Scooter	0	0.0%	0	0.0%	0.0%	0
Total	349	100.0%*	350	100.0%	100.0%	390

Table 4.2: Existing pupil mode share (*rounding has occurred)

- 4.16 Table 4.2 shows that most pupils travel by car modes (58.6% on average), with the school shuttle bus found to be the second most popular mode (35.9%).
- 4.17 It is noted that no pupils currently travel by public bus, while 5.5% travel by active modes.
- 4.18 To be consistent with the previous assessment of this site, the same car share ratio has been applied. There were previously found to be an average of 1.6 pupils per car, therefore from 228 pupil vehicle trips (car, car share and park and stride), this is predicted to generate a maximum of 143 one-way vehicle trips in the morning and afternoon periods associated with drop-off and pick up.
- 4.19 It is therefore anticipated that the pupils and parents generate demand for 143 short-term parking spaces during the school peak periods. It is noted that due to activities and clubs and the staggered start and finish times of the Reception classes not all of this demand occurs at the same time.

Staff mode share analysis

- 4.20 Staff were also included in the May 2018 hands up survey. It is noted that the staff data was collected at both the primary and secondary schools and could not be separated. The staff survey received a response rate of 89.0% based on all FTE staff, which is considered robust. The data is presented in Table 4.4 and the mode shares have been applied to the existing number of FTE staff for the primary school.

Mode	%	Existing staff (34 FTE)
Car driver	85.7%	29
Car passenger	2.4%	1
Car share	6.0%	2
Park and stride	1.2%	0
Public bus	0.0%	0
Rail	0.0%	0
School bus	1.2%	0
Cycle	2.4%	1
Walking	0.0%	0
M/C	1.2%	0
Total	100.0%*	34

Table 4.4: Existing staff mode share

- 4.21 Table 4.4 shows that the majority of staff travel by car modes (95.3%), with the remaining travelling by school bus, cycling and by motorcycle, in small proportions.
- 4.22 The table suggests that the existing primary school typically generates 29 journeys to work as a car driver and a further one vehicle trip from car sharing (assuming the car sharing staff travel with two staff per vehicle). This produces demand for 30 medium to long stay parking spaces on a typical day.
- 4.23 The site currently provides four standard parking bays on-site which can be used by staff, it is therefore anticipated that staff generate demand for 26 on-street spaces during the day.

5.0 PROPOSED DEVELOPMENT

- 5.1 This section summarises the main characteristics of the proposed continued temporary occupation of this site for Chichester Free School Reception and Primary classes in terms of pupil and staff numbers, access, parking, and servicing.

Proposal Overview

- 5.2 The proposals seek to vary Condition 3 of planning permission ref BE/49/17/PL. This would allow for the primary school to operate at the site for a maximum period of an additional year (2018/2019), or until such time it can move to the permanent site.
- 5.3 As well as this relocation, it is proposed to expand the number of Primary school places from 390 to 420, representing an increase of 30 pupil places over the existing situation.
- 5.4 It is anticipated that the school will require an additional 2FTE staff members to operate the additional class in the 2018/2019 school year. This brings the total number of staff to 36FTE.

Development Site Layout

- 5.5 It is proposed that the modular buildings which were located on the site for the initial temporary application (2017/2018 school year) are retained and continue to provide a total of seven classrooms for the school's use. These units are located to the south east of the existing school building.
- 5.6 The existing school building was lightly refurbished prior to the 2017/2018 school year and as such it is understood that no further improvements need to be made to it for the continued operation of the temporary site. The site layout of the temporary classrooms is included in Appendix E.

Site Access

- 5.7 Visitors and staff will continue to enter and exit the site from the existing access and egress points which are not proposed to be altered. Pedestrian access will continue to be taken from the segregated pedestrian access located approximately 40m south of the vehicular entrance. The existing footway within the School grounds will continue to provide a connection for those travelling on foot, by bicycle or scooter to the main entrance.

Coach Access Strategy

- 5.8 The ability for the coach-based shuttle bus service to continue for the 2018/2019 school year will depend on the outcome of the discussions referred to at paragraph 1.6. If the service is able to continue then the access arrangement strategy will remain as it is currently undertaken (see Section 4.0). The implications of the coach-based shuttle are outlined at paragraph 6.7.

