Dear Patrick

**Barnham, Eastergate and Westergate – submission of updated
Drainage Report in relation to application ref. BN/11/22/OUT**

On behalf of the Applicant for planning application ref. BN/11/22/OUT, we provide an updated Sustainable Drainage Report in response to consultation comments from WSCC regarding the need to incorporate updated climate change allowances and rainfall data. For ease of reference, we also provide a response note for information purposes, which sets out our responses to WSCC's comments in turn.

The Sustainable Drainage Report has been brought up to date given the passage of time since the original strategy was prepared, however these technical amends have no material impact on the SuDS strategy, size of the drainage basins or the principles of discharge as previously presented. The document is provided as a full update, rather than an Addendum. As such, the Sustainable Drainage Report now dated May 2024 entirely replaces Appendix K2 of the Environmental Statement (ES) which supports this application.

We have reviewed the updated drainage strategy against the conclusions of the ES and confirm that this does not affect any of the outcomes or mitigation strategy for the water environment as previously described in the ES and ES Addendum.

We trust that the Drainage Strategy now responds to all WSCC comments and can be confirmed for approval. In the meantime, please do not hesitate to contact me or my colleague Pauline Roberts if you have any queries.

Yours sincerely

Georgia Crowley
