TREE REPORT

Client Contact Details: Lisa Jelley, Liseve Lodge, 84 North Bersted Street, Bersted, Bognor Regis, West Sussex. PO22 9AQ.

Date: 28th August 2020
Report Number: 646
Surveyor: Dr Gavin Walker & Mr Dave Hedley

Dangerous Poplar Trees Safety Work Schedule:

T1 – T2 POPLAR TREES: (*Populus*)

These two mature Poplar trees (c.30m tall) are situated within the garden at 84 North Bersted Street. These two trees are unsafe due to damage/rot on both of their trunks from ground level up to a height of c.4m. There is loss of the cambium layer/bark on the compression side of the tree in line with the prevailing (SW) winds. These are also large trees for the location by excessively overhanging the neighbouring properties. It is recommended to take down both of these trees to reduce the risk of failure and damage to the neighbouring properties. Careful tree surgery is required as the trees are on the border of the neighbouring properties and are in close proximity to gardens and various outbuildings. Our trained arborists/tree climbers will ensure that all branches are safely removed and lowered to the ground.

T3 – T12 POPLAR TREES: (*Populus*)

Reduce T3-T12 Poplar trees with a 5-7m crown reduction. This will reduce the 'sail effect' and reduce the large lateral boughs on many of the trees, especially noteworthy on T8, T9 & T10.

Additional Notes:

- All work is undertaken by fully trained NPTC professionals.
- Our experienced and fully trained arborists work to high arboricultural standards and will ensure that all work will comply with BS3998:2010.
- All brash, branches and green waste to be stacked neatly and left on site.

Tree surgery, hedge cutting, garden clearance, forestry & seasoned firewood