Car Parking

- 5.9 The existing level of parking will be maintained (i.e. 5 spaces); however, if the existing shuttle bus arrangement is discontinued, it is suggested that 4 additional spaces would be made available for parking on-site.
- 5.10 These spaces were previously available at the site but were taken out of use to facilitate the turning movements of the shuttle buses. Therefore, if the shuttle bus arrangement is discontinued the spaces can be re-instated.

Cycle Parking

- 5.11 It is proposed that 20 cycle parking spaces are provided at the site. It is noted that the application of the cycle parking standards (1 space per 8 car parking spaces) will result in a requirement of only one space.
- 5.12 As the existing level of cycle parking demand is for four student parking spaces and up to one staff cycle parking space (five spaces total) it is anticipated that this level of provision will provide more than enough residual capacity (15 spaces) to accommodate any additional demand which may occur in the forthcoming year with 30 additional pupil places.

Servicing and Refuse Operations

- 5.13 Delivery and refuse collection will continue to take place from the vehicle entrance from Romney Broadwalk with vehicles accessing and egressing in forward gear.

6.0 PREDICTED TRIP GENERATION AND IMPACTS

- 6.1 This section outlines the predicted trip generation by mode associated with both pupils and staff. Pupil and staff mode share is informed by the 2018 mode share survey data.

Trip generation

- 6.2 The proposals are to provide an additional 30 pupil places, it is anticipated that these pupils will travel in a similar manner to the existing pupils. The average pupil mode share data presented in Table 4.2 has been utilised to anticipate the future pupil modes of travel and is presented in Table 6.1.
- 6.3 It is anticipated that the school will require an additional 2FTE staff members in order to facilitate its 30 pupil expansion in the 2018/2019 school year. It is anticipated that the additional staff will travel in a similar way to the existing staff; this is shown in Table 6.1.

Mode	Pupils				Staff			
Mode	%	Existing (390)	Proposed (420)	Net Increase	%	Existing (34)	Proposed (36)	Net Increase
Shuttle bus	35.9%	140	151	11	1.2%	0	0	0
Car Driver	-	-	-	-	85.7%	29	31	2
Car Passenger	37.8%	147	159	11*	2.4%	1	1	0
Car share	20.2%	79	85	6	6.0%	2	2	0
Park and stride	0.6%	2	2	0	1.2%	0	0	0
Public bus	0.0%	0	0	0	0.0%	0	0	0
Rail	0.0%	0	0	0	0.0%	0	0	0

Total	100.0%	390	420	30	100.0%*	34*	36*	2

Table 6.1: Anticipated trips (*rounding has occurred)

Development impacts

Local highway network impact

- 6.4 Table 6.1 shows that a total of 2 additional staff car trips are anticipated as a result of the expansion.
- 6.5 As mentioned, it is currently not known whether the coach-based shuttle bus service will continue for the 2018/2019 school year. We have therefore assumed two different scenarios.
- 6.6 Assuming that the shuttle service will continue, Table 6.1 shows that a total of 17 additional pupil car trips are anticipated as a result of the expansion. Applying the aforementioned car share assumption of 1.6 pupils per vehicle suggests that these additional trips would result in an additional 11 cars travelling to and from the site in the peak periods.
- 6.7 Assuming that the shuttle service will be discontinued, then it is assumed that the above pupils and the existing shuttle users would most likely travel by car. This would result in a net increase of 168 additional pupils travelling by car, upon applying the car share assumption this would result in 105 additional car trips in the peak periods.
- 6.8 Therefore, overall it is anticipated the following additional car trips to the temporary site in 2018/19 year:
- i. If shuttle service is continued: 13 additional car trips (ie 2 staff car trips and 11 pupils' car trips).
 - ii. If shuttle service is discontinued: 107 additional car trips (ie 2 staff car trips and 105 pupils' car trips).
- 6.9 In both scenarios, the above additional car trips would not all occur at once due to the staggering related to the Reception start and finish times and presence of clubs, activities and wrap around care.
- 6.10 The level of additional car trips generated in the scenario with the shuttle bus is anticipated to produce a negligible impact.
- 6.11 The level of additional car trips generated in the scenario without the shuttle bus is anticipated to produce a small impact. It is anticipated in the morning peak hour 94 additional vehicle trips would occur (after discounting for breakfast club) associated with pupils. While in the afternoon peak hour 58 additional vehicle trips would occur (after discounting for afterschool clubs and activities). It is noted that these vehicle trips would not all occur at the once due to staggered time of the Reception classes.

