Having just read the consultation by Southern Water dated 3/10/2022 this consultation seems to suggest that Southern Water are saying that the existing sewer system will not cope with this size of development, before any development of this size is considered a new sewage treatment plant should be built together with the upgrades to the existing sewers in the area i.e. replacing the combined sewer overflows that cause problems at this present time.

If the proposed suds systems are installed there is no guarantee that Southern Water will adopt the systems this has been experienced in Barnham in the past leaving the residents that purchase the houses with a sewer system not fit for purpose.

To install suds systems are leaving the people of the Bognor Regis area with a sewer system that you would expect to see in a third world country.

Southern Water are discharging sewage into the sea of Bognor Regis now and have been fined for doing this it is about time this was stopped it cannot be acceptable that people visiting Bognor Regis are swimming in

sewage discharged into the sea by Southern Water.

Your views as made above will be considered before the application is determined.
