Dear Mr Davis

I have attached the drawing showing the 150mm pipe covering of reinforced concrete with A142 mesh cut and laid in the concrete.

Also allowing for 150mm minimum of concrete round the sump pit as shown on the drawing.

I hope this is helpful and will be all the engineer requires, any thing else required I will try to sort as soon as possible. I am still waiting for the timber cladding sample from Covers and as soon as I have that I will drop this and the slate samples in for approval with the application.

Many thanks