- 6.12 Should the shuttle bus be discontinued the school would seek to implement additional staggering, increase uptake of clubs and try to vary the start and end times of the main school day where feasible.

Parking

- 6.13 In the scenario with the shuttle bus, the continued operation and expansion of the primary school is anticipated to generate additional parking demand for 13 vehicles each day, 11 of which would be associated with short-term demand for pupil drop-off and pick-up, with the remaining two spaces associated with medium-long term demand relating to staff.
- 6.14 In the scenario without the shuttle bus, the continued operation and expansion of the primary school is anticipated to generate additional parking demand for 107 vehicles each day, two of these would be associated with staff and would be accommodated on-site. The remaining 105 vehicles would be associated with short-term demand for pupil drop-off and pick-up.
- 6.15 It is noted that the vast majority of residential properties in the surrounding area have parking within their boundary and therefore there was observed to be a significant level of on-street parking on local roads such as Romney Broadwalk, Renoir Court, Van Dyck Place, Van Gogh Place and Manet Square. It is anticipated that any increase in medium-long term staff parking can be accommodated during the day and that the demand for short term parking for short periods during the morning and afternoon associated with pupil drop-off and pick-up can also be accommodated.
- 6.16 It is noted that the pupil demand would be subject to staggering due to attendance at clubs and activities.
- 6.17 In particular, in the event that the shuttle bus is discontinued the school will take steps to maximise car sharing amongst both siblings and also friends or closely located pupils.
- 6.18 As previously discussed additional timetabling measures would be implemented by the school in this instance to ensure that the number of additional vehicles arriving and departing the school at the main peak periods are kept to a minimum.
- 6.19 It should also be noted that any additional impact attributed to the temporary school would be for a maximum of three school terms and may be less if the school is able to move to the permanent site earlier.
- 6.20 Overall it is considered that the impact of the School relocation will be manageable and will only have a small impact on parking, highway safety or capacity.

7.0 MITIGATION STRATEGY

7.1 The existing School Travel Plan has been updated to reflect the changes in pupil numbers and continued operation at the temporary site. The key measures within the School Travel Plan include:

- i. If feasible continue to operate a Shuttle Bus to transport up to 50% of the Primary School population to site providing an opportunity for those living in proximity to Chichester and north of the A27 to continue to be dropped off elsewhere and then be transported to the site, thus reducing trip generation to north Bersted.
- ii. The safeguarding of the western side of Romney Broadwalk from the School vehicular entrance to Renoir Court, ensuring School coaches are guaranteed a set-down point upon arrival in close proximity to the School;
- iii. Promotion and communication of existing School Keep Clear Markings, space allocated to coach parking, existing white bar markings and the need for good parking behaviour to minimise the impact to local residents and any future complaints in terms of parking demand;
- iv. On-site cycle parking for up to 20 cycle spaces for use by pupils and staff. This will be over and above the estimated demand for cycling, offering propensity for greater modal shift by bicycle over the course of the continued temporary occupation.
- v. Promotion of travel by public bus (targeted towards staff and visitors) for use of the Star, U7, 700 and 141 which operate during the peak periods.
- vi. While car sharing is currently successful amongst pupils, this will be further promoted amongst pupils to determine if there is further propensity to increase the car share ratio above 1.6 occupant per vehicle. The same will apply to staff travel arrangements although this will be promoted in advance of the start of the 2018/19 academic year.
- vii. The staggering of arrivals and departures is a key way to address demand and takes place at present through breakfast clubs, after School clubs/activities and on-site wrap around care. Further opportunities to stagger, including varying the finish time of after school activities will be investigated by the school, particularly if the shuttle bus arrangement is discontinued.

