Hi Karen,

Can this please be registered as an extension of time agreement on BE/91/18/PL.

Many thanks,
David

David,

I am pleased to say that we have now obtained the final construction drawings from the contractor on this (with confirmation that this reflects the 'as built' position). We are therefore working on overlaying the information and providing the short maintenance statement to respond to the drainage query raised. I expect that we will be able to issue this to you next week.

With that in mind, we'd like to agree a further extension? We'd suggest that this is for a further two weeks (22nd February) to allow you time to reconsult, but we'd be happy to agree a shorter period if required.

I hope you are able to agree to this – I look forward to hearing from you. I may not be at my desk for much of the day but if you would like to talk through, please do give me a call.

Thanks and kind regards
Charlie

Hi Charlie,

Apologies if you haven't been able to reach me. It has been a rather busy week and I have been away from my desk for the majority of it.

I am happy with the extension of time as proposed whilst this additional information is obtained. I am at my desk this morning if you would like to talk further on this.

Kind regards,
David

David,

I have left a message but haven't managed to get through to you. I'm conscious that our extension expires today. We are still trying to obtain the as built survey drawings – you'll appreciate that R-RMC are the tenants rather than the landlords so obtaining these details is proving more time consuming than originally expected.

Can I therefore request that we extend the time for a period of two weeks, until Friday 8th February? I'm trying to avoid having to keep seeking to agree short extensions!

Please do call if you would like to discuss further – I will be in the office until about 1pm today. Look forward to hearing from you.

Thanks and kind regards
Charlie

David,

We are still considering our position on this – we're trying to obtain the "as-built" drainage drawings however expect that we can crystallise the position on this and respond to you shortly.

I am out of the office tomorrow and Monday, returning on the Tuesday (22nd). With this in mind, we would request a further extension of time until 25th January.

Apologies for the delay – I hope you will be able to agree to a further short extension.

Please do give me a call if any queries or concerns. I will be in the office for the remainder of the afternoon, otherwise my colleague Emma will be picking this up in the event of any urgent queries in my absence.

Thanks and kind regards
Charlie

Hi Charlie,

I have spoken with Laura and she has confirmed that if the as built details and maintenance statement are provided she would be happy with the use of condition to secure loading details.

Kind regards,
David

David,

I have left a message, and would be grateful for the opportunity to talk through the points set out below when you are able.

In the meantime, and to enable us time to consider our next steps, we confirm our agreement to an extension of time for a further week, until 18th January.

Thanks and kind regards
Charlie

Subject: RE: Application 91/18/PL - Additional Information

Dear Charlie,

Apologies for the delay in getting back to you on this one. I have unfortunately been stuck in meetings all day and have only just got back to my desk. I spoke yesterday with Laura Gibbons, Neil Crowther (Group Head for Planning) and Karl Roberts (Director of Place) in relation to this application.

Having undertaken these discussions it is considered that the use of conditions as proposed is not appropriate. The proposed development is located above the existing surface water drainage network and even overlaps the circle used to identify the location of the flow control chamber. In the absence of as built drawings it is not possible to be certain that the proposed structure will not sit directly over access points to the surface water drainage network. This is important due to maintenance requirements with flow control chambers, attenuation tanks, separators and French drains all requiring regular maintenance. There are also likely to be further inspection points and vents on the attenuation tank.

It is also worth noting that the proposed structure will be located directly on top of the attenuation tank and without assurances as to the loadings we cannot be confident that this will not result in damage to the tanks.

Therefore, the conditions as proposed are not appropriate as it is possible that we could end up with conditions that cannot be discharged. Therefore, it will be necessary for this information to be provided prior to determination. I am aware that the extension of time on this application runs until the 11th January and I would like to suggest an extension of time (for 7 days) to provide you with the opportunity to discuss this with your client. Therefore, I would be grateful if you could provide written confirmation of your agreement to an extension of time until the **18th January 2019**. If you would wish to prepare the additional documentation I would be grateful if you could please advise of the timeframe required for the completion of this work so as we can secure an appropriate extension of time agreement.

If I do not receive confirmation of your agreement to the proposed extension of time by 12pm tomorrow then I will have no option but to determine the application on the basis of the documentation submitted in support of the proposals to date.

Please do not hesitate to contact me should you wish to discuss this matter further - I will be in the office all day tomorrow.

Many thanks,
David

David,

We note the comments below by Laura in respect of the drainage, however, we very much feel that these could be adequately secured through the imposition of a suitably worded condition.

The drawing shared demonstrates that the proposed development and its location is compatible with the approved drainage layout and scheme, and does not prevent access to the inspection chambers. Whilst I appreciate that this is not an "as built" survey drawing – the drainage layout is an approved scheme and one already secured through condition for the existing development, and therefore demonstrates (in principle) that access for maintenance to the SuDS can be retained. We would question the necessity of providing additional detail for planning purposes at this stage.

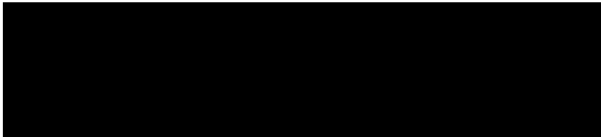

It would not be possible to provide precise details of the structural loading and calculations until detailed construction drawings are available (the submitted drawings are relevant for planning), which cannot be undertaken until a contractor has been appointed. Similarly, it would be premature at this stage to provide details of the methodology of the maintenance at this time, other than to confirm that access will be maintained and permitted to the SuDS, as required. Again, we feel that both could be satisfactorily secured through a suitably worded condition.

I note that we have an extension of time which expires today, and R-RMC are keen to reach positive resolution with the Council on this as soon as possible. On this basis, I can confirm that we would agree to a further extension of time until Friday 9th January. I trust that this is acceptable?

I look forward to hearing from you.

Thanks and kind regards
Charlie

Both,

The details provided are insufficient to demonstrate that maintenance of the suds can occur and that loading upon the attenuation tanks is acceptable.

Please provide:

- As built survey drawings of the surface water drainage;
- Written commentary for the methodology for maintenance of the SuDS; and
- Structural drawings and calculations for the proposed structure.

Kind Regards,

Hi Laura,

I have received the attached in relation to Oldlands. Are you able to take a look when we come back so I can get a decision out by the 4th Jan if this is acceptable?

Many thanks,
David

Afternoon David,

Please find attached a copy of an overlay plan in respect of the proposed temporary building, that should hopefully provide sufficient clarification to demonstrate that access to the relevant inspection chambers and flow control chamber, as was the concern of the Drainage Officer.

I trust that this is acceptable and enables a planning permission to be issued? I'd be grateful if you could let me know if there are any queries, or anything you would like to discuss further.

Kind regards (and best wishes for the festive season!)

Charlie
