

SCHWEGLER 2F UNIVERSAL BAT BOX 10604

SPECIES: BAT

MATERIAL: Woodcrete

DIMENSIONS (MM): Ø 160 x 330

ENTRANCE (MM): 17 x 40

WEIGHT (KG): 3.8

INCLUDES: Nest box, hanger and aluminium nail

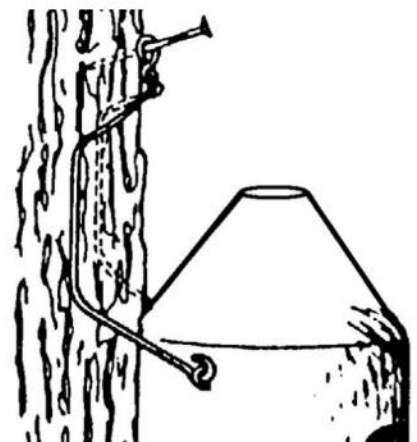

This general-purpose Bat Box is ideally suited as an introduction to Bat protection. At the same time, it is a readily accepted resting and temporary roost.

SPECIES: Species such as the Lesser Noctule and the Common Noctule, as well as Daubenton's, Nathusius's Pipistrelle and Bechstein's Bat, are typical representatives of Bats that live in woods and forests. So-called "House Bats" are mainly those that like to roost in buildings, for example, in roller shutter boxes, behind window shutters, niches and gaps. These are, above all, Serotine, Mouse-Eared and Pipistrelle Bats. These Bats prefer, for example, flat boxes or round boxes with several hanging panel partitions.

SITING: install in tree or on buildings, min height 3-4 m. Ensure that a clear horizontal approach is provided for bats.

MAINTENANCE: To ensure optimum accommodation, the Bat Box should be cleaned once or twice a year, or the bat droppings should be removed. The front panel can be removed for inspection and cleaning.
