Dear Mr Whitehouse,

Town and Country Planning (Pre-commencement Conditions) 2018
Notice of intention to impose pre-commencement conditions

1 No. Dwelling. This Application Is A Departure From The Development Plan. This Application Is In Cil Zone 3 And Is Cil Liable As New Dwelling.

Springfields Chichester Road Bersted PO21 5EE

From 1 October 2018 section 100ZA(5) of the Planning Act 1990 provides that planning permission for the development of land may not be granted subject to a pre-commencement condition without the written agreement of the applicant to the terms of the condition (except in the circumstances set out in the Town and Country Planning (Pre-commencement Conditions) Regulations 2018).

The following Pre Commencement Condition/s are Proposed:

- 4 No development shall commence until a Construction Management Plan has been submitted to and approved in writing by the Local Planning Authority. Thereafter the approved Plan shall be implemented and adhered to throughout the entire construction period. The Plan shall provide details as appropriate but not necessarily be restricted to the following matters,
- the anticipated number, frequency and types of vehicles used during construction,
 - the parking of vehicles by site operatives and visitors,
 - the loading and unloading of plant, materials and waste,
 - the storage of plant and materials used in construction of the development,
 - the provision of wheel washing facilities and other works required to mitigate the impact of construction upon the public highway (including the provision of temporary Traffic Regulation Orders),

Reason: In the interests of highway safety and the amenities of the area in accordance with policies D DM1 and T SP1 of the Arun Local Plan and the National Planning Policy Framework. This is required to be a pre-commencement condition because it is

necessary to have the site set-up agreed prior to access by construction traffic.

- 5 Development shall not commence, other than works of site survey and investigation, until a Soil Resource Plan has been submitted to and approved in writing by the Local Planning Authority. This shall set out how the best and most versatile soils on the site are to be protected during construction and then recycled/reused in the new development layout. The soil protection/mitigation measures shall be implemented as per the document and then permanently adhered to throughout the construction and development of the site.

Reason: In accordance with Arun Local Plan policy SO DM1 and the National Planning Policy Framework. It is considered necessary for this to be a pre-commencement condition to protect the best and most versatile soils on the site prior to the construction commencing.

- 6 No part of the site shall be occupied or any heavy plant/equipment introduced to the site or demolition work or construction work or alterations to existing ground levels shall take place (but not including survey work) unless and until an Arboricultural Method Statement and Tree Protection Plan have been submitted to and approved in writing by the Local Planning Authority.

Thereafter a pre-commencement site meeting must be arranged to take place between the Arun DC Tree Officer and the Arboricultural Expert or Landscape Architect representing the site owners at which time, all tree protection measures will be inspected and assessed to verify that it is 'Fit for Purpose' as required under British Standard 5837:2012 and have been erected and positioned exactly as shown on the approved drawings.

Reasons: To comply with BS5837 and with Arun Local Plan policy ENV DM4 and to ensure that retained trees are afforded due respect and appropriate levels of protection such that their ongoing health and vitality is not compromised and they can continue to enhance the landscape and amenity of the area. This is required to be a pre-commencement condition because it is necessary to ensure the protection of the protected and otherwise significant trees prior to any change to the surface of the site.

- 7 No development shall commence until a mitigation method statement has been submitted to and approved in writing by the Local Planning Authority to provide details of how those retained hedgerows are to be protected and enhanced. There must be a 5m buffer zone in place secured by fencing around the retained hedgerows during construction. The development shall thereafter proceed in accordance with the approved hedgerow protection and enhancement measures.

Reason: Bats use hedgerows for foraging and commuting and therefore in accordance with the NPPF and policy ENV DM5 of the Arun Local Plan. This is required to be a pre-commencement condition because the hedgerow protection scheme must be in place prior to construction starting.

- 8 Prior to commencement of the development hereby approved (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), the following components of a scheme to deal with the risks associated with

contamination of the site shall each be submitted to and approved in writing by the Local Planning Authority:

1. A Preliminary Risk Assessment which has identified: all previous (historical) uses; potential contaminants associated with those uses; a conceptual model of the site indicating sources, pathways and receptors; potentially unacceptable risks arising from contamination at the site.
2. A Site Investigation Scheme, based on (1) above to provide information for a detailed assessment of the risk to all receptors that may be affected, including those off site.
3. Based on the Site Investigation Scheme and the detailed risk assessment (2), an options appraisal and remediation strategy giving full details of the remediation measures required and how they are to be undertaken.
4. A Verification Report providing details of the data that will be collected in order to demonstrate that the works set out in (3) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Note: Any changes to these components, (1) to (4) require the express written consent of the Local Planning Authority.

The scheme shall be implemented as approved above and, prior to commencement of any construction work (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), a Verification Report demonstrating completion of the works set out in the approved remediation strategy and the effectiveness of that remediation shall be submitted to and approved in writing by the Local Planning Authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met. The report shall also include a long-term monitoring and maintenance plan for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action, as identified in the verification report, and for the reporting of this in writing to the Local Planning Authority.

Reason: To ensure that the development complies with approved details in the interests of protection of the environment and prevention of harm to human health in accordance with Arun Local Plan policies QE SP1 and QE DM4. This is required to be a pre-commencement condition because these details have to be agreed and in place before any work commences.

OPTIONS:

1. Confirm your acceptance in writing by the **28th September 2021**.
2. Choose not respond (i.e. remain silent). If there is no response by the **28th September 2021** the Local Planning Authority may grant planning permission subject to the terms of the pre-commencement condition specified in the notice.
3. Provide comments before the **28th September 2021** on the proposed pre-commencement condition, in which case that condition cannot be imposed.
4. Indicate before the **28th September 2021** that you do not agree to the terms of the proposed pre-commencement condition, in which case the Local Planning Authority may

then either:

- a. grant planning permission without the pre-commencement condition,
- b. seek written agreement to an alternative pre-commencement condition, or
- c. refuse to grant permission (if it considers that the disputed pre-commencement condition is necessary to make the development acceptable in planning terms).

If you wish to discuss the contents of this letter, or if there is anything you do not understand, please contact the case officer on the above extension.

Yours sincerely

Neil Crowther
Group Head of Planning

For details of how the Council will deal with your data please refer to our privacy notices on the website <https://www.arun.gov.uk/privacy-policy/>

If you have provided an email address, all correspondence including the decision notice will be sent by email. It is therefore important that you keep us informed if this changes during the course of this application.
