Dear Michael

Re: Planning application BE/93/19/PL

Following recent correspondence with you we are writing to inform you that this is now an application for **retrospective** planning permission, as the building has now been constructed.

It was originally stated in the planning application form and covering letter that work had started on the installation of the building due to the need for commercial expediency to increase production volume. At that time a temporary structure was proposed, but Polestar now confirm that a permanent building is required instead. We apologise for this change in proposal.

We had originally expected to receive a decision within 8 weeks during the installation process, but given the decision has been delayed and the installation completed we now need to be clear that the applicant requests respective planning permission. Please note also that we are seeking to resolve the building control observations on the proposal also.

Please do not hesitate to contact me if you have any further queries regarding this application,

Regards

Rachel Kennedy