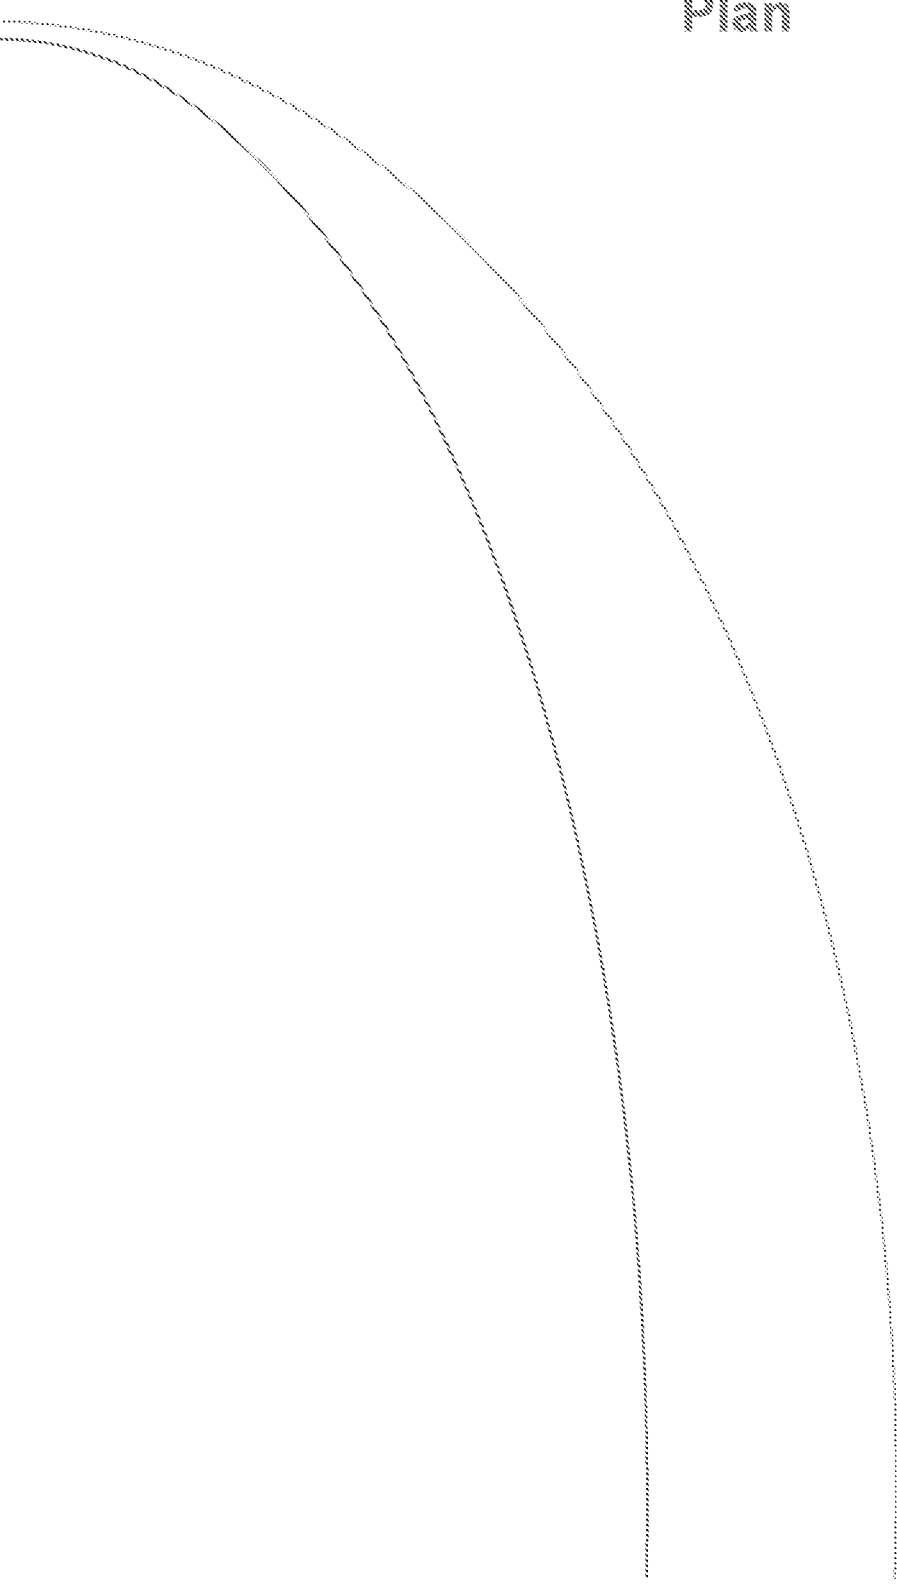

7.2 The School Travel Plan is submitted alongside this TS and outlines measures inclusive of the above as part of a mitigation strategy to minimise the impact of the continued operation and small expansion of the primary classes and associated demand for single occupancy vehicle travel.

