Thank you for your internet representation made on 10th December 2022 which has been recorded as an objection with the comments as follows:

OWPC53240

In view of the change in target building numbers by the Government this proposed development must now be taken into account and the neighbour hood plans taken note off.

The infrastructure in this area has not been improved, and there does not seem to be any plan to deal with the problems with sewers and surface water drainage other than working around the existing problems to allow developments that are not needed to go ahead we are seeing sewers being flooded with surface water because there are no dedicated surface water sewers, surface water flows into the sewers flooding them and causing the sewers to overflow and an increased amount of sewage being dumped into the sea, because Lydney treatment plant cannot cope with the developments being done in this area Southern Water keep saying they will be improving and upgrading the sewers these are just words actions speaks louder than words at this time we only have words we in Barnham have the same sewer problems we have had for many years with a lot of good words and nothing done this cannot be allowed to continue this proposed development should be refused.