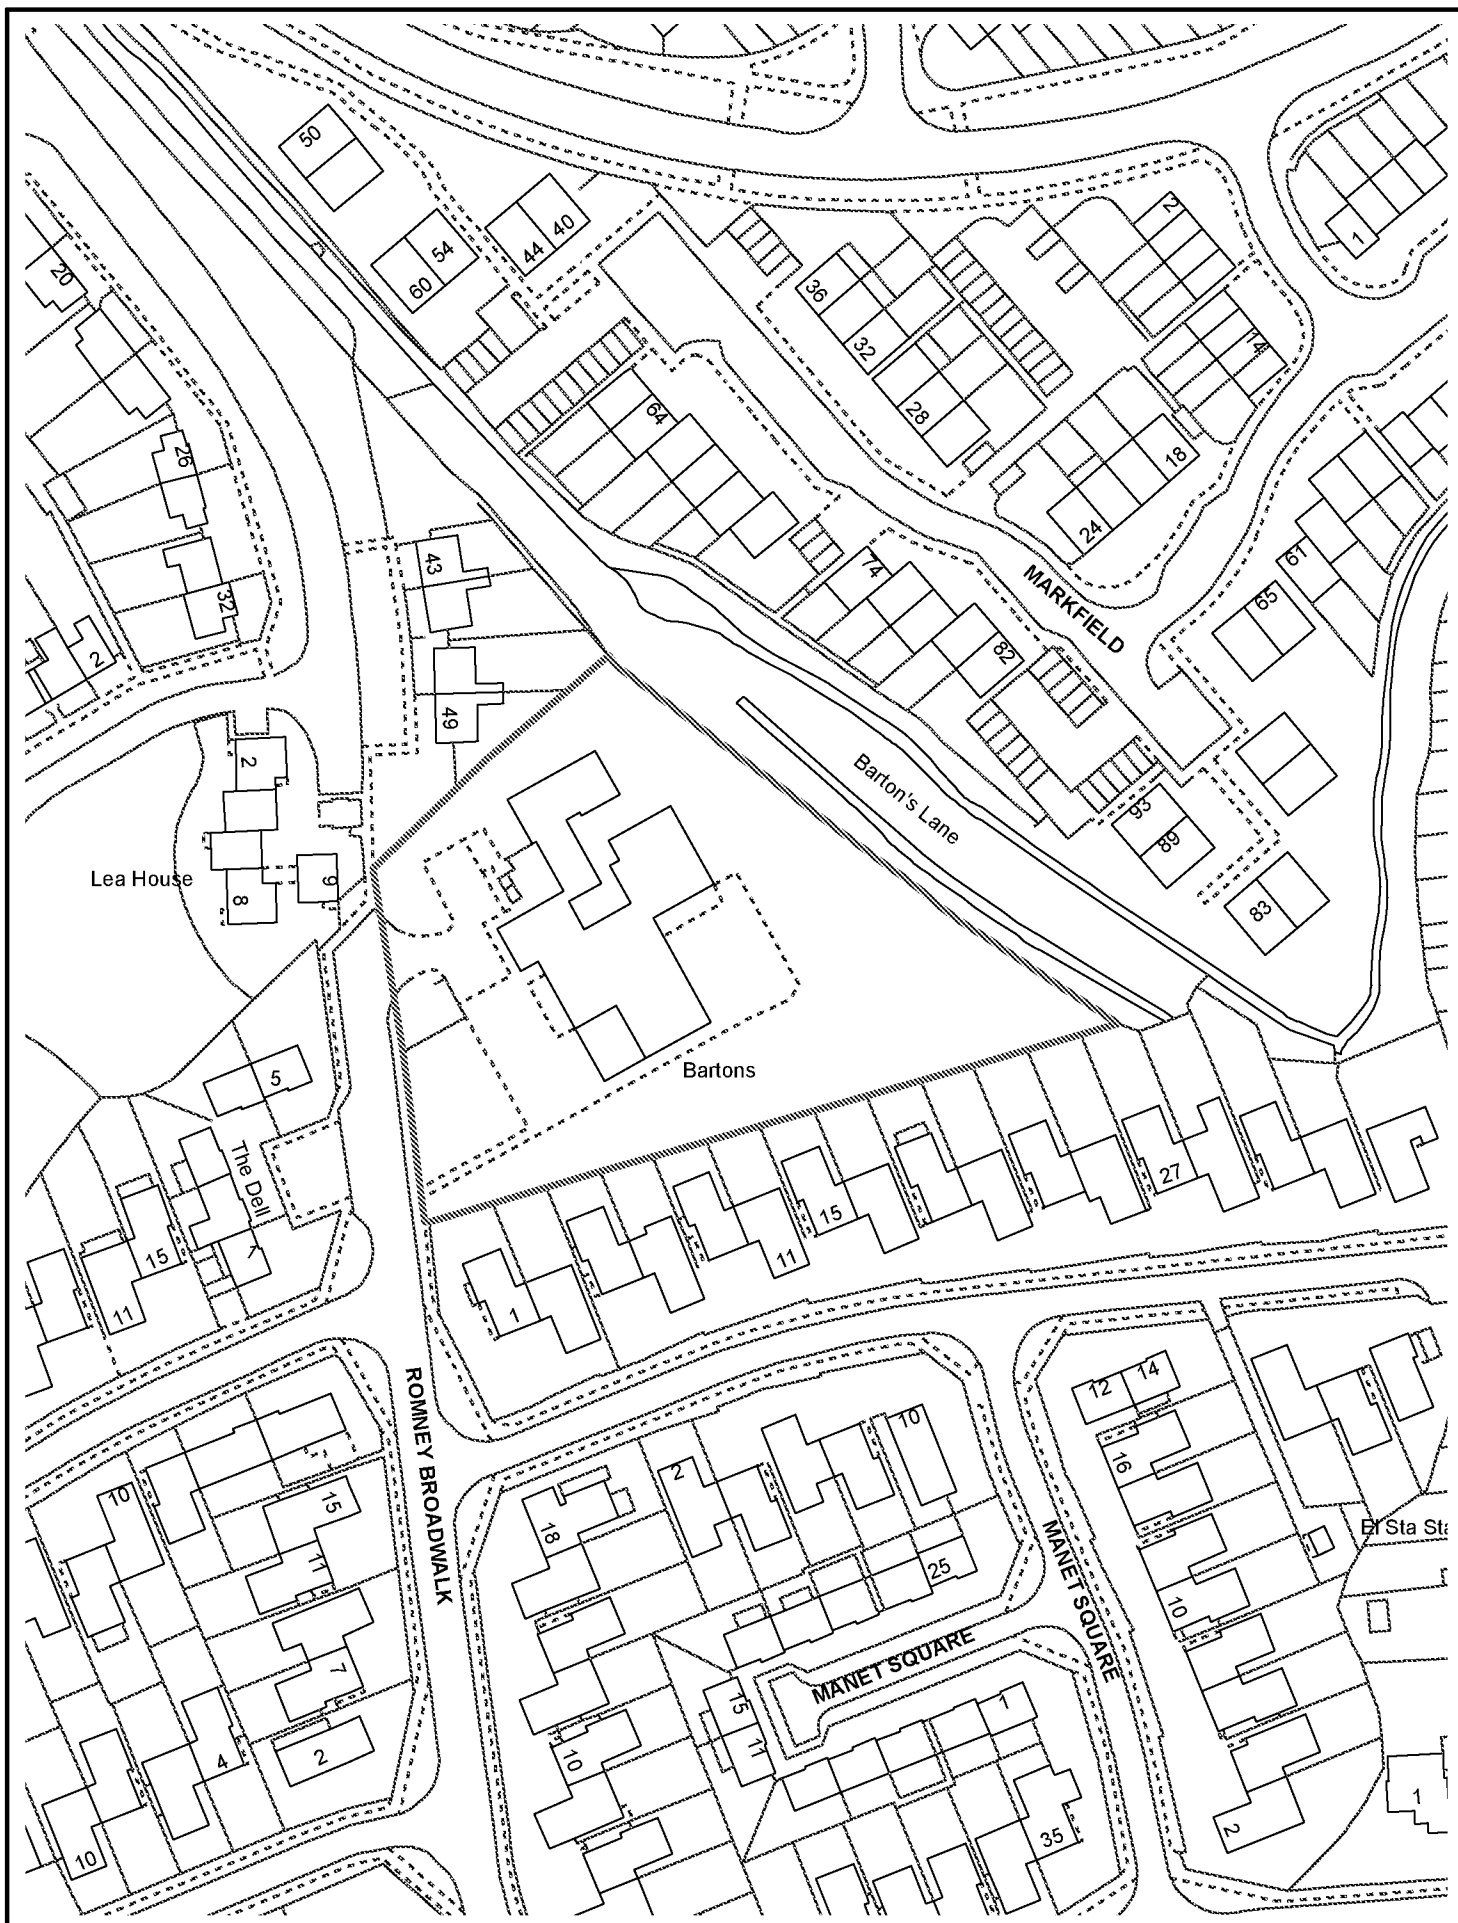

8.0 CONCLUSION

- 8.1 This Transport Statement has been prepared to support an Section 73 application to vary Condition 3 of planning permission ref BE/49/17/PL. This would allow Chichester Free School (primary school) to operate from this temporary site for a maximum period of an additional school year, with a 30 pupil plan expansion (total of 420 pupils) and 38FTE staff.
- 8.2 The site is located on the northern end of Romney Broadwalk, Bognor Regis PO22 9BD in a predominantly residential area. All roads identified were observed to be in good condition and have significant available on-street residual parking capacity.
- 8.3 Local footway provision in proximity to the site is good with dropped kerbs and tactile paving giving pedestrians good access to the proposed site on foot. The footways are generally well lit, with street lighting provided at regular intervals.
- 8.4 Following a review of personal injury accidents, no accidents have been recorded as taking place within a 300m of the site.
- 8.5 Vehicular access onto the site is via a gated entrance located on the eastern side of Romney Broadwalk. A separate gated pedestrian access point is also available on Romney Broadwalk, approximately 40m south of the vehicular access. This access leads onto an on-site pedestrian footpath that connects to the site's main building. The site currently has up to four standard parking spaces and one disabled parking bay.
- 8.6 To continue operation of the temporary site, the two modular temporary classroom buildings, which were provided for the first year of temporary occupation, will be retained. In addition to this 20 temporary cycle parking spaces were provided for the initial temporary application and would be retained for the proposed 2018/2019 school year.
- 8.7 As part of the proposed relocation, visitors and staff will enter and exit the site from the existing access and egress points which are not proposed to be altered. Pedestrian access will continue to be taken from the existing segregated pedestrian access. The existing footway within the School grounds will continue to provide a connection for those travelling on foot, by bicycle or scooter to the main entrance.
- 8.8 As part of the strategy to help minimise the impact of vehicular traffic generated by the temporary relocation, the school will seek to continue the existing shuttle bus arrangement, if this is feasible. It is yet to be confirmed whether funding will be available to continue the arrangement. Should it continue at least four coaches will be required to transport Primary School pupils between a designated gathering location and the Primary School site.

- 8.9 It is understood that should the school shuttle continue to operate then a net increase of 11 pupil car trips will occur in each peak period, with an additional two resulting from staff. Should the shuttle bus no longer be feasible then a small impact would be anticipated and additional management measures will be implemented to manage pupil car demand at the site.
- 8.10 The vast majority of residential properties have parking within their boundary and therefore there was observed to be a significant level of residual on-street parking on local roads such as Romney Broadwalk, Renoir Court, Van Dyck Place, Van Gogh Place and Manet Square. Based on this it is considered that this will more than adequately accommodate for the small level of additional long-term parking during the day, and the demand for short term parking for short periods during the morning and afternoon associated with pupil drop-off and pick-up.
- 8.11 A School Travel Plan for the temporary school is submitted alongside this TS and details measures which are proposed to form part of a mitigation strategy to minimise the impact of the continued operation of the temporary school and associated demand for single occupancy vehicle travel.
- 8.12 Such measures will include; safeguarding parking for coaches; promotion and communication of existing School Keep Clear Markings, white bar markings and appropriate parking behaviour by parents and visitors; promotion of travel by public bus for staff, and car sharing by pupils and staff; and the staggering of arrivals and departures through breakfast clubs and after school activities.
- 8.13 The development proposals are temporary for a maximum period of one year, with any impacts associated with the development anticipated to be minimal and short-term. It is concluded that the proposed continued operation of the temporary school site for the primary aspect of Chichester Free School is anticipated to have a negligible impact in terms of parking capacity, congestion or road safety both in proximity to the site or across the local highway network.

Saturdays

no service

Sundays

no service

Spring Bank Holiday (Monday 28th May)

no service

Service Restrictions: 4 - Operates only on Mondays and Wednesdays, not 4.6.18 to 29.8.
6 - not 4.6.18 to 31.8.

Notes: § - Time at this stop is indicative. You are advised to be at any stop several minutes before the times shown

For times of the next departures from a particular stop you can use **traveline-txt** - by sending the SMS code to **84268**. Add the service number after the code if you just want a specific service - eg: **buctdgt 60**. The return message from **traveline-txt** will show the next three departures, and it currently costs 25p plus any message sending charge. Departure times will be real-time predictions where available, or scheduled departure times if not.

You can also get the same information by using the SMS code at www.nextbuses.mobi (only normal browsing charges apply) or through several iPhone or Android apps that offer access to **NextBuses**.

NOTE: SMS codes are different in each direction. Make sure you choose the right direction from these lists.

no service

Service Restrictions: 1 - to 24.7.18, not 29.5.18 to 1.6.

Notes: SDO - Schooldays only

For times of the next departures from a particular stop you can use **traveline-txt** - by sending the SMS code to **84268**. Add the service number after the code if you just want a specific service - eg: **buctdgt 60**. The return message from **traveline-txt** will show the next three departures, and it currently costs 25p plus any message sending charge. Departure times will be real-time predictions where available, or scheduled departure times if not.

You can also get the same information by using the SMS code at www.nextbuses.mobi (only normal browsing charges apply) or through several iPhone or Android apps that offer access to **NextBuses**.

NOTE: SMS codes are different in each direction. Make sure you choose the right direction from these lists.

Spring Bank Holiday (Monday 28th May)

same as Sundays

Notes: § - Time at this stop is indicative. You are advised to be at any stop several minutes before the times shown

For times of the next departures from a particular stop you can use **traveline-txt** - by sending the SMS code to **84268**. Add the service number after the code if you just want a specific service - eg: **buctdgt 60**. The return message from **traveline-txt** will show the next three departures, and it currently costs 25p plus any message sending charge. Departure times will be real-time predictions where available, or scheduled departure times if not.

You can also get the same information by using the SMS code at www.nextbuses.mobi (only normal browsing charges apply) or through several iPhone or Android apps that offer access to **NextBuses**.

NOTE: SMS codes are different in each direction. Make sure you choose the right direction from these lists.

Spring Bank Holiday (Monday 28th May)

same as Sundays

Notes: § - Time at this stop is indicative. You are advised to be at any stop several minutes before the times shown

For times of the next departures from a particular stop you can use **traveline-txt** - by sending the SMS code to **84268**. Add the service number after the code if you just want a specific service - eg: **buctdgt 60**. The return message from **traveline-txt** will show the next three departures, and it currently costs 25p plus any message sending charge. Departure times will be real-time predictions where available, or scheduled departure times if not.

You can also get the same information by using the SMS code at www.nextbuses.mobi (only normal browsing charges apply) or through several iPhone or Android apps that offer access to **NextBuses**.

NOTE: SMS codes are different in each direction. Make sure you choose the right direction from these lists.

Appendix C - Personal Injury Accident Plan

Barton School (400m radius) – North Bersted – Robert West

Collision report 01/01/2012 – 31/12/2016

Date produced
21 February 2017

The information included in this report is provided for analysis and is based on the data provided by Sussex Police. Some of the data included in this report is subjective and as such is not considered suitable for general release. In view of this it should not be transmitted to any other person in its original form, including in any report which may be available to the public. If you have any doubt regarding how this data may be used other than for analysis please contact SSRP for advice.

Sharing the Responsibility

Data regarding personal injury collisions is recorded by Sussex Police in accordance with the DfT Stats 19 requirements. The data is subsequently used by Sussex Safer Roads Partnership for monitoring and planning. While every effort is made to ensure that this data is accurate, it is subject to change should further information become available.

This data may not be fully validated and while every effort is made to ensure its accuracy any statistics provided may not match those published elsewhere.

Sussex Safer Roads Partnership does not hold collision data either where there are no recorded casualties or the incident has not been reported to Sussex Police.
